PRESS CONFIDENTLY. PRESS WITH THE BEST.

RIDGID® press tools save you time and money by delivering reliable performance press after press. Every generation of press tools works harder – and smarter – than the last. We are constantly working to reduce in-use tool weight while increasing overall performance. That's why we are the #1 press tool manufacturer since 1999. **RIDGID: BUILT FOR THOSE WHO KNOW.™**

#1 IN NORTH AMERICA

RIDGID® revolutionized the North American Market by introducing press technology in 1999. Since then, RIDGID has become the most recognizable and trusted brand for press tools. Through years of dedication to delivering a better way to work, RIDGID stands as the #1 pressing platform in North America.

RUGGED DURABILITY.

RIDGID tools are tested under the harshest conditions to ensure that each tool will work properly in any environment. RIDGID designers, engineers and testers work closely to deliver durable products that offer quality in every press. Rigorous lab testing ensures that every RIDGID press tool is ready for even the toughest of jobs.

PURPOSE-BUILT.

RIDGID® remains the #1 press tool in North America due to constant innovation. They introduced the first lithium ion battery for pressing, the first soil pipe cutter actuated by a press tool and the first tools for pressing iron pipe. RIDGID continued its tradition of purpose-built innovations with the new RP 342-XL, the press tool that presses any size and material pipe that can currently be pressed.

SMALLER. FASTER. SMARTER.

Every generation of RIDGID press tools works harder and smarter than the last. The new RP 350's ergonomic design lets you press in tight spaces, while its brushless motor is capable of over 100,000 cycles. That means less downtime with zero scheduled maintenance. The RP 240 and 241's compact profiles let you work in difficult jobsite conditions with ease. Current models are equipped with Bluetooth® compatibility, so the tools can interface with RIDGID Link, an app that shares valuable insights about the tool.

#1 IN PRESS TOOLS SINCE 1999.

RIDGID® press tools are unsurpassed in making quick and reliable connections on copper, carbon steel, stainless steel and PEX tubing. No open flames. No mess. Just secure connections in less than five seconds – wet or dry.
