How to factory reset the DWR-900V 5G Mobile Hotspot?
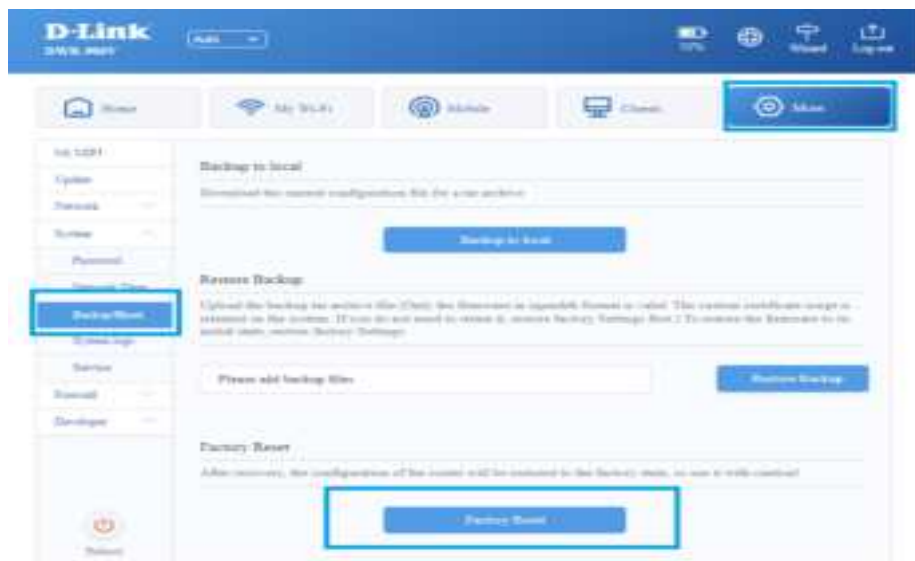

Soft Reset

1   Connect your DWR-900V to the laptop by Type C cable or wirelessly.

2   If this is your first time installing the Mobile Hotspot, use a web browser and type in http://192.168.1.1 in the address bar. Enter the Admin Password and click login to start the configuration process. The web address and default admin password are printed on the device label at the bottom of the device. By default, the admin password is admin

Note: If you have changed the password and cannot remember it, you will need to reset the router to factory defaults.

3   From the home page, Select **More** tab, under **System** Options, Click on **Backup/Reset**

4   Click on Factory Reset to initiate the soft reset process.

5   The Mobile Hotspot will restart, and your settings will be back to the factory default settings.

Hard Reset

1   Ensure the Mobile Hotspot is powered on. Press and hold the reset button on the right side of the Mobile Hotspot for about 10 seconds.

2   The display touch screen on the mobile hotspot will turn off, and the device will reset. Please take up to a minute for the reset procedure to complete.
