

SmallRig

V-Mount Battery Mount Plate

Operating Instruction

SmallRig V-Mount Battery Mounting Plate 4505 is a compact, lightweight, convenient, all-in-one mounting solution for V-mount batteries. The baseplate can be stretched to fit mirrorless / DSLR cameras of various sizes. Tool-free installation and adjustment make the process quick and time-saving. The built-in Arca-Swiss mount plate supports any with an Arca-Swiss plate SmallRig cages or SmallRig baseplate. The built-in 1/4"-20 threaded holes provide more power supply solutions by attaching a Mounting Clamp for Portable Power Banks BUB2336. The built-in 1/4"-20 & 3/8"-16 holes at the bottom allow attaching other quick-release plates. The rotatable structure facilitates screen usage and adopts damping to prevent your device from falling. The folding design of the V-Mount plate increases compactness and portability. The included aluminum alloy V-Mount Backplate can replace the plastic V-Mount Plate on the back of other V-mount batteries.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

Product Details

Easy to use

Quickly Assemble without Tools

Step 1

Mount the device to the wall using the provided screws.

Step 2

Adjust the length of the extension arm to fit the space.

Step 3

Mount the device to the wall using the provided screws.

Not Block Camera Screen

Connect the device to the wall using the provided screws and adjust the screen to the camera.

Step 1

Mount the device to the wall using the provided screws.

Step 2

Adjust the length of the extension arm to fit the space.

Step 3

Mount the device to the wall using the provided screws.

Not Block Camera Screen

Connect the device to the wall using the provided screws and adjust the screen to the camera.

Step 1

Mount the device to the wall using the provided screws.

Step 2

Adjust the length of the extension arm to fit the space.

Step 3

Mount the device to the wall using the provided screws.
