

New Accessory Introduction:

## Venturi Front Duct Assembly (SKU FZAATE)

### UPGRADE TO FURTHER REACH & REDUCED DROPLET SIZE

Easily improve your Vortex™ Mist Blower performance with an all-new, patented front duct attachment!

This new attachment positions an 80° cone nozzle inside of the blow tube to introduce liquid to the air stream prior to exit.

Curved fan blades twist the air stream to create a Venturi effect, **propelling smaller mist droplets (under 100 microns) over 35-feet** towards the targeted foliage!

US PATENT #10,588,310 B2

#### Quick & Easy to Install

Replaces existing front duct assembly on all Vortex™ models.

Simply remove and reattach the water delivery tube and front duct securing nut and bolt (Phillips head screwdriver required).

Works with Diffusion Cover Kit accessory (SKU FZAAQX).
