Type J
(Switzerland, Liechtenstein)

Type K
(Denmark, Greenland)

Type L
(Italy, Chile, San Marino)

Type N
(Brazil, South Africa)

Type O
(Thailand)

Warm Tips :

-The mini travel adapter DOES NOT convert electrical output current and voltage, it converts the power outlet only and fits power sockets of type A, B, C, E, F, G, H, I, J, K, L, N

-Every country has its own voltage standard, pls ensure the local electrical voltage carefully - In order to operate it more convenient, we have improved the adapter. When we shake the charger adapter, it will make a noise. But that is the sound of the septum collision, not its quality problem, please don't mind.

-Please note that it does NOT fit with Type D (mostly used in India) and Type M (mostly used in South Africa) sockets.
