GROWNSY Water-Free bottle warmer

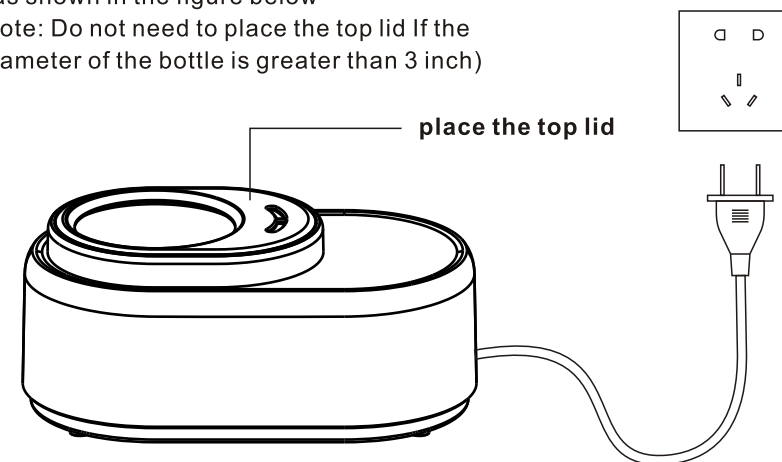

SPECIFICATIONS

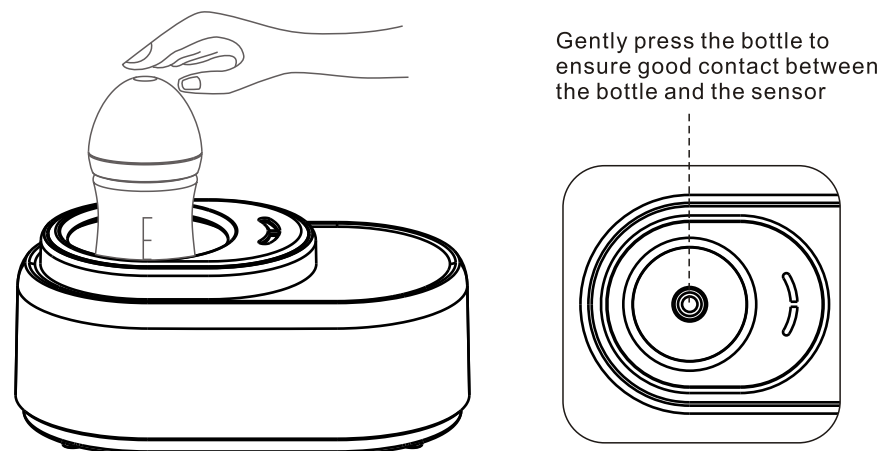

Name	Water-Free bottle warmer
Product Model	ZB-A200
US Version	120V~60Hz
Rate power	230W
Recommended bottle warmer size	Diameter ≤ 80mm/3.15inch
Recommended Material	Glass, plastic, silicone, storage bags
Product Size	8.77×5.11×3.77inch

Instruction

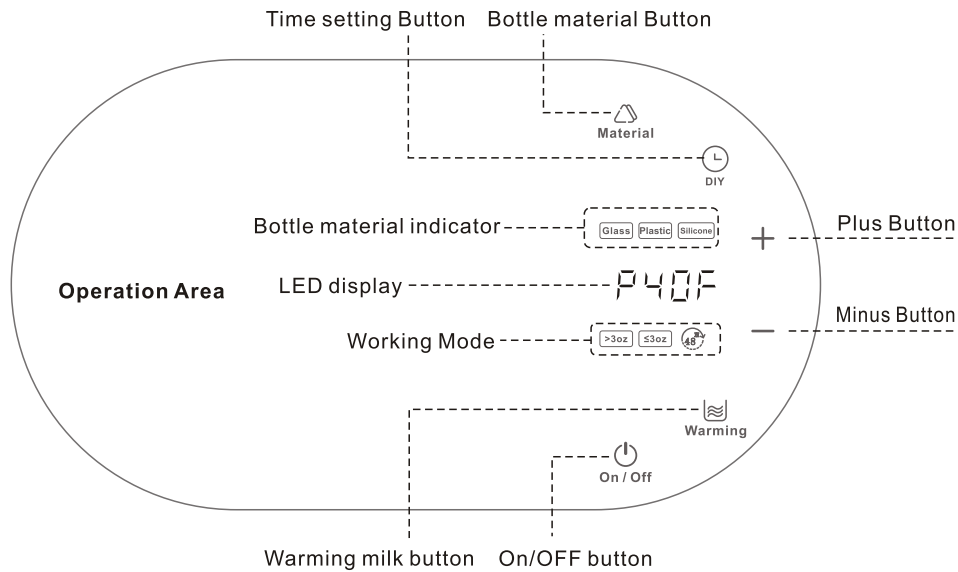

1. Place the top lid on the bottle warmer before use, as shown in the figure below
(Note: Do not need to place the top lid If the diameter of the bottle is greater than 3 inch)

2. Plug in the power and make sure the current is greater than 10A;
3. Place the bottle in the **CENTER** of the warming chamber and gently press the bottle so that the bottom of the bottle can touch sensor. Make sure the bottle is in the center so milk can be evenly heated.

Instruction

- Press the "On/OFF" button to turn on.
- Press the "material" button to select the material of the bottle.
- Press the "Warming" button to select mode.
There are 3 modes: > 3OZ, ≤ 3OZ and 48 hours constant warming
When the milk volume > 3OZ, select > 3OZ
When the milk volume ≤ 3OZ, select ≤ 3OZ
Choose constant warming function If don't need to feed immediately
- Press "+" or "-" to set target temp.
- When the milk is ready, it will "beep" 9 times and will turn to 48 hours keep warm mode automatically.

Instruction

Note: Final temp may vary a little bit due to different ambient temp, milk volume/initial temp and bottle material.

If the milk is not warm enough, you can take the bottle out 1-2 minute later after mode turn to 48H. Milk will reach desired temp and keep warm in this mode.

Always check the temperature before you feed your baby. Gently shake the bottle or milk storage container and check the temperature of the milk by sprinkling a few drops on the inside of your wrist.

- DIY Function:** DIY function is designed for condition when you want to set heating time according to your own wish. Press the DIY button to set heating time, and use "+" or "-" to adjust time, the adjustment range is 5-45 minutes. and it will "beep" 9 times when time is up.

Please also don't forget to choose material when use DIY function.

How to use DIY function

If you are using breastmilk storage bag, Please use DIY function. Reference time setting to reach 98.6°F as below:

Milk volume	Refrigerated	Frozen
1-3oz	5-9 min	10-20 min
3-5oz	9-12min	20-30 min
5-8oz	12-16min	30-40 min

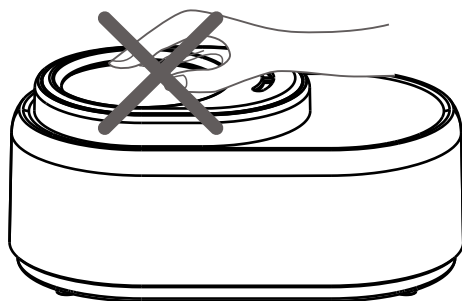

Final temp may vary based on different milk initial temp or room temp. When you find the milk is not warm enough, you can place the bag back into the appliance for extra warming.

Caution: If you leave the bag in the bottle warmer longer then the time indicated in the setting table, the milk may become overheated.

This smart bottle warmer have memory function. It will remember your setting of last time to save your trouble to set again for next warming.

Precautions

- 1) Never add water into this warmer.
- 2) Make sure plug in single-phase source above 10A, and unplug during maintenance and transportation.
