PRODUCT SPECIFICATION

Product Name: WPS
Frequency: 900 MHz
Power: 100 mW
Dimensions: 100 mm (L) x 100 mm (W) x 15 mm (H)
Weight: 100 g
Material: ABS
Color: Black
Finish: Matte
Operating Temperature: 0°C to 40°C
Storage Temperature: -20°C to 60°C
Humidity: 10% to 90%
Shock: 1000 g, 10 ms
Vibration: 1000 g, 10 ms
EMC: CE, FCC, RoHS

FUNCTIONAL INSTRUCTIONS

1. Power On:
 Press the power button on the top of the device to turn it on. The device will power on and the LED indicator will light up.

2. Power Off:
 Press the power button on the top of the device to turn it off. The device will power off and the LED indicator will turn off.

3. LED Indicator

The LED indicator on the top of the device will light up when the device is powered on. The LED indicator will blink when the device is in a low battery state.

4. Battery Life

The battery life of the device is approximately 10 hours. The battery life will be shorter if the device is used in a high power mode.

WARNING

1. Do not use the device in a vehicle or while driving.
 Using the device while driving or operating heavy machinery is dangerous and illegal. Do not use the device while driving or operating heavy machinery.

2. Do not use the device in a confined space.
 Using the device in a confined space, such as a car or a small room, can cause the device to overheat. Do not use the device in a confined space.

3. Do not use the device near children.

Do not use the device near children. The device is not intended for use by children.

4. Do not use the device near medical equipment.

Do not use the device near medical equipment. The device may interfere with medical equipment.

5. Do not use the device near flammable materials.

Do not use the device near flammable materials. The device may cause a fire.

6. Do not use the device near water.

Do not use the device near water. The device is not waterproof.

7. Do not use the device near fire.

Do not use the device near fire. The device may catch fire.

8. Do not use the device near power lines.

Do not use the device near power lines. The device may be damaged by power lines.

COMMON MOUNTING STYLE

1. Mounting the device on a wall:
 Drill a hole in the wall and insert the mounting bracket. Attach the device to the mounting bracket.

2. Mounting the device on a desk:
 Attach the device to the mounting bracket. Attach the mounting bracket to the desk.

3. Mounting the device on a ceiling:
 Drill a hole in the ceiling and insert the mounting bracket. Attach the device to the mounting bracket.

4. Mounting the device on a pole:
 Attach the device to the mounting bracket. Attach the mounting bracket to the pole.

5. Mounting the device on a window:
 Attach the device to the mounting bracket. Attach the mounting bracket to the window.

6. Mounting the device on a door:
 Attach the device to the mounting bracket. Attach the mounting bracket to the door.

CHARGING OPERATION

1. Charging the device:
 Connect the charging cable to the device and the power source. The device will charge.

2. Charging the device in a vehicle:
 Connect the charging cable to the device and the vehicle's power source. The device will charge.

3. Charging the device in a power bank:
 Connect the charging cable to the device and the power bank. The device will charge.

PRECAUTIONS

1. Do not use the device in a wet area.
 Using the device in a wet area can cause the device to short out.

2. Do not use the device in a hot area.
 Using the device in a hot area can cause the device to overheat.

3. Do not use the device in a high power area.
 Using the device in a high power area can cause the device to be damaged.

4. Do not use the device in a low power area.
 Using the device in a low power area can cause the device to be damaged.

5. Do not use the device in a high frequency area.
 Using the device in a high frequency area can cause the device to be damaged.

6. Do not use the device in a low frequency area.
 Using the device in a low frequency area can cause the device to be damaged.

7. Do not use the device in a high voltage area.
 Using the device in a high voltage area can cause the device to be damaged.

8. Do not use the device in a low voltage area.
 Using the device in a low voltage area can cause the device to be damaged.

9. Do not use the device in a high current area.
 Using the device in a high current area can cause the device to be damaged.

10. Do not use the device in a low current area.
 Using the device in a low current area can cause the device to be damaged.
