# How to configure the wireless network name (SSID) and wireless password on DWR-U2100 via GUI and D-Link Mobile Connect

WebGUI

1   From the device you want to connect to (smartphones, laptops, or computers). Connect your DWR-U2100 to the Wi-Fi or USB type C cable
    - The SSID will appear as D-Link2G-XXXX or D-Link5G-XXXX
    - The default Wi-Fi password is printed on the label at the back of the device

2   Once connected, open a web browser and type in the URL bar https://192.168.0.1 and hit enter.

3   You will be prompted to enter the username and password to access the router's settings.
    - **Username**: admin
    - **Password**: (printed on the device label)

Note: If you have changed the password and cannot remember it, you will need to perform a hard reset on the router

4   Once logged in, navigate to the **My Wi-Fi** tab, and then **Basic**. Under the 2.4G and 5G wireless fields, you can modify/create a new **SSID (Wireless name)** and **Password (Wireless password)** then hit **Save** to confirm the settings.
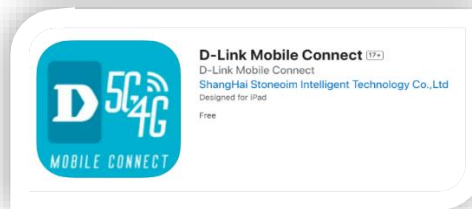

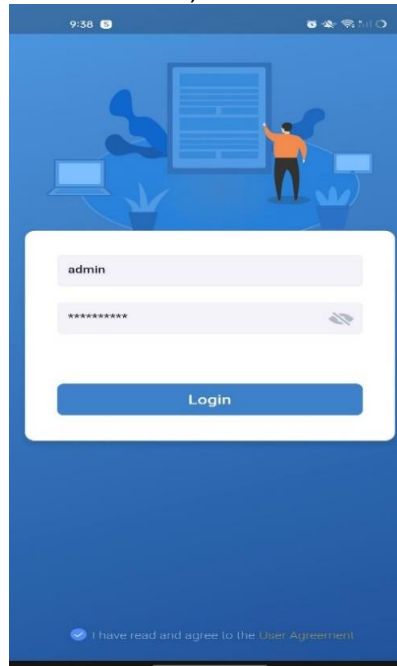

D-Link Mobile Connect App

1. Download and install the **D-Link Mobile Connect** app from your mobile device (App Store for iOS or Google Play Store for Android)

2. Ensure the DWR-U2100 is powered on. On your mobile device, go to **Wi-Fi Settings** and connect to its default Wi-Fi network
   - The default SSID will appear as **D-Link2G-XXXX** or **D-Link5G-XXXX**
   - Wi-Fi password is printed on the label at the back of the device.
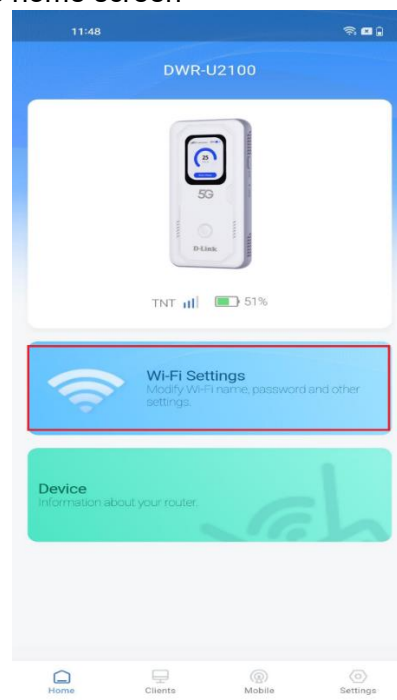

3. Once connected, launch the D-Link Mobile Connect App.

4 You will be prompted to enter the username and password to access the router's settings.
- **Username**: admin
- **Password**: (printed on the device label)

*Note: Please check the box below indicating "I have read and agreed to the **User Agreement**" then tap **Login**.*

5 Tap **Wi-Fi Settings** from the home screen

6   In the 2.4G and 5G Wi-Fi Settings, you have the option to change both the network name and password for your Wi-Fi.

7   After making the changes, press **Confirm** to save and apply.

8   Once you've configured the Wi-Fi settings, wait for the changes to take effect. The router may need a moment to update its settings.

9   After the settings are applied, you can connect your devices to the newly configured Wi-Fi networks using the updated SSID and password.
