

Product Carbon Footprint

LOQ Essential 15IRX11

Machine Types: 83SC

Device Type: Notebook

Report Date 07/25/2025

Lenovo values our commitment to the environment. As part of that commitment, Lenovo performs a streamlined product lifecycle analysis in accordance with the IEC TR 62921 standard. This analysis allows the customer to estimate the carbon footprint of their product. The carbon footprint is the total green-house gases emitted by the product over its lifespan reported as global warming potential for 100-year time horizon (GWP-100) in units of CO₂ equivalents

Estimated carbon footprint of the: **LOQ Essential 15IRX11**

259 kg CO₂e ±

50 kg CO₂e

This estimate uses the assumptions from the table below (Based on EU use location. U.S. estimates below):

Product Weight (kg)	2.30	Product Screen Size (inches)	15.6	Assembly Location	China
Product Lifetime (years)	4	Yearly Typical Energy Use (kWh)	28.50	Use Location	EU

Below is a breakout of the carbon emissions of this product by both lifecycle stage (raw material extraction through product end-of-life) and greenhouse gases resulting from the manufacture of major components:

Mean (EU):	259	5th Percentile (EU):	160	Mean (US):	283
Standard Deviation (EU):	50	95th Percentile (EU):	544	Standard Deviation (US):	42
