REGISTERING YOUR SKYCADDIE

Your SkyCaddie PRO 4X comes pre-loaded with over 35,000 courses worldwide and includes a 30-day trial to play right out of the box. The complimentary 30-day trial period will begin after your first round of golf. Within the trial period simply complete the registration process and sign up for a nominally priced SkyGolf® subscription plans to continue access to the most-accurate, most-detailed and most up-to date course maps in golf. Unlike its competition, SkyGolf walks every course to make sure you can trust your distances to play your best golf.

Promotional packs include a 1 year pre-paid membership card. Simply follow the instructions on the device to register using the promotional card.

For information on registering your PRO 4X, please visit www.SkyGolf.com or follow the onscreen instructions on your PRO 4X.

EXTENDED WARRANTY OPTIONS (USA AND CANADA)

When registering your SkyCaddie PRO 4X, you will be given the option of purchasing an Extended Warranty (U.S. or Canada only). This will extend the standard 6-month manufacturer's limited warranty to a 12-month warranty against defects in materials and workmanship.

Terms and conditions are listed online at www.SkyGolf.com

CHARGING YOUR SKYCADDIE

Please use the enclosed PRO 4X USB cable to charge your SkyCaddie. Other USB cables may not work with your device. The USB cable provided is specific to your PRO 4X. USB cables must be rated at 2 Amps for the PRO 4X. Use of other connectors may create longer charging times or a failure to complete a full charge.

It is recommended that you charge your PRO 4X after each round.

HELPFUL TIPS

Turn on your SkyCaddie PRO 4X outdoors, with a clear view of the sky, to receive satellite signals. Give it an initial five minutes before play to download the latest satellite data used to improve accuracy. The higher the strength on the GPS Signal Indicator, the higher the accuracy.

To maintain optimal accuracy during play, make sure your SkyCaddie PRO 4X is always on and has a clear view of the sky. Do not put the SkyCaddie PRO 4X in your pocket or turn it on and off during play.

Don't expose the SkyCaddie PRO 4X to extreme temperatures or water. Storing your SkyCaddie in areas that may allow the battery to freeze may result in diminished run time or failure.

When cleaning and wiping the display use only a cloth intended for cleaning optics. Do not wipe with a towel or paper napkins.

Fully charge the battery before each round. The PRO 4X has the largest battery among rangefinders. So, in spite of its large and brilliant display and ultra-fast processor, you can expect 18 hours of play time by utilizing optional battery management features such as auto-dimming commonly used on smartphones.

Never disconnect or turn off your SkyCaddie PRO 4X while it is syncing. Wait until it is finished communicating before you disconnect it, power it off, or power off your computer.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21 Information to the user.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. 15.105 Information for the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connecting the equipment to a socket on a circuit different from that to which the receiver is connected.
- Contact with the provider or a radio TV technician for help.

Specific absorption rate (SAR):

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a margin of safety designed to ensure the safety of all people regardless of their age or health.

The FCC Statement of Exposure to RF and the SAR limit for the United States (FCC) is 1.6 W/kg average for each gram of tissue. This device was tested for typical operations of use on the body, with the back of the Tablet at 5mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a distance of 5mm between the user's body and the back of the Device. The use of belt clips, covers and similar accessories must not contain metallic components in their assembly. The use of accessories that do not meet these requirements may not meet FCC RF exposure requirements and should be avoided.

Functioning in the body

This device was tested for typical operations of use in the body. To comply with RF exposure requirements, a minimum separation distance of 5mm must be maintained between the user's body and the telephone, including the antenna. Third-party accessories such as belt clips, covers and similar accessories used with this device should not contain metallic components, accessories that do not meet these RF exposure requirements and should be avoided from use on the body. Use only the supplied antenna or an approved antenna.

IC Caution:

English:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

French:

L' émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d' Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L' exploitation est autorisée aux deux conditions suivantes :

1. L' appareil ne doit pas produire de brouillage;
2. L' appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d' en compromettre le fonctionnement.

SAR Statement: Device has been tested and meets applicable limits for radio frequency (RF) exposure. Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in Canada that set the limit averaged over 1 gram of tissue. During testing, PRO 4X (X8F-PRO4X) radios are set to their highest transmission levels and placed in positions that simulate uses against the head, with no separation, and when worn or carried against the torso of the body, with 5mm separation. To reduce exposure to RF energy, use a hands-free option, such as the built-in speaker phone, the supplied headphones, or other similar accessories. Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines, in a manner that has not been tested or certified. Although this device has been tested to determine SAR in each band of operation, not all bands are available in all areas. Bands are dependent on your service provider's wireless and roaming networks.
