Common troubleshooting

Fault	Possible causes and solutions
Unable to power on	1. No power connection. 2. The wire is disconnected or the plug is not fully inserted.

	3. The connected socket is faulty.
No sound	1. The extension cable of the speaker is disconnected, please check all the connections or reconnect them.
Bluetooth cannot connect	1. Already connected to other Bluetooth devices, power off, then power on again to search for Bluetooth pairing. 2. Beyond the effective range. Please do not connect beyond 8M of this product. Do not try to connect through obstacles.
The music is played by another device	1. As Bluetooth has a back-connection function, please check whether the phone is paired with two Bluetooth devices at the same time, cancel the pairing of one of them, and click the play button on the phone.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful

interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
