Product Name: portable electric juice cup
Model: YE-02
Product capacity: 380ml
Color category: pink, sky blue, fruit green
Cup cover material: food grade PP
Cup body material: food grade PC
Base material: food grade ABS
Blade material: stainless steel 304
Motor specifications: DC3.6V
Motor speed: no load 22000 rev / min $\pm 15\%$
load 15000 RPM / min $\pm 15\%$
Working current: 10-12A
Battery type: 3.7V 2000mAh
Product size: 75*75*230mm (L * W * H)

Site function

Serial number	Site name	Material Science
1	Silicone rope	silica gel
2	lid	PP
3	Silicon rubber welding ring	silica gel
4	filter	PP
5	Sealing ring	silica gel
6	The cup body	PC
7	Blade fixing buckle	ABS
8	blade	SUS304
9	Base	ABS
10	LED signal lamp	LED
11	Power switch	silica gel
12	Charging jack	intelligent interface
13	base	ABS

Instructions for use

- 1, this product for battery driven DC motor, the charger applies to all kinds of intelligent mobile phone charger, before use, please first used the company to provide the product data line to charge the product before use, the charging time: 3 hours is appropriate.
- 2, the product work, strictly unscrewed the cover and put your hands or other hard materials into the cup body to prevent accidents.
- 3, cleaning the product, please first determine whether the switch power is off, and then clean the cup cover, cup body and the base part, remember to put the base in the water to clean, to prevent damage to the electronic components into the base.
- 4, the boot idling time for 5 seconds, the longest juice time for 90 seconds, idle for 5 seconds or work 90 seconds automatically stop, green light flashes. Please reset the switch and then boot. Please do not press the juice continuously, so as not to be too large to heat and affect the life of the product.
- 5, the normal use of the process, the cause of the meat is too large to cause motor sudden cardiac arrest, the motor is locked in a state of death. Line protection program is turned on, automatic power off, while LED red flashing. Switch off after the LED stop flashing, touch switch, once again to normal operation.
- 6, all parts of this product can not be used more than 50 degrees of hot water and microwave disinfection, in order to avoid thermal deformation damage.
- 7, do not put any parts of this product into the dishwasher and other types of cleaning equipment, cleaning.
- 8, do not use steel wool, abrasive cleaning agents or corrosive liquid cleaning products.
- 9, this product is special fresh fruit juice machine, it is not meat, grinding other nuts or soy products.
- 10, this product should be stored in a child is not easy to touch the place, do not let the body is not perfect, feeling or mentally handicapped or lack of relevant experience and knowledge of the people (including children) using or playing with this product.
- 11, this product is only suitable for personal or family use, the use of the process, such as the emergence of uncontrollable failure to repair, please contact the manufacturer customer service. The company will not be responsible for the maintenance of the damaged parts of the electronic components as a result of their own demolition.

Using method

Before the initial use of the product, make sure the battery is fully charged and then use it. At the end of cleaning and food contact parts, this product has a dual security protection in the cup body is fixed on the frame only after work.

1, wash the fruit, cut into small pieces about 1.5x1.5cm (nuclear material, hard, thick skin or hard shelled fruits, please remove it)

2, into the fruit, about 60% of the cup body, adding water, so that the total amount of about 80% of the cup body capacity.

3, product inversion, start switch, motor rotation and then set. Generally apple, pear working time of about 1-1.5 minutes. Citrus, orange, strawberry takes 30 seconds to ~1 minutes. Work gently shake the product, the effect is better to play juice.

4, the juice is finished, turn off the power switch, unscrew the cover of drinking. If the fruit residue more please use the filter net to filter before drinking.

Failure analysis and troubleshooting

Failure phenomena	Cause analysis	Elimination method
1, can not boot or the use of the red light often	low battery	Please charge in time
2, the use of the green light flashing	Idle for 5 seconds or 90 seconds to load shutdown protection	Reboot
3, the use of the green light flashing	Motor lock	Exclude the card after rebooting diehard.
4, leakage	Silicone ring assembly is not in place	Please re install the silicone ring

Reminder:
This product is suitable for all kinds of smart phone charger charging, but also applicable to the charge of the treasure Products to charge, charge a 3 hour, can be fresh fruit juice 10-12 cup, thank you for your use.

Tips

- 1, before juice, please add pure water to clean the cup with a cup of cup, remember to cut the flesh into 1.5*1.5CM small block.
- 2, installed pulp, first the product upside down, first touch switch make the blade rotation, the product can be put juice.
- 3, when the fruit juice can be turned over to stop, you can restart, the use of the process can shake the cup body, juice effect is better.
- 4, Pressing a cup need to squeeze another taste of the juice and directly with a cup cleaning brush cup, never open the machine seat directly for water flushing, the base water will lead to failure and damage.
