### INTRODUCTION

Thank you for purchasing a FIRMAN generator. You have selected a high-quality, precision engineered generator set designed and tested to give you years of satisfactory service. This generator is dual fuel and capable of running on gasoline and liquid petroleum gas (LPG). This generator is not intended to be run unattended or to supply power to life safety support.

This manual contains safety information to make you aware of the hazards and risks associated with generator products and how to avoid them. This generator is designed and intended only for supplying electrical power for operating compatible electrical lighting, appliances, tools and motor loads, and is not intended for any other purpose. It is important that you read and understand these instructions thoroughly before attempting to start or operate this portable generator. Save these original instructions for future reference.

All information in this publication is based on the latest production information available at the time of approval for printing. The manufacturer reserves the right to change, alter or otherwise improve the generator and this documentation at any time without prior notice.

SIGNAL WORDS						
<b>△</b> DANGER	<b>△ WARNING</b>	<b>△</b> CAUTION	NOTICE			
Indicates a hazard which, if not avoided, will result in death or serious injury.	which, if not avoided,		Indicates information considered Important, but not hazard-related.			

Safety Alert Symbol-Indicates a potential personal injury hazard.

Operator's Manual- Failure to follow warnings, instructions and operator's manual could result in death or serious injury.

Toxic Fumes- Engine exhaust contains carbon monoxide, a poisonous gas that will kill you in minutes. You cannot smell it or see it.

Generator could cause electrical shock resulting in death or serious injury.

Fire-Fuel and its vapors are extremely flammable which could cause burns or fire resulting in death or serious injury. Engine exhaust could cause fire resulting in death or serious injury.

 $Hot \, Surface \hbox{-}\, Muffler \, could \, cause \, burns \, resulting \, in \, serious \, injury.$ 

### INTRODUCTION

WARNING! This product can expose you to chemicals including gasoline engine exhaust, which is known to the State of California to cause cancer, and carbon monoxide, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

This outdoor generator can be used to power outdoor items using extension cords. **NOTICE** If you have questions about intended use, contact FIRMAN customer service. This portable generator is designed to be used only with FIRMAN authorized parts.

### **System Ground**

The generator neutral is floating, which means that the AC stator winding is isolated from the grounding fastener and the AC receptacle ground pins. On a floating neutral generator the AC receptacle ground pins are not functional. Electrical devices, such as a ground fault circuit interrupter (GFCI), requiring a functioning AC receptacle ground pin will not operate.

### **Compliance Requirements**

There may be Federal or State regulations, local codes, or ordinances that apply to the intended use of the generator. Consult a qualified electrician, electrical inspector, or the local agency having jurisdiction. This generator is not intended to be used at a construction site or similar activity as defined by NFPA 70-2020 (NEC) section 590.6.

### To Restore Power Using Extension Cords

1. Only use grounded cords marked for outdoor use rated for your loads.

To provide power using extension cords			
Total	Minimum Gauge, Outdoor Rated		
Amperage	<b>Up to 50 FT (15</b> m)		
Up to 13A	6		
Up to 15A	14		
Up to 20A	12		
Up to 30A	10		

- 2. Follow cord safety instructions.
- 3. Install carbon monoxide alarm(s).
- 4. When operating portable generator with extension cords, make sure portable generator is located in an open, outdoor area, at least 20 ft. (6 m) from occupied spaces with exhaust pointed away.
- 5. Extension cords running directly into your home, powering indoor items IS NOT RECOMMENDED.

DANGER! Engine exhaust contains carbon monoxide, a poisonous gas that will kill you in minutes. You cannot smell it, see it, or taste it. Even if you do not smell exhaust fumes, you could still be exposed to carbon monoxide gas.

- Extension cords running directly into the home increase your risk of carbon monoxide poisoning through any openings.
- If an extension cord running directly into your home is used to power indoor items, the operator recognizes that this increases the risk of CO poisoning to people inside the home and assumes that risk.

### **FEATURES AND CONTROLS**

- 1- Fuel Gauge
- 3- Fuel Cap
- 4- Choke Lever(behind air filter box) 12- Control Panel
- 5- Air Filter
- 6-208cc FIRMAN OHV Engine
- 7- Recoil Starter
- 8-8.0"(20.3cm) Flat Free Wheel

- 9-Oil Filler Cap
- 2-5.0 Gallon(19L) Capacity Fuel Tank 10-LPG Hose Connector(Inlet)
  - 11- Outlet Cover

  - 13- Handle
  - 14- Hose Holder
  - 15-LPG Hose with Regulator
  - 16- Data Decal/Series Number

<sup>\*</sup>We are always working to improve our products. Therefore, the enclosed product may differ slightly from the image on this page.

### FEATURES AND CONTROLS

# **A DANGER**

Monoxide alarms inside home.

Tampering with the CO ALERT system will cause Carbon Monoxide poisoning, Install Carbon

Generator could cause electrical shock. . Do not run indoors to avoid wet conditions. . Do not run in rain or wet weather.

Hot exhaust gases could cause fires. Keep at least 5ft. (1.5m)

clearance from any combustibles or structures, incluing overhead.

# JGRO

El incumplimiento de las advertencias, las instrucciones y el manual del operador provocará la muerte o lesiones graves.

envenenamiento por monóxido de carbono. Instale detectores de Monóxido de Carbono dentro de su casa.

El generador podría producir una descarga eléctrica. No utilice en interiores para evitar condiciones de

humedad. No utilice en la

Iluvia o en condiciones de

humedad.

Los gases calientes de salida podrían causar incendios. Manténgase a una distancia mínima de 1,5m de cualquier combustible o estructura incluyendo lugares elevados.

PELIGRO

Utilizar un generador en interiores PUEDE PROVOCARLA

Le non-respect des avertissements, des instructions et du manuel de l'opérateur entraînera la mort ou des blessures graves.

Toute altération du système D'ALERTE du monoxyde de carbone causera un empoisonnement au monoxyde de carbone. Installez des détecteurs demonoxyde de carbone à l'intérieur de la maison

La génératrice pourrait provoquer un choc électrique • Ne faites pas fonctionner à l'intérieur pour éviter les conditions humides • Ne faites pas fonctionner sous la pluie ou par temps pluvieux.

Les gaz d'échappement chauds peuvent provoquer des incendies. Gardez au moins 5 pi (1,5 m) de dégagement de tout comb-ústible ou de toute structure, v compris au-dessus.

### DANGER

Using a generator indoors CAN KILL YOU IN MINUTES. Generator exhaust contains carbon monoxide This is a poison you cannot see or smell

NEVER use inside a home or garage, EVEN IF doors

and windows are open

Only use OUTSIDE and far away from windows.

No utilice NUNCA el gen-erador en el interior de su hogar ni enun garaje, NI SIQUIERA con las puertas y ventanas abiertas.

Utilice sólo AL AIRE LIBRE y lejos de ventanas, puertas y orificios de

1⊞

ventilación.

### 🛕 DANGER

Utiliser un générateur à l'intérieur PEUT VOUS TUER EN QUELQUES MINUTES. Les gaz d'échappement du nérateur contiennent du monoxyde de carbone. Čeci est un poison que vous ne pouvez ni voir ni sentir.

et ouvertures.

À n'utiliser qu'à L'EXTÉRIEUR et à distance de toutes fenêtres, portes

### NOTICE **AVISO AVIS**

malformations congénitales et autres problèmes de reproduction. Pour plus d'informations, visitez www.P65Warnings.ca.gov.

### **▲ WARNING**

Liquid Petroleum gas (LPG) is extremely flammable which could cause burns or fire resulting in death or serious injury If you smell gas, close tank valve and call qualified plumber. Do not place LPG source in the path of muffler outlet

### **AADVERTENCIA**

El Gas Licuado de Petróleo (GLP) es extrmada-mente inflamable, lo que puede causar quemaduras o incendios resultantes en la muerte o lesiones graves. Si huele gas, cierre la válvula del tanque íame a un plomero calificado. No coloque la fuente de GLP en la trayectoria de salida del silenciador.

A AVERTISSEMENT

Le gaz de pétrole liquide (GPL) est extrêmement Inflammable et pourrait causer des brûlures ou un incendie entraînant la mort ou des blessures graves. Si vous sentez une odeur de gaz, fermez le robinet du éservoir et appelez un plombier qualifié. Ne placez pas la source de GPL dans la traiectoire de la sortie du silencieux

# **▲ WARNING**

resulting in serious injury.|quemaduras resultando en Do not touch hot parts Avoid hot exhaust gases

Muffler could cause burns El silenciador podría causar una lesión grave.

 No toque las partes calientes Evite los gases de escape calientes

# **▲ AVERTISSEMEN**

Le silencieux peut causer des brûlures et des blessures graves. Ne pas toucher aux pièces chaudes. Éviter les gaz d'échappement chauds.

### WARNING

This is a NEGATIVE PRESSURE REGULATED gas control. Replace ONLY with the same model number. Carbon monoxide poisoning. fire or explosion could result from improper control replacement.

**ADVERTENCIA** 

Este es un control de gas de PRESIÓN NEGATIVA REGULADA. Reemplace UNICAMENTE con el mismo número de modelo. El

envenenamiento por monóxido de carbono, incendio o explosión podrían ser el resultado de un reemplazo inadecuado del controlador.

**AVERTISSEMENT** Ceci est un contrôle de gaz À

PRESSION NÉGATIVE RÉGULÉE, Remplacez UNIQUEMENT par le même numéro de modèle. Un

empoisonnement au monoxyde de carbone, un incendie ou une explosion pourrait résulter d'un remplacement inadéquat du contrôle.

### **FEATURES AND CONTROLS**

### **Control Panel**

NOTICE Total power drawn from all receptacles must not exceed the data decal rating.

- 1. Fuel Selector Switch Use to select and turn on gasoline or LPG fuel source. Fuel (gasoline) valve is closed when the switch is on "OFF" or "LPG" positions. Engine switch is on when the switch is on "GAS" or "LPG" positions.
- 2. Indicator Light When the fuel selector switch is turned to the "GAS" or "LPG" position, the indicator light will become RED up to 4 minutes(before goes off). Starting the engine successfully during these 4 minutes will turn the indicator light GREEN. You must have a solid red indicator light to be able to start the generator. The generator cannot be started during battery power saving mode unless the fuel selector switch is turned to the "OFF" position and then turned back to the "GAS" or "LPG" position.

See Indicator light-Battery power Saving Mode section for more information.

3. Circuit Breakers - The receptacles are protected by AC circuit protectors. If the generator is overloaded or an external short circuit occurs, a circuit protector may trip. If tripping occurs, disconnect all electrical loads and determine the cause before attempting to continue using the generator. Reset any tripped circuit protectors.

If multiple receptacles are used at the same time, the total current must be kept with-in the portable generator data decal rating.

- 4. 3-1 Data-Minder (Multi-Meter) Push the SELECT button to show the Voltage, Hertz and running hours.
- 5. 120V, 20A Duplex NEMA 5-20R (Not GFCI protected)

A maximum of 20 Amps current may be drawn from this duplex receptacle.

6. 120V, 30A RV - NEMA TT-30R

A maximum of 30 Amps current may be drawn from this receptacle.

- 7. **Ground Terminal** Consult an electrician or authority having jurisdiction for local grounding requirements.
- 8. 120V, 30A Twist Lock NEMA L5-30R

A maximum of 30 Amps current may be drawn from this receptacle.

- 9. Outlet Cover Protects the receptacles from dust and debris.
- 10. LPG Hose Connector(Inlet) Used to connect LPG hose to generator.
- 11. CO Alert™ Carbon Monoxide (CO) Shutdown Indicator Light Indicates the engine shutdown due to carbon monoxide accumulation around the generator or a CO Alert system fault occurred.

### 1.Location

DANGER! Engine exhaust contains carbon monoxide, a poisonous gas that could kill you in minutes. You CANNOT smell it, see it, or taste it. Even if you do not smell exhaust fumes, you could still be exposed to carbon monoxide gas.

- Operate portable generator only outdoors, at least 20 ft.(6 m) from occupied spaces with exhaust pointed away to reduce the risk of carbon monoxide accumulating.
- Install battery-operated carbon monoxide alarms or plug-in carbon monoxide alarms with battery back-up according to the manufacturer's instructions. Smoke alarms cannot detect carbon monoxide gas.
- Do not run this portable generator inside homes, garages, basements, crawlspaces, sheds, or
  other partially-enclosed spaces even if using fans or opening doors and windows for ventilation.
   Carbon monoxide can quickly build up in these spaces and can linger for hours, even after this
  product has shut off.
- If you start to feel sick, dizzy, weak or your home's carbon monoxide alarm sounds, get to fresh air right away. Call emergency services. You may have carbon monoxide poisoning.

### Carbon Monoxide Alarm(s)A

Install carbon monoxide alarms inside your home. Without working carbon monoxide alarms, you will not realize you are getting sick and dying from carbon monoxide poisoning.

To better educate yourself about all carbon monoxide risks, go to www.takeyourgeneratoroutside.com.A

### **Reduce Risk of Fire**

**WARNING!** Exhaust heat/gases could ignite combustibles, structures or damage fuel tank causing a fire, resulting in death or serious injury.

- Keep portable generator at least 5 ft. (1.5 m) from any structure, trees or vegetation over 12 in. (30 cm) in height.
- Select an outdoor site that is dry and protected from the weather. Do not move portable generator indoors to protect it from the weather.
- Do not locate the portable generator under a deck or other similar structure that may confine heat and airflow.

# 2. Oil and Gasoline

# **Add Engine Oil**

We recommend using FIRMAN SAE 10W-30 API SJ oil for best performance. Other high-quality detergent oils (API SJ or higher) are acceptable. Do not use special additives. Ambient temperature determines the proper oil viscosity for the engine. Use the chart to select the proper oil for the outdoor temperature range expected.

**NOTICE** Do not attempt to crank or start the engine before it has been properly filled with the recommended type and amount of oil. Damage due to operation with no oil will void your warranty.

- 1. Place generator on a flat, level surface.
- 2. Clean area around oil fill and remove yellow oil fill cap/dipstick.
- 3. Wipe dipstick clean.

### **OPERATION**

4. Using oil funnel, slowly pour contents of provided oil bottle into oil fill opening until oil reaches upper limit "H" mark on the dipstick. Be careful not to overfill. Overfilling could cause engine starting problems or engine damage.

5.Replace oil fill cap/dipstick and fully tighten.

6.Oil level should be checked prior to each use or at least every 8 hours of operation. Keep oil level maintained.

### Low Oil Shutdown

The portable generator is equipped with a low oil shutdown. If the oil level drops below the minimum required level, a sensor will activate an internal switch stopping the engine. If the engine shuts off and the oil level is within specifications, check to see if generator is sitting at an angle. Place portable generator on an even surface to correct this. If engine fails to start, the oil level may not be high enough to deactivate the internal low oil level switch. Make sure the sump is completely full of oil to the upper limit (H). Do not operate engine until oil level issue is corrected. Contact Firman customer service.

### Add Gasoline

**WARNING!** Fuel and its vapors are extremely flammable which could cause burns or fire resulting in death or serious injury.

- Turn generator engine OFF and let it cool at least 2 minutes before removing fuel cap.
- Do Not refuel or move generator when engine is running.
- Move generator outdoors prior to adding or draining fuel
- Keep fuel away from any ignition sources.
- Do not overfill tank, allow space for fuel expansion.
- If any fuel spills, wait until it evaporates before starting engine
- Check and replace fuel lines, tank, cap, and fittings prior to each use if any damage or leaks are found.

Fuel must meet these requirements:

- Clean, fresh, unleaded gasoline with a minimum of 87 octane.
- For high altitude use, see Operation at High Altitude.
- Gasoline with no more than 10% ethanol is acceptable.

**NOTICE** Do not mix oil in gasoline or modify engine to run on alternate fuels not described in this manual. Use of unapproved fuels could damage engine and will not be covered under warranty.

- 1. Clean area around fuel fill cap, remove cap.
- 2. Slowly add unleaded fuel to fuel tank. Be careful not to fill above the RED fuel level indicator. This allows adequate space for fuel expansion.

3. Install fuel cap and let any spilled fuel evaporate before starting engine.

# **Operation at High Altitude**

At altitudes over 5,000 feet(1524 meters), a minimum 85 octane gasoline is acceptable. Engine power and generator output will be reduced approximately 3.5% for every 1000 feet (305 m) of elevation above sea level. High altitude may cause hard starting, increased fuel consumption and sparkplug fouling. To operate at high altitudes FIRMAN can provide a high altitude carburetor main jet. The alternative main jet and installation instructions can be obtained by contacting Customer Support.

	208cc	Altitude
Altitude main jet 1	335717004	3000-6000Feet (914-1828 m)
Altitude main jet 2	335717005	6000-8000Feet (1828 - 2438 m)

**NOTICE** Operation using an alternative main jet at elevations lower than the recommended minimum altitude can damage the engine. For operation at lower elevations, the standard main jet supplied must be used. Operating the engine with the wrong main jet may increase exhaust emissions, fuel consumption and reduce performance.

# Operation at High Ambient conditions

Your Firman Power Equipment product is designed and rated for continuous operation at ambient temperatures up to  $104^{\circ}F$  ( $40^{\circ}C$ ). The generator may be operated at temperatures ranging from  $5^{\circ}F(-15^{\circ}C)$  to  $122^{\circ}F(50^{\circ}C)$  for short periods. If the generator is exposed to temperatures outside this range during storage, the generator should be brought back within this range before operation. When operated above  $77^{\circ}F(25^{\circ}C)$  there may be a decrease in power. Maximum wattage and current are subject to and limited by such factors as ambient temperature, altitude, engine conditions etc.

# **Connecting LPG Fuel**

 $WARNING!\ Liquid\ Petroleum\ gas\ (LPG)\ is\ extremely\ flammable\ which\ could\ cause\ burns\ or\ fire\ resulting\ in\ death\ or\ serious\ injury.$ 

- Do not place the LPG sources in the path of muffler outlet or near any ignition source.
- Keep a fire extinguisher near the generator all the time.
- Do not use or store LPG portable sources not in use near generator or in a building, garage or enclosed area.
- All LPG supply lines must be installed by a qualified plumber.
- If you smell gas, close off all gas sources and contact a qualified plumber to inspect and repair the LPG system.
- Prior to each days first use spray a soapy water solution on LPG fuel connections to check for leaks.
- Never use a gas container, LPG connector hose, LPG cylinder that appears to be damaged.
- Do not connect or disconnect the LPG source in an enclosed area.
- LPG is heavier than air and can accumulate in confined / low spaces if there is a leak.

**NOTICE** LPG system must be installed and used in strict conformance with NFPA 58 (Liquefied Petroleum Gas Code), NFPA 54 (National Fuel Gas Code), manufacturers recommendations, and comply with the authority having jurisdiction requirements. To connect your generator to a large propane tank or Natural Gas Supply, contact your gas equipment company or authority having jurisdiction to assure that you are following all required codes and regulations.

- Always keep the LPG cylinder in an upright position.
- Use only DOT LPG cylinders in vapor service with type 1, right hand ACME threads. Verify the re-qualification date on the cylinder has not expired.
- All new cylinders must be purged of air and moisture prior to filling. The purging process should be done by your propane gas supplier.

Attach the LPG regulator hose assembly (included) to the LPG hose connector (inlet) on the control panel of the generator. Tighten the nut with a 19 mm or adjustable wrench. Remove the safety plug or cap from the LPG cylinder valve. Attach the LPG regulator to the cylinder valve. Do not use a wrench to tighten LPG cylinder nut. Tighten the nut by hand clockwise to a positive stop. Using a wrench may damage LPG cylinder components.

# Indicator light - Battery Power Saving Mode

This generator is equipped with an electronic module which consumes battery power. When the main fuel selector switch is turned to the GAS or LPG position, the indicator light will turn RED for up to 4 minutes (before going off). Starting the engine successfully anytime during the 4 minutes will turn the indicator light GREEN. If portable generator is not started during this 4-minute period the portable generator will switch to Battery Power Saving Mode to conserve battery life.

**NOTICE** Your portable generator is equipped with an internal battery charger that will properly charge the battery only when the engine is running.

The generator cannot be started in Battery Power Saving Mode. Turn main fuel selector switch to the off position and back to the GAS or LPG position to reset the RED indicator 4-minute electronic module.

# 3. Starting the Generator on Gasoline

- 1. Before starting the generator, check for loose or missing parts and for any damage which may have occurred during shipment. Ensure spark plug, muffler, fuel cap, and air cleaner are all in place.
- 2. Move portable generator outdoors to safe operating location at least 20 feet from any occupied spaces.
- 3.If connected make sure the LPG cylinder knob is fully closed or disconnected.

4. Turn the fuel selector switch to "GAS" position.

**NOTICE** When the fuel selector switch is turned to the GAS position, the indicator light will turn RED for up to 4 minutes (before going off). Starting the engine successfully anytime during the 4 minutes will turn the indicator light GREEN. See Indicator light-Battery Power Saving Mode section for more information.

5. Disconnect all electrical loads from the generator. Never start or stop the generator with electrical devices plugged in.

6. Move choke lever located on engine to "START" position. You do not need to choke a warm engine. (For electric start move to step (8))

7. Pull the starter cord slowly until resistance is felt and then pull rapidly to start engine.

8. Do not over-choke. As soon as engine starts and warms up, slowly move the choke lever to the RUN position.

9. Allow portable generator to run at no load for a few minutes to stabilize before plugging in any electrical devices.

**NOTICE** If engine starts but fails to run, or if portable generator shuts down during operation, check oil level. See Low Oil Shutdown section for more information.

# 4. Starting the Generator on LPG

- 1. Before starting the generator, check for loose or missing parts and for any damage which may have occurred during shipment. Ensure spark plug, muffler, fuel cap, and air cleaner are all in place.
- $2.\ Move portable\ generator\ outdoors\ to\ safe\ operating\ location\ at\ least\ 20\ feet\ from\ any\ occupied\ spaces.$
- 3. Connect the LPG hose with regulator to both LPG cylinder and portable generator LPG Hose Connector (inlet).

4. Fully open the LPG cylinder knob.

5. Turn the fuel selector switch to LPG position.

**NOTICE** When the fuel selector switch is turned to the LPG position, the indicator light will turn RED for up to 4 minutes (before going off). Starting the engine successfully anytime during the 4 minutes will turn the indicator light GREEN.

See Indicator light-Battery Power Saving Mode section for more information.

6. Disconnect all electrical loads from the generator. Never start or stop the generator with electrical devices plugged in.

7. Move choke lever located on engine to "START" position.

8. PULL-TO-PRIME Pull the starter cord 1-2 times. Pull slowly until resistance if felt and then pull rapidly.

9. Move the choke lever to the "RUN" position.

10. PULL-TO-RUN: Pull the starter cord slowly until resistance if felt and pull rapidly to run the un

If the engine fails to start in 1-2 pulls with choke in the "RUN" position, then move choke lever to "START" position and repeat the "PULL-TO-PRIME" step.

11. Allow portable generator to run at no load for a few minutes to stabilize before plugging in any electrical devices.

**NOTICE** If engine starts but fails to run, or if portable generator shuts down during operation, check oil level. See **Low Oil Shutdown** section for more information.

**NOTICE** Observing frost on LPG cylinder and regulator is common during operation and normally is not an indication of a problem. In unusual situations this frost may eventually restrict the flow of LPG gas to the generator resulting in deteriorating performance. In these rare situations it can be helpful to:

- Exchanging fuel cylinders to allow the first cylinder to warm up, repeating as necessary.
- Placing the LPG cylinder at the end of the generator near the handle, where engine fan air flows out from the generator. This air is slightly heated by air flowing over the engine.
- Do not place the LPG cylinder in the path of the muffler exhaust outlet.

 The LPG cylinder and components can be temporarily warmed by pouring warm water over them.

# 5. Connecting Electrical Loads

This portable generator has been pretested and adjusted to handle its full capacity. The voltage is regulated using an automatic voltage regulator (AVR). Readjusting the AVR will void warranty.

WARNING! Generator voltage could cause electrical shock or burn resulting in death or serious injury.

- Damaged or overloaded extension cords could overheat, arc, and burn resulting death or serious injury.
- Use a ground fault circuit interrupter (GFCI) in any damp or highly conductive area, such as metal decking.
- Do not touch bare wires or receptacles.
- Do not use generator with electrical cords which are worn, frayed, bare or otherwise damaged.
- Do not operate generator in the rain or wet weather.
- Do not run indoors to avoid wet conditions.
- Do not handle generator or electrical cords while standing in water, while barefoot, or while hands or feet are wet.
- 1. Ensure circuit breaker on control panel is in the closed (on) position.
- 2. Start the generator with no electrical load attached.
- 3. Allow the engine to run for several minutes to stabilize.
- 4. Plug in and turn on the first item. It is best to attach the item with the largest load first.
- 5. Allow the engine to stabilize.
- 6. Plug in and turn on the next item.
- 7. Allow the engine to stabilize.
- 8. Repeat steps 5-6 for each additional item.

### **Surge Protection**

There is a remote chance that voltage fluctuations may impair the proper functioning of some sensitive electronic equipment. Electronic devices, including computers and many programmable appliances may use components that are designed to operate within a narrow voltage range and may be affected by the portable generator's momentary voltage fluctuations. While there is no way to prevent all voltage fluctuations, you can take steps to protect your sensitive electronic equipment. Install a plug-in surge suppressor on the receptacles feeding your sensitive equipment. Surge suppressors come in single or multi-outlet styles. They are designed to protect against short duration voltage fluctuations.

# **OPERATION**

# CO Alert<sup>™</sup>

### Carbon Monoxide (CO) Shutdown System

CO Alert automatically shuts down the engine when harmful levels of carbon monoxide accumulate around the generator or a CO Alert fault occurs. After shutdown, the CO Alert indicator light will blink for at least five minutes per the chart below.

CO Alert DOES NOT replace carbon monoxide alarms.

Install battery-powered carbon monoxide alarm(s) in your home. Don't run generator in enclosed areas.

Color	Description
Carbon monoxide accumulated around generator to restart move generator to an open, outdoor 20 ft. (6 m) from occupied spaces with exhaust por away. Air out premises (open windows and doors) is reoccupying property. Automatic shutoff is an indiagenerator was improperly located.  If you start to feel sick, dizzy, weak, or your homes monoxide alarm sounds while using this product,	If you start to feel sick, dizzy, weak, or your homes carbon monoxide alarm sounds while using this product, get to fresh air right away. Call emergency services. You may
Yellow ●● ●●	

 $<sup>\</sup>star$ Yellow light will blink for five seconds at the startup of generator to show CO ALERT is functioning properly.

# 6. Stopping the generator

1. Turn off and remove all electrical loads. Never stop the generator with electrical devices plugged in and turned on. Never stop the engine by moving the choke to the start position.

Let the generator run at no-load for one minute to stabilize internal temperatures of the engine and generator.

2. Turn the fuel selector switch to OFF (O) position.

3. Fully close the LPG cylinder knob.

### **MAINTENANCE SCHEDULE**

ITEM	NOTES	Daily (Before operation)	Initial 25 hours	Every 50 hours	Every 100 hours (or annual)	Every 250 hours
Spark Plug	Check condition. Adjust gap and clean. Replace if necessary.				√	
Engine Oil	Check oil level.	√				
Engine Oil	Replace.		√		√	
Air Filter	Clean, replace if necessary.			√		
Fuel	Clean fuel tank strainer. Replace if necessary.				<b>√</b>	
Fuel Line	Check fuel hose for cracks or other damage. Replace if necessary.	<b>√</b>				
LPG Regulator /Hose Assy.	Check for damage and leaks. Replace if necessary.	√				
Exhaust	Check for leakage. Retighten or replace gasket if necessary.	√				
System	Check spark arrester screen. Clean/Replace if necessary.				√	
Engine	Check adjust valve clearance.*					√
	Clean combustion chamber.*					<b>√</b>
Fittings/ Fasteners	Check. Replace if necessary.				<b>√</b>	

<sup>\*</sup> To be performed by knowledgable/experienced owner or by authorized service center.

### **General Recommendations**

Regular maintenance will improve the performance and extend the life of the generator. See any authorized dealer for service.

The generator's warranty does not cover items that have been subjected to operator abuse or negligence. To receive full value from the warranty, the operator must maintain the generator as instructed in this manual.

Some adjustments will need to be made periodically to properly maintain your generator. All service and adjustments should be made at least once each season. Follow the requirements in the maintenanc shedule chart above.

**NOTICE** Once a year you should clean or replace the spark plug and replace the air filter. New spark plugs and clean air filter assure proper fuel-air mixture and help your engine run at peak performance and last longer.

# When Transporting Generator

Transport with fuel tank EMPTY or with fuel valve in OFF position. Do not tip generator at an angle which causes fuel to spill. Disconnect LPG regulator assembly and securely stow away.

# **ENGINE MAINTENANCE**

To prevent accidental starting, remove and ground spark plug wire before performing any service.

# **Change Engine Oil**

Change engine oil every 100 hours. (for a new engine, change oil after 25 hours.) If you are using your generator under extremely dirty or dusty conditions, or in extremely hot weather change the oil more often.

CAUTION! Avoid prolonged or repeated skin contact with used motor oil. Used motor oil has been shown to cause skin cancer in certain laboratory animals. Thoroughly wash exposed areas with soap and water.

KEEP OUT OF REACH OF CHILDREN. DON'T POLLUTE. CONSERVE RESOURCES. RETURN USED OIL TO COLLECTION CENTERS.

(a) On a level surface drain oil into a suitable container by removing the drain plug and the oil filler cap while the engine is warm.

(b) Reinstall the drain plug and fill the engine with oil until it reaches the HIGH(H) level on the oil filler dipstick.

**NOTICE** We recommend using FIRMAN SAE 10W-30 API SJ oil for best performance. Other high-quality detergent oils (API SJ or higher) are acceptable. See *Oil and Gasoline* 

# Maintenance - Storage

# Air Filter Maintenance

(a) Carefully remove foam air filter element and wash it with liquid detergent and water only. Squeeze dry in a clean cloth.

(b) Saturate foam air filter element with clean engine oil and squeeze in a clean cloth to remove excess oil.

(c) Reinstall clean or new air filter element.

# **Spark Plug Maintenance**

Changing the spark plug will help your engine start easier and run at peak performance.

- (a) Remove the spark plug boot.
- (b) Remove spark plug using provided wrench.

- A- Spark plug B- Spark plug boot
- (c) Inspect spark plug for damage and clean with a wire brush before reinstalling. Replace if damaged.
- (d-1) For spark plug FIRMAN P/N 330723001 Adjust the electrode gap to 0.020 0.024 in. (0.5 0.6 mm).
- (d-2) For spark plug CHAMPION N9YC Adjust the electrode gap to 0.028 0.031 in. (0.7 0.8 mm).
- (e) Seat spark plug in position and thread by hand to prevent cross threading.
- (f) Tighten plug with provided wrench and put the spark plug boot back on spark plug.

SPARK PLUG: FIRMAN P/N 330723001

SPARK PLUG: CHAMPION N9YC

SPARK PLUG: FIRMAN P/N 330723001 or CHAMPION N9YC

# **Maintenance Valve Clearance**

Intake: 0.004 - 0.006 in. (0.10 - 0.15 mm) Exhaust: 0.004 - 0.006 in. (0.10 - 0.15 mm)

# **Muffler and Spark Arrester**

WARNING! Contact with muffler area could cause burns resulting in serious injury.

- Do not touch hot parts.
- It is a violation of California Public Resource Code, Section 4442, to use or operate the engine on any forest-covered, brush-covered, or grass-covered land unless the exhaust system is equipped with a spark arrester, as defined in Section 4442, maintained in effective working order. Other states or federal jurisdictions may have similar laws, reference Federal Regulation 36 CFR Part 261.52.

# Maintenance - Storage

### **Inspect Muffler and Spark Arrester**

- 1.Inspect the muffler for cracks, corrosion, or other damage.
- 2.Remove the screws securing the spark arrester in place and the remove it from muffler.

3. Carefully remove the carbon deposits from the spark arrester screen with a wire brush.

- 4. Replace the spark arrester if it is damaged. If replacement parts are required, make sure to use only FIRMAN original equipment replacement parts.
- 5. Position the spark arrester in the muffler and attach with the screws.

NOTICE Failure to clean or replace spark arrester may result in decreased engine performance.

# **GENERATOR MAINTENANCE**

Run the generator at least 30 minutes every month.

Make certain that the portable generator is kept clean and dry.

Do not expose the unit to excessive dust, dirt, moisture or corrosive vapors.

Do not insert any objects through cooling slots.

Before each use inspect underneath the generator for signs of oil or fuel. Clean any accumulated debris. Keep area around muffler free from any debris. Use a soft bristle brush to remove dirt or caked on oil. Use a damp cloth to clean all exterior surfaces.

# **Battery Replacement**

- 1. Disconnect the negative (-) black battery cable first from the (-) battery terminal, then the red positive (+) cable from the (+) battery terminal.
- 2. Remove the battery holder band.
- 3. Remove the battery and recycle.
- 4. Install the new battery with following specification:
  - 12V sealed lead acid 2.5AH
  - LXWXH:3.15X2.75X4.13 in. (80X70X105mm)
- 5. Reattach the battery holder band.
- 6. Connect the red positive(+) battery cable to the battery first.
- 7. Connect the black negative(-) battery cable to the battery second.

# **Battery Charging**

The battery powers the control module. This portable generator is equipped with an automatic battery charging circuit. The battery will receive charging voltage only when the engine is running. The battery will maintain a proper charge if the portable generator is used on a regular basis (about once every two weeks). If it is used less frequently, the battery should be connected to a trickle charger (not included) or battery maintainer (not included) to keep the battery properly charged.

# Maintenance - Storage

# **Long Term Storage**

It is important to prevent gum deposits from forming in essential fuel system components such as the carburetor, fuel hoses or tank during storage. Alcohol-blended fuels (called gasohol, ethanol or methanol) attract moisture, which leads to separation and formation of acids during storage. Acidic gas can damage the fuel system of an engine while in storage.

When the generator set is being stored for more than one month, follow these instructions to avoid engine problems:

**WARNING!** Fuel and its vapors are extremely flammable which could cause burns or fire resulting in death or serious injury.

Do not store fuel near any ignition sources.

When draining fuel move generator outdoors and use a commercially available non-conductive vacuum siphon. Fuel must be drained into an approved container.

- 1-Treat any stored fuel with fuel stabilizer.
- 2-When storing generator with gasoline in fuel tank, operate the engine for 5-10 minutes to circulate treated fuel into fuel lines and carburetor before shutdown.
- 3- There is no need to drain gasoline from the generator fuel tank if fuel stabilizer is added.
- 4-FUEL STARVATION: If you elect to drain fuel tank move generator outdoors. Once fuel tank is drained turn fuel selector switch to GAS position. Start and run the portable generator outdoors until engine stops from lack of gasoline. This will drain remaining gasoline from tank, fuel lines, and carburetor.
- 5-Always turn fuel selector switch to OFF position prior to storage.
- 6-Allow the portable generator to cool before cleaning and storage.
- 7-Change oil.
- 8-Remove spark plug boot and spark plug. Pour about one teaspoon of engine oil through the spark plug hole, then slowly pull the recoil starter several times to distribute the oil in the cylinder. Reinstall the spark plug and attach the spark plug boot. Pull recoil slowly until resistance is felt. This will close the valves so no moisture enters the engine cylinder.
- 9-Cover the portable generator and store in a clean, dry place out of direct sunlight and away from any ignition sources.

Any damage or hazards caused by using improper fuel, improperly stored fuel, and/or improperly formulated stabilizers, are not covered by manufacturer's warranty.

Do not store gasoline from one season to another season.

# **Troubleshooting - Specifications**

Problem	Cause	Correction
Engine is running, but no AC output is available.	<ol> <li>Circuit breaker is open.</li> <li>Fault in generator.</li> <li>Poor connection or defective cord set.</li> <li>Connected device is bad.</li> </ol>	Reset circuit breaker.     Contact authorized service facility.     Check and repair.     Connect another device that is in
Engine runs good at no-load but "bogs down" when loads are connected.	1. Short circuit in a connected load. 2. Engine speed is too slow. 3. Shorted generator circuit. 4. Clogged or dirty fuel filter.	good condition.  1. Disconnect shorted electrical load. 2. Contact authorized service facility. 3. Contact authorized service facility. 4. Clean or replace fuel filter.
	1. Fuel selector switch set to OFF (O) position. 2. The indicator light is OFF or flashing red. 3. Low oil level.	1. Set fuel selector switch to "GAS" or "LPG" position. 2. Must have solid red indicator light to be able to start the engine. 3. Fill crankcase to proper level or place generator on level surface
Engine will not start; starts and runs rough or shuts down when running.	<ol> <li>Dirty air cleaner.</li> <li>Out of gasoline.</li> <li>Stale gasoline.</li> <li>Spark plug wire not connected to spark plug.</li> <li>Bad spark plug.</li> </ol>	4. Clean or replace air cleaner. 5. Fill fuel tank with gasoline. 6. Drain fuel tank and carburetor; fil with fresh gasoline. 7. Connect wire to spark plug. 8. Replace spark plug.
	<ol> <li>Water in gasoline.</li> <li>Flooded.</li> <li>Excessively rich fuel mixture.</li> <li>Clogged or dirty fuel filter.</li> <li>Starting battery may have insufficient charge.</li> </ol>	<ol> <li>9. Drain gas tank and carburetor; fill with fresh gasoline.</li> <li>10. Wait 5 minutes and re-crank engine</li> <li>11. Contact authorized service facility.</li> <li>12. Clean or replace fuel filter.</li> <li>13. Check battery output and charge battery as necessary.</li> </ol>
	<ul><li>14. Out of LPG.</li><li>15. LPG cylinder knob is not open.</li><li>16. Out of battery power.</li></ul>	<ul> <li>14. Replace LPG cylinder.</li> <li>15. Fully open LPG cylinder knob.</li> <li>16. Start Engine in "GAS" position. Charge or replace battery.</li> </ul>
Engine lacks power.	1. Load is too high. 2. Dirty air filter. 3. Clogged or dirty fuel filter. 4. Clogged spark arrester.	Don't Overload Generator     Replace air filter.     Clean or replace fuel filter.     Clean or replace spark arrester.
Engine"hunts"or falters.	Carburetor is running too rich or too lean.     Clogged or dirty fuel filter.	Contact authorized service facility.     Clean or replace fuel filter.
Engine shuts down when running.	Out of gasoline or LPG.     Dirty air cleaner.     Low oil level.	Fill fuel tank with gasoline or replace LPG cylinder.     Clean or replace air cleaner.     Fill crankcase to proper level or place generator on level surface.
Engine shuts down and yellow CO fault light blinking.	1. CO system fault	Contact authorized FIRMAN service facility.

For all other issues, contact authorized dealer or Firman customer service.

# Service - Warranty

SERVICE INFORMATION CONTACT FIRMAN PRODUCT SERVICE DEPARTMENT AT 1-844-347-6261 or at www.firmanpowerequipment.com to obtain warranty service information or to order replacement parts or accessories.

### **HOW TO ORDER REPLACEMENT PARTS**

Even quality-built equipment such as this electric generator may need occasional replacement parts to maintain it in good condition over the years. To order replacement parts, please give the following information:

- Model No. Rev. Level and Serial No. found on the Data Decal.
- Parts number or numbers as shown in the Parts List section.
- A brief description of the trouble with the generator.

# **FIRMAN 3 Years Limited Warranty**

# **Warranty Qualifications**

FIRMAN GENERATOR will register the warranty upon receipt of your Warranty Registration Card and a copy of your sales receipt from one of FIRMAN's retail locations as proof of purchase. Please submit your warranty registration and your proof of purchase within ten(10) days of the date of purchase.

# Repair/Replacement Warranty

FIRMAN warrants to the original purchaser that the mechanical and electrical components will be free of defects in material and workmanship for a period of one(1) year(parts and labor) and 3 years (parts and technical support) from the original date of purchase 90 days [parts and labor] and 180 days [parts] for commercial & industrial use. Transportation charges on product submitted for repair or replacement under this warranty are the sole responsibility of the purchaser. This warranty only applies to the original purchaser and is not transferable.

### Do Not Return the Unit to the Place of Purchase

Contact the FIRMAN Service Center and FIRMAN will troubleshoot any issue via phone or e-mail. If the problem is not corrected by this method, FIRMAN will, at its option, authorize evaluation, repair or replacement of the defective part or component at a FIRMAN Service Center. FIRMAN will provide you with a case number for warranty service. Please keep it for future reference. Repairs or replacements without prior authorization, or at an unauthorized repair facility, will not be covered by this warranty.

# **Warranty Exclusions**

This warranty does not cover the following repairs and equipment.

### **Normal Wear**

Your product needs periodic parts and service to perform well. This warranty does not cover repair when normal use has exhausted the life of a part or the equipment as a whole.

### Installation. Use and Maintenance

This warranty will not apply to parts and/or labor if your product is deemed to have been misused, neglected, involved in an accident, abused, loaded beyond the generator's limits, modified, installed improperly or connected incorrectly to any electrical component. Normal maintenance is not covered by this warranty.

### Other Exclusions

This warranty excludes:

- cosmetic defects such as paint, decals, etc.
- wear items
- accessory parts
- failures due to acts of God and other force majeure events beyond the manufacturer's control
- problems caused by parts that are not original FIRMAN parts
- units used for prime power in place of existing utility power where utility is present or in place of utility power where utility power service does not normally exist.

# **Limits of Implied Warranty and Consequential Damage**

FIRMAN disclaims any obligation to cover any loss of time, use of this product, freight, or any incidental or consequential claim by anyone from using this product. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANT ABLILITY OR FITNESS FOR A PARTICULAR PURPOSE.

A unit provided as an exchange will be subject to the warranty of the original unit. The length of the warranty governing the exchanged unit will remain calculated by reference to the purchase date of the original unit.

This warranty gives you certain legal rights which may change from state to state. Your state may also have other rights you may be entitled to that are not listed within this warranty.

# FIRMAN POWER EQUIPMENT INC. Emission Control System Warranty

### CALIFORNIA AND FEDERAL EXHAUST AND EVAPORATIVE EMISSIONS CONTROL WARRANTY STATEMENT

### YOUR WARRANTY RIGHTS AND OBLIGATIONS

The California Air Resources Board, US Environmental Protection Agency ("US EPA") and FIRMAN POWER EQUIPMENT INC.(FIRMAN) are pleased to explain the emissions control systems warranty on your 2024-2025 or later Small Off-Road Engine ("SORE") and engine powered equipment. In California, new equipment that use small off-road engines must be designed, built and equipped to meet the State's stringent anti-smog standards. FIRMAN must warrant the emissions control systems on your SORE and engine powered equipment for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your small off-road engine or equipment leading to the failure of the emissions control system. Your emissions control system may include parts such as the carburetor or fuel-injection system, the ignition system, catalytic converter, fuel tanks, fuel lines (for liquid fuel and fuel vapors), fuel caps, valves, canisters, filters, clamps and other associated components. Also included may be hoses, belts, connectors, and other emission-related assemblies.

Where a warrantable condition exists, FIRMAN will repair your SORE and engine powered equipment at no cost to you including diagnosis, parts and labor.

### MANUFACTURER'S WARRANTY COVERAGE:

The exhaust and evaporative emissions control system on your small off-road engine and engine powered equipment is warranted for two years. If any emissions-related part on your small off-road engine and engine powered equipment is defective, the part will be repaired or replaced by FIRMAN.

### OWNER'S WARRANTY RESPONSIBILITIES:

As the SORE and engine powered equipment owner, you are responsible for the performance of the required maintenance listed in your operator's manual. FIRMAN recommends that you retain all receipts covering maintenance on your SORE and engine powered equipment, but FIRMAN cannot deny warranty coverage solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

As the SORE and engine powered equipment owner, you should however be aware that FIRMAN may deny you warranty coverage if your small off-road engine or engine powered equipment or a part has failed due to abuse, neglect, or improper maintenance or unapproved modifications.

You are responsible for presenting your small off-road engine and engine powered equipment to a FIRMAN distribution center or service center as soon as the problem exists. The warranty repairs shall be completed in a reasonable amount of time, not to exceed 30 days.

If you have any questions regarding your warranty rights and responsibilities, you should contact FIRMAN at 1-844-347-6261.

### **FIRMAN Emission Control Defects Warranty Provisions**

The warranty period begins on the date the engine/equipment is delivered to an ultimate purchaser. FIRMAN warrants to the ultimate purchaser and each subsequent purchaser that the engine is:

Designed, built, and equipped so as to conform with all applicable regulations adopted by the Air Resources Board and US EPA; and Free from defects in materials and workmanship that cause the failure of a warranted part to be identical in all material respects to the part as described in the engine manufacturers application for certification.

### The warranty on emissions-related parts is as follows:

- (1) Any warranted part that is not scheduled for replacement as required maintenance in the owner's manual supplied, is warranted for the warranty period stated above. If any such part fails during the period of warranty coverage, the part will be repaired or replaced by FIRMAN at no charge to the owner. Any such part repaired or replaced under the warranty will be warranted for the remaining warranty period.
- (2) Any warranted part that is scheduled only for regular inspection in the owner's manual supplied, is warranted for the warranty period stated above. Any such part repaired or replaced under warranty will be warranted for the remaining warranty period.
- (3) Any warranted part that is scheduled for replacement as required maintenance in the owner's manual supplied, is warranted for the period of time prior to the first scheduled replacement point for that part. If the part fails prior to the first scheduled replacement, the part will be repaired or replaced by FIRMAN at no charge to the owner. Any such part repaired or replaced under warranty will be warranted for the remainder of the period prior to the first scheduled replacement point for the part.
- (4) Repair or replacement of any warranted part under the warranty must be performed at no charge to the owner at a warranty station.
- (5) Notwithstanding the provisions of Subsection (4) above, warranty services or repairs must be provided by FIRMAN that are franchised to service the subject engines.
- (6) The owner must not be charged for diagnostic labor that leads to the determination that a warranted part is in fact defective, provided that such diagnostic work is performed at a warranty station.
- (7) FIRMAN is liable for damages to other engine components proximately caused by a failure under warranty of any warranted part.

English 40 Customer Service: 1-844-FIRMAN1

# Service - Warranty

Customer Service: 1-844-FIRMAN1

- (8) Throughout the emissions warranty period defined in Subsection (b)(2), FIRMAN will maintain a supply of warranted parts sufficient to meet the expected demand for such parts.
- (9) Any replacement part may be used in the performance of any warranty maintenance or repairs and must be provided without charge to the owner. Such use will not reduce the warranty obligations of the manufacturer.
- (10) Add-on or modified parts that are not exempted by the Air Resources Board may not be used. The use of any non-exempted add-on or modified parts by the ultimate purchaser will be grounds for disallowing a warranty claim.

The manufacturer will not be liable to warrant failures of warranted parts caused by the use of a non-exempted add-on or modified part.

### PARTS COVERED BY WARRANTY

Listed below are the parts (if equipped) covered by the Federal and California Emission Control System Warranty.

- 1. Ignition system including:
- Spark plug
- Ignition coil
- 2. Fuel metering system:
- Fuel tank
- Fuel cap
- Fuel lines (for liquid fuel and fuel vapors) and related fittings/clamps
- Fuel regulator, carburetor and internal parts.
- 3. Catalytic muffler assembly including:
- Exhaust manifold
- Catalytic converter
- Muffler gasket
- -pulse valve

- 4. Air induction system including:
- Intake pipe/manifold
- Air cleaner
- 5. Crankcase breather assembly including:
- Breather connection tube
- 6. Fuel tank evaporative emission control system including:
- Purge valves
- Carbon canister
- Vapor hoses and fitting/clamps

### Limitations

This Emission Control System Warranty shall not cover any of the following:

- (a) Consequential damages such as loss of time, inconvenience, loss of use of the engine or equipment, etc.
- (b) Diagnosis and inspection fees that do not result in eligible warranty service being performed.
