Wireless Power Bank

Package Content

1x Power bank

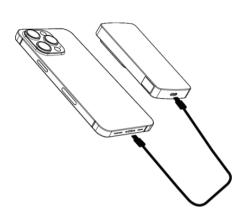

90mm

Please read the following carefully before using this device to ensure safe and proper usage.

Capacity: 5000mAh/3.9V Input(USB-C): 5V/3A, 9V/2A Output(USB-C): 5V/3A, 9V/2.22A, 12V/1.67A Wireless output: 5W/7.5W/10W/15W Max snap and charge USB-C+ Wireless output: 5V/3A total Digital LED display with charging icons

Charging your device using your power bank via cable:

IMPORTANT: Before using your power bank for the first time make sure it is fully charged (LED displays 100%). Connect the supplied USB-C cable (or the cable that came with your device) to the power bank's USB-C port and to your device. Then begin charging your device.

During charging of your device, the power bank's percentage of remaining battery life will gradually decrease as your device receives power, when the power bank is low in power, the percentage will flash and go out automatically until all the power is used up.

The green charging icon in the LED display will light up once you enter fast charging mode

Recharging your power bank:

To recharge your power bank, use the supplied USB cable to connect its USB-C port to a USB wall charging adapter. While recharging the power bank, the last digit of the percentage will blink. If there is one digit flashing, the charging is not completed. Once the power bank is fully charged, the 100% is displayed.

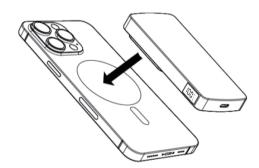

The green charging icon in the LED display will light up once you enter fast charging mode.

NOTE: For best results, do not connect the power bank to a computer's USB port. We recommend using a wall charging adapter that supports fast charging protocols such as QC or PD.

Wireless charging:

Snap your smartphone that supports wireless charging on the magnetic charger surface, the $\,$ green wireless charging icon will light up once the unit enters wireless charging mode.

This wireless charger can charge smartphones with non-metal protective case or silicone covers that are no thicker than 6mm.

-Incorrect usage can cause explosions / danger of chemical burns. -Damaged batteries can cause chemical burns when they come in contact with human skin

- -Do not disassemble the item.
- -Never throw the item or parts of it into fire. -Never expose the item to high temperature changes Hot/Cold, humidity or liquids.
- -Store in a clean and dry space. -To maintain good battery health, the item should be recharged every 6 months. Battery will
- loose capacity when stored without charging.

 -If the product gets very hot, please disconnect the item and do not use it.

-Do not use if the item or parts of it are damaged.

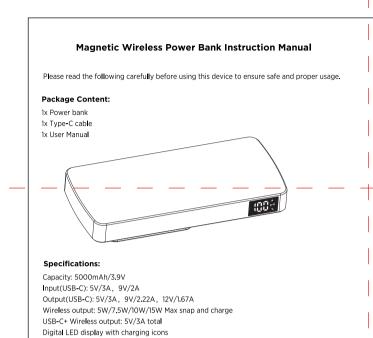

-Do not put any bare metal objects on the surface of wireless charger when it is operating.

EU warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable

exposure condition without restriction. Product name: Wireless Power Bank

Product model: MPB800

Manufacturer: JMTEK TECHNOLOGY(ZHONGSHAN) CO., LTD

Frequency Range: 112kHz~205kHz Max. Transmit Power: 23.79(dbµA/m)

SIMPLIFIED EU DECLARATION OF CONFORMITY

The simplified EU declaration of conformity referred to in Article 10(9) shall be provided as follows: Hereby, JMTEK TECHNOLOGY(ZHONGSHAN) CO., LTD declares that radio equipment type MPB800 is in compliance with Directive 2014/53/EU, and this product is allowed to be used in all EU member states. The full text of the EU declaration of conformity is available at following This product can be used across EU member

states.
EUT Operating temperature: -10~45

Caution: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the

instructions.

FCC warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- —Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- —Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
