

CHX SERIES HOOK-UP

DETAILED WIRING DIAGRAM

CICADA

AUDIO

NOTE: FULL OWNERS MANUAL AVAILABLE ON THE WEBSITE

Here is a detailed wiring connection drawing for the CH series COAX HORN drivers. We've tried to make it as simple and straight forward as possible so that it is literally a "plug and play" situation.

HORN TWEETER CONNECTION

1. Remove the grill and the unscrew the stock HD speaker from the fairing

2. Disconnect the stock HD speaker from the bike. Leave the wiring as you dont need to cut ANYTHING!

3. Connect the Cicada CoAx Horn Speaker wiring harness that comes with our speaker.
(See drawing to the right)

4. Make sure you follow polarity
(+) goes to (+) and (-) goes to (-)

NOTE: if you hook it incorrectly it will NOT hurt anything , you'll just have a LOT less bass.....Hey... if you dont care...we dont care!

(yeah we do butwe aren't there so we can't do anything about it!!!)

NOTE 2: If you hook up the tweeter backwards ...it won't hurt anything eitherIt just will sound really nasely and super bright.

MIDBASS CONNECTION
(THIS IS A 0.187 CONNECTOR!)
THERE ARE 4 BARE 0.187
CONNECTORS AS BACKUPS
IF YOU DECIDE TO WIRE
THIS ACTIVLY WITH YOUR WIRING

RUNNING TECH TIP - POWER AND BLOWING UP SPEAKERS

Speakers do NOT blow themselves up! Somebody has to over drive them. Usually this "over driven" issue is too low of power and the amplifier being driven into clipping.

This "clipping" causes the speaker voice coils to get hot. Casuing the glues to "un-glue" themselves from the voice coil former.

Another contributing factor is running the driver below their F_s (resonance frequency)

ALWAYS HIGH PASS COAX HORN DRIVERS!! ALWAYS!!!!

STOCK HD SPEAKER
WIRING CONNECTIONS (0.187)

CICADA COAX HORN
WIRING CONNECTIONS (0.187)
CONNECTS BOTH THE TWEETER
AND MIDBASS DRIVER

"We manufacture the BEST in Motorcycle Audio....PERIOD!"

THANK YOU!

We hope you enjoy your audio products from us. We strive to be the best and your satisfaction is our first priority.

Actuallyour ONLY priority!

If you have any problems with your product please contact us. Either by phone or email. Also, on our webpage, are many interesting tech sheets on multiple common issues. These would be good to go over and get a better understanding of audio. Our "mantra" is

.... NO Faries, Pixie Dust...OR Unicorns!

Its ALL physics. we dont make it up..

.....we just follow the LAWS (of Physics)

In the rare circumstance that you are not completely satisfied, please contact us. We want to help!!

Our customer service team will do their best to make it right. We appreciate your business and strive to make you happy.
