LIVING WATER

Oase

OASE - Water as a source of innovation

Water is our element, our passion and the heart of our brand. Since 1949, we have dedicated ourselves to revitalising water in all its facets and integrating it into people's everyday lives. Our aim is to bring the beauty of water into every living space - through innovative, sustainable and environmentally friendly solutions.

Whether stylish aquariums, natural ponds or impressive water features - we transform water through creative approaches that combine aesthetics and functionality. We place particular emphasis on the responsible use of resources and minimising our ecological footprint.

With our energy-efficient OASE products, you can transform your garden into an oasis of well-being that you can enjoy carefree. The intelligent control functions, such as via our OASE Control App, allow you to adjust your water systems easily and conveniently - for sustainable enjoyment with minimal energy consumption.

Our innovative strength and relentless pursuit of perfection have not only earned us the title of TOP 100 Innovator, but also the German Design Award for our FiltoClear series. At OASE, we create living spaces that fully utilise the potential of water and bring the magic of this element to life in a new way.

[Discover for yourself how OASE can enrich your life through the transformative power of water!](#)

Sincerely, Cornelius Everke

THE PURE JOY OF THE WATER GARDEN

Perfect: Inspirations for your project

A garden with water does not have to be created overnight. Start with a Level 1 project and gradually add more highlights to suit your own taste. Our huge selection of OASE individual products and sets makes it easy for you to create your dream water garden with little effort. It's easy enough that anyone can develop a knack for pond building.

Mini ponds and raised ponds

A pond is the centrepiece of every water garden. No matter what size it is. Mini ponds can be created using preformed ponds in just a few steps and with little prior knowledge. Even a small pond with a volume of 80 litres produces a great effect. Indeed, a self-built raised pond on a balcony can provide a peaceful place to meditate and relax.

Ponds with pond liners

Do you want to determine the shape, size and style of your pond yourself? With pond liners, you take every aspect of the design into your own hands. If you want a pond larger than 2500 litres, they are always the better alternative to preformed ponds and offer a unique habitat for fish and more. This Level 3 project can be implemented by experienced tradespeople and DIY-ers. Alternatively, call in the professionals.

Waterfalls for your garden

If you want something that both looks and sounds unique, waterfalls are hard to beat. They are particularly exciting as part of a specially constructed wall, which can be built in your favourite place to sit and relax. Sounds complex? It doesn't have to be. All you need is inspiration for the design, a little DIY talent and a few helping hands.

Streams in the water garden

The babbling of a clear, small stream is one of the most beautiful sounds in nature. With modular watercourse elements this fascinating spectacle can be integrated anywhere. Whether with or without a pond, small or large – you need surprisingly little time for this project.

Freely designed watercourse

A freely designed watercourse gives you the opportunity to express yourself individually. Architectural, natural or Japanese style – everything is possible.

Water features and fountains

Do you have a small garden, want to spruce up your terrace or add a water element to your balcony? Water features and floating fountains give your water garden a third dimension. You can easily design your own small water fountain, even with limited materials and minimal space.

DISCOVER MORE!

Further information and valuable expert tips for numerous project ideas can be found online at www.oase.com/en/lifestyle/diy.html and via the adjacent QR code.

Emotional developers

At OASE, developing and manufacturing first-class products is the means to the true end: staging underwater living spaces and touching, moving and inspiring our customers. To this end, our specialists work together across different departments to find the best solution – with expertise, creativity and passion. The result? Energy-efficient innovations and top-quality, smart solutions. We regularly analyse our solutions in our own test laboratory. We make no room for compromises, ensuring we stick to the OASE quality promise.

Our passion for innovative products has already received several awards. For the fourth time in a row, we were voted one of the TOP 100 innovators in Germany.

Make living spaces efficient

High energy efficiency and maximum design freedom

Smart energy-saving products for your garden

Using our vast range, you can transform your garden into a place of wellbeing. At the same time, permanently reduce ongoing energy costs: This is safe and easy with our smart control functions and energy-efficient pond pump models. Discover energy-saving product examples and clever savings potentials in our overview.

www.oase.com/en/saving-energy

Powerful and economical: The AquaMax Eco product ranges

Thanks to the economical motor, these pond pumps work particularly efficiently even under full power. You can easily balance the energy consumption via the app. Our models with the unique Seasonal Flow Control (SFC) function even more effectively: The filter and gravity-fed pumps of the Eco Premium (from model 12000), Eco Expert and Eco Titanium series independently reduce their water volume and delivery head by around 50 percent at two temperature levels, below approx. 17°C and once again below approx. 10°C. This saves up to 30 percent of energy costs annually.

Efficiently controlled: The Bitron Eco

Due to its longer service life, the effective UVC pre-clarifiser saves on lighting costs in particular. In addition, it only switches on when it is really needed. This reduces energy costs by up to 50 percent without comprising on cleaning performance. If you use the Bitron Eco with 75 percent power all year round, you can save up to around 527 kW/h.

Save smart: The OASE Control app

The smart pumps, filters and lighting in your garden can be configured safely and conveniently at any time with the OASE Control app. This makes it the perfect assistant for reducing energy costs. For example, you can adjust the performance of the pumps or automatically set your lighting times shorter.

CORE 6 Technology

NEXT LEVEL EFFICIENCY

Efficiency, energy savings, sustainability, convenience – the new OASE CORE 6 Technology combines everything into one cohesive, complete system. This motor technology, which is new to ponds and irrigation, is taking us to the next level, especially in terms of energy efficiency.

This new OASE standard was integrated for the first time last year in the next generation of the AquaMax Eco Premium series. The new Aquarius Eco Premium pumps followed in 2025. Now, in 2026, the new AquaMax Eco Titanium 33000 is being added

to the range. Equipped with CORE 6 Technology, the pumps run more quietly, more efficiently, more effectively and for longer.

This is because CORE 6 Technology enables an optimised current flow, ensuring that the rotor in the pump core operates not only powerfully, but also more smoothly, more quietly and therefore more efficiently. Thanks to its powerful performance, combined with OASE's usual high standard of quality, the pump also attains the next level of longevity.

Voice control

Voice control via the
OASE Control app

The OASE Control app allows all connected products in the OASE world to be managed centrally. Now, you can also control the FM-Master Cloud sockets and the OASE Control-enabled pumps using voice control (Alexa or Google Home). This makes it even more convenient to manage your digitally controlled garden and aquarium world from a sun lounger or sofa. You can also add these devices to existing SmartHome groups and applications.

Pond construction at a glance

RECOMMENDATION

The movement of water through watercourses and waterfalls also supplies the pond with necessary oxygen. The material excavated from the garden pond can be used to create a watercourse or waterfall.

If possible, gradients in a watercourse should not be steeper than 40%.

WATERCOURSES (OPTIONAL)

When selecting the location for the watercourse, consideration should be given to different weirs, depths, as well as the largest possible overflows, so that additional movement and oxygen can enter the pond.

SWAMP ZONE

Ideal for lush embankment plants. It is between 10 cm above and below the water level.

SKIMMER

DEEP WATER ZONE

Here, filter pumps and watercourse pumps or, if necessary, pond drains are used.

SHALLOW WATER ZONE

Provides space for plants and microorganisms and thus makes an important contribution to the nutrient reduction in the pond. It is about 10–40 cm deep and should be as wide as possible.

FLOATING LEAF ZONE WITH E.G. WATER LILIES

THE CORRECT ORDER FOR LAYING A LINER:

1. Pond fleece
2. Pond liner
3. Stone liner (optional)

FILTER- AND WATERCOURSE PUMPS

Step by step with products from OASE

1 Location: The right location for the garden pond should be semi-shaded; 4–6 hours of sunshine a day are ideal.

2 Pond outline: First, mark the pond outlines with sand. The various depth zones are also marked with sand.

3 Depth zones & pond edge: Shape the various depth zones with filling sand. You can then install the OASE pond edge system.

4 Measurement of liner and fleece: Then the required length of the fleece and the pond liner is generously dimensioned with a cord.

5 Fleece: After excavation, the trough is first lined with a fleece for protection against the penetration of roots and stones.

6 Liner and stone liner: The liner is then carefully laid. Stone liner is particularly suitable for a natural design at the edge area.

7 Planting of flat areas: Coconut mats are laid out for planting flat areas. They allow plants to optimally hold on with their roots.

8 Planting of steep areas: Steeper sections are planted with the help of embankment

bags. First, weigh these down with large stones, for example, to insert the plants.

9 Pond technology: Read the instructions for use when installing the OASE pond technology.

10 Pebbles and water: After the pebbles, the water goes in the pond: half of it first and it is only completely filled once the liner has completely settled.

11 Lighting: For an atmospheric ambience, it is a good idea to think about the appropriate lighting.

12 Done: The result can be seen.

EXTRAS

CALCULATION AID

How much liner is needed for a pond?

There are two formulas for calculating the liner:

Length + 2 x depth (at the deepest point of the pit) + 2 x 50 cm = length of the liner strip

Width + 2 x depth (at the deepest point of the pit) + 2 x 50 cm = width of the liner strip

RECOMMENDATION

Aggressive root penetration, such as with bamboo, can damage the pond liner. Therefore, make sure that strong-rooted plants are always planted with root protection liners and a rhizome barrier on the pond. We recommend that the planting is coordinated with a specialist retailer in advance.

LINER TYPES AND APPLICATIONS

Fleeces & liners

Liner as a base

Creating a liner pond offers an infinite number of creative possibilities. The larger or more demanding the pond, the thicker the liner should be.

Individual liner lengths from the roll can be quickly and easily connected using the appropriate OASE accessories.

They are available in different versions:

POND LINER

- **OaseFol**, **EuroFol** and **EasyFol** rubber liners are particularly stretchy, robust, flexible to lay and easy to work with. The environmentally friendly EPDM liners are particularly UV and ozone resistant. We provide a warranty (p. 119) of up to 20 years on our OaseFol, EuroFol and EasyFol EPDM liners.
- **AlfaFol** is a single-layer PVC liner and is available in four thicknesses and two colours. The plastic liner can be welded or glued and is characterised by an excellent price-performance ratio. Small damages, e.g. those caused by garden tools, can be repaired quickly and easily. We provide a 15 year warranty (p. 119) on our AlfaFol PVC pond liner.

SWIMMING POND LINER

- **SwimFol** is extremely durable and ideally suited for use in swimming ponds.

DECORATIVE LINER

- **Stone liner** is a robust decorative liner with a fleece coating that can be quickly and easily applied to the pond liner with UniFix+.

Pond fleece

The optimal protection for the pond liner

As a base for your pond liner, we strongly recommend that you use a pond fleece. It reliably protects the liner against damage caused by sharp stones, uneven areas and roots (warning: except for bamboo and aggressive roots, in which case a rhizome barrier must be used). For the edge area or for particularly rough surfaces, it is recommended to lay a double layer of fleece.

OASE offers three different fleece thicknesses: 200 g/m², 400g/m² and 500 g/m². The latter is suitable for pond liners subject to particularly heavy wear, such as those used in swimming ponds.

EXTRAS

We strongly recommend using a pond fleece to protect the liner from stones and roots.

ACCESSORIES

PROTECTIVE POND FLEECE

200 g/m²/ 2 x 5 m

Item no. 43334

PVC LINER REPAIR KIT

- High-performance underwater adhesive
- Fish and plant compatible

Item no. 50843

UNIFIX+ 290 ML CARTRIDGE

- High-performance universal adhesive
- Even works well under water

Item no. 57148

PVC LINER ADHESIVE

- Bonds all PVC liners quickly and easily
- For 1 m² area (250 ml)
- For 4 m² area (1000 ml)

Item no. 36861 (250 ml container)

THE POWERFUL CLASSIC – NOW EVEN MORE EFFICIENT

AquaMax Eco Classic

- **Fully economical:** The energy-efficient motor of the AquaMax Eco Classic saves electricity – and therefore money
- **Up to 40 percent less:** The 2500 E and 3500 E require so much less energy than the predecessor model
- **Environmental Function Control:** This is EFC, by OASE: no problems caused by the pump being blocked or running dry
- **Dirt be gone:** Reliable removal of plant parts or fish faeces up to a size of 8 mm
- **Included:** A special hose adapter with threaded collar for different hose sizes (25/32/38 mm) is included in the scope of delivery
- **Swimming and natural ponds:** Possible to use in an external pump vault

Powerful and reliable

The AquaMax Eco Classic pumps pond water to the watercourse, waterfall or filter system.

Coarse debris removal: The large-surface wrap-around strainer allows coarse debris particles such as fish waste or dead plants up to 8 mm in size to pass through.

Energy efficient motor: The efficient OASE motor is particularly economical and effectively reduces running costs.

ECO

- **Expert:** Perfect for use in demanding filter systems or for large watercourses and waterfalls
- **Durable:** The robust housing which also contains stainless steel is super durable
- **Environmental Function Control:** This is EFC, by OASE: no problems caused by the pump being blocked or running dry
- **Compatible with the app:** Simply download the OASE Control app (from the App Store or via GooglePlay), register and get started*
- **Dirt be gone:** Reliable removal of plant parts or fish faeces up to a size of 11 mm
- **SFC function:** Switch on and save up to 30% energy
- **"Made in Germany":** Precise and reliable engineering skills at a particularly high level of quality
- **Versatile:** You can place this pump in dry conditions or submerge it in water

* **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

Winter-proof: This pump is damage-resistant down to temperatures as low as -20°C.

Connection for OASE Control units: The pump can be conveniently operated via innovative control devices such as the OASE Control unit or the Eco Control.

12 V pumps
for swimming
ponds and
bathing ponds

TIP

ECO CONTROL

With the clever control unit, the performance of the connected pumps can be monitored and regulated directly on the controller. Including illuminated display – without separate power supply!

Item no. 47673

FULL FORCE AHEAD FOR GRAVITY-FED FILTER SYSTEMS – EVEN ON KOI PONDS!

AquaMax Eco Titanium

ECO

- **Think big:** Innovative, energy-efficient gravity filter pump for large bodies of water, even with koi stock
- **Power output:** Flow-optimised hydraulics help achieve an outstanding level of efficiency
- **Durable:** The rotor shaft and bearings are made of high-performance ceramic (silicon carbide or SIC ceramic) – for optimum reliability and longevity
- **Ideal:** Ideal for set-up in a pump vault
- **SFC function:** Switch on via optional accessories and save up to 30% energy on top
- **For universal use:** Suitable for submersed or dry use – even in saltwater
- **Super robust:** Pump housing made of stainless steel
- **"Made in Germany":** Precise and reliable engineering skills at a particularly high quality level
- **Compatible with the app:** Simply download the OASE Control app (from the App Store or via GooglePlay) and get started*
- **CORE 6 Technology:** New level of efficiency thanks to the latest motor technology (AquaMax Eco Titanium 33000 only)

* **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

Oasis of well-being: Get that holiday feeling in your own natural pool.

Robust pump housing: Cast stainless steel allows above-average levels of precision and energy-efficiency to be achieved sustainably. The entire pump housing can be adjusted upwards by 90°.

Connection for controllers: The pump can be conveniently operated via innovative control devices such as the OASE Control unit or the Eco Control.

A lush green garden with a pond and a wooden bridge. The garden is filled with various plants, including tall grasses, ferns, and flowering shrubs. A wooden bridge with a thatched roof is visible in the background, partially obscured by the foliage. The pond reflects the surrounding greenery and the bridge. The overall scene is peaceful and natural.

Filters, UVC clarifiers and aerators

Filters compared

A filter system essentially consists of:

- A filter pump to supply the filter
- A pond filter that provides bio-mechanical cleaning and
- a UVC clarifier to tackle floating algae and germs (already integrated in some filters).

As a rule of thumb, the following applies to determining the correct volume:

Pond volume in m³ = length x width x depth/2
(for rectangular ponds L x W x D only)
Example: 3 m x 4 m x 1 m/2 = 6 m³, which corresponds to 6000 litres

Underwater filters

With OASE underwater filters, even the tiniest space can become a mini water paradise.

IMPORTANT NOTE

When **planning new ponds** with koi stock, please observe a minimum size of 5 m³!

 Ponds with plants, without fish stock

 Ponds with plants and fish stock up to 1 kg/1000 l

 Ponds with plants and fish stock up to 1–2 kg/1000 l (koi ponds)

SETS	UNDERWATER FILTERS	UVC POWER	FILTER & WATERCOURSE PUMP	+ AERATORS (ACCESSORIES)	SUITABLE FOR POND VOLUME IN M³			ITEM NO. (GB VERSION)	ITEM NO.

Clear water guarantee (p. 119) according to Secchi up to a visibility depth of 1 m.

Pressure filter systems

Pressure filters are suitable for small to medium-sized ponds. If necessary, the water can be directed to higher watercourses, as the pump pressure is maintained through the filter.

SETS	PRESSURE FILTERS	UVC POWER	FILTER & WATERCOURSE PUMP	+ AERATORS (ACCESSORIES)	SUITABLE FOR POND VOLUME IN M ³			ITEM NO. (GB VERSION)	ITEM NO.
Table explanations: You will find the complete filter sets in the highlighted rows. The other configurations are additional possible combinations for different requirements and pond sizes.									
BIOPRESS

				+ OxyTex Set 1000	38.75	18	9		

The above-mentioned pond size specifications (FiltoClear/sets) take into account delivery heads of 1 m and hose lengths of 5 m with a hose diameter of 1 1/2". Larger pumps should be used for longer hose lines and/or higher delivery heads. Clear water guarantee (p. 119) according to Secchi up to a visibility depth of 1 m. Please note that more intensive planning is required in the event of extreme temperature fluctuations, friction losses with hose lines of more than 5 m or strong solar radiation due to the specific location of the pond (south facing).

Filters compared

Flow-through filter systems

Flow-through filters are used for medium to large ponds as well as fish and koi ponds. They sit above the water level at the edge of the pond or above the stream, so the water flows back into the pond without pressure.

SETS	FLOW-THROUGH FILTERS	UVC PRE-CLARIFIER UVC POWER	FILTER & WATERCOURSE PUMP	+ AERATORS (ACCESSORIES)	SUITABLE FOR POND VOLUME IN M ³			ITEM NO. (GB VERSION)	ITEM NO.
Table explanations: You will find the complete filter sets in the highlighted rows. The other configurations are additional possible combinations for different requirements and pond sizes.

The above-mentioned pond size specifications (BioTec) take into account delivery heads of 1 m and hose lengths of 5 m with a hose diameter of 1 ½". Larger pumps should be used for longer hose lines and/or higher delivery heads. Clear water guarantee (p. 119) according to Secchi up to a visibility depth of 1 m. Please note that more intensive planning is required in the event of extreme temperature fluctuations, friction losses with hose lines of more than 5 m or strong solar radiation due to the specific location of the pond (south facing).

ProfiClear Premium Compact

- **Suitable for ponds up to 140 m³**
- **Smart:** Conveniently control all settings via an app with connection options for the OASE Control system; existing systems can be upgraded using the separately available upgrade kit*
- **Value for money:** More cost-effective alternative for smaller ponds, especially koi ponds
- **Clean:** The fully automatic coarse dirt separation simply rinses the dirt out of the filter thanks to drum filter technology
- **Flexible:** Available as a pumped system or a gravity system
- **Optimised:** With Moving Bed System for optimal water movement and cleaning
- **Clear:** High separation performance due to deep filtration of up to 60 µm
- **Effective:** Hel-X 13 filter medium with a particularly large surface area for effective degradation of nutrients and pollutants
- **"Made in Germany":** Precise and reliable engineering skills with particularly high quality (except pressure pump)
- **Automatic:** The filter is flushed exclusively with cleaned pond water
- **A feast for your ears:** Particularly quiet operation thanks to extensive noise insulation
- **Easy:** Individually removable sieve elements (without tools) and free-running function
- **Reliable:** Dirt screens on the sieves protect against thread algae and larger particles
- **Flat:** Low installation height for full flexibility in gravitational systems

* **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

ProfiClear Premium

1 DRUM FILTER MODULE: 2 MOVING BED MODULE 3 INDIVIDUAL MODULE

- **Smart high-end modular filter system for koi ponds and other large bodies of water up to 260 m³**
- **Modern:** Modular filter system for professional water quality where space is at a minimum
- **Tried-and-tested:** Mature, professional technology with over three years of development time
- **Clean:** Filtration with a filtration capacity of up to 60 µm and fully automatic self-cleaning
- **Control:** Suitable for outdoor use, the microcontroller monitors and controls the functions
- **Easy:** Individually removable sieve elements (without tools) and free-running function for easy access to the drum
- **A feast for your ears:** Particularly quiet when operating
- **Powerful:** High-quality high-pressure pump for flushing the drum is included in the delivery
- **Effective:** Excellent decomposition rates of ammonium, ammonia, nitrite and nitrate
- **Smart:** Conveniently control all settings via an app with connection options for the OASE Control system; existing systems can be upgraded using the separately available upgrade kit*
- **Moving Bed:** Highly effective at breaking down pollutants and nutrients using purpose-designed filter media in the Moving Bed System
- **Drum filter module:** Intelligent self-cleaning function for uniquely maintenance-free operation
- **Individual module:** Flexible adaptation of the filter system to meet individual requirements
- **"Made in Germany":** Precise and reliable engineering skills with particularly high quality (except pressure pump)
- **No jamming:** Safety level switch in the pumped system prevents blockages due dirt particles
- **Flexible:** Additional 2" inputs with non-return valve for the integration of further pumps
- **Run free:** Flow rate up to 25 m³/h

* **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

Quiet operation: Extremely quiet due to extensive noise insulation.

Easy handling: The filter elements can easily be removed and replaced.

1

DRUM FILTER MODULE:

Intelligence sets the pace. The intelligent control centre removes coarse dirt up to 60 µm – that is finer than a hair.

- Highest filter performance up to 60 µm and flow rates up to 33 m³/h for crystal clear visibility
- Fully automated self-cleaning system provides maximum convenience
- Flushing is carried out by purified pond water, no water connection required
- A waterproof microcontroller system monitors and controls the main functions with easy operation (Plug 'n' Play)
- Particularly quiet operation due to extensive noise insulation
- Integrated high-performance high-quality pressure pump for flushing the drum

2

MOVING BED MODULE

Hel-X causes quite a stir. Original Hel-X biomedica are highly effective at breaking down nutrients and pollutants in the Moving Bed System.

- Extremely large protected settlement surface for microorganisms (806 m²/m³)
- Innovative bypass technology for optimal movement of the Hel-X biobodies even at high flow rates
- Removal of toxins, such as ammonium/ammonia, nitrite and nitrate
- Hel-X biomedica: 50 litres remove about 340 g of fish food per day. Its performance depends on temperature, feed quality and the degree of colonisation with microorganisms
- Benefits of the Moving Bed System: Permanent optimum oxygen supply; self-cleaning effect of dead biomass; expertise from industrial water treatment

3

INDIVIDUAL MODULE

Flexible and highly effective.

The filter system is flexibly adapted to the individual conditions of the water.

- Space-saving pump and UVC chamber for easy integration of: Aquamax Eco Gravity filter pumps and Bitron Premium UVC pre-clarifiers
- Maximum flexibility in connection with DN 110 and 2" feed-throughs
- To increase the filter performance, the two individual baskets can be fitted with additional filter medium in the flow range with a filling volume of up to 8 litres

All modules incl. a high-quality DN 75 gate valve for the floor drain

ProfiClear Premium XL

ProfiClear Premium XL system, **gravity fed**

ProfiClear Premium XL system, **pumped**

- **For large natural and swimming ponds up to 530 m³ and koi ponds up to 100 m³**
 - **Safe:** Integrated emergency overflow for permanently safe operation (only for the pumped variant)
 - **Tried-and-tested:** Mature, professional technology with over three years of development time
 - **Clean:** Filtration with a filtration capacity of up to 60 µm and fully automatic self-cleaning
 - **Control:** Suitable for outdoor use, the microcontroller monitors and controls the functions
 - **Modern:** Modular filter system for professional water quality in confined spaces
 - **Top:** Outstanding filter capacity with intelligent control functions
 - **Drum filter module:** Intelligent self-cleaning function for uniquely maintenance-free operation
 - **Smart:** Control all settings conveniently via app using connection options to the OASE Control System*
 - **Moving Bed:** Even more effective degradation of pollutants and nutrients thanks to the high-performance filter media OASE PondPads, which work best in the Moving Bed System
 - **For discerning owners of large ponds:** High degradation rates of ammonium, ammonia, nitrite and nitrate due to larger moving bed modules for up to 150 litres Hel-X and especially in combination with the OASE PondPads biofilter media
 - **"Made in Germany":** Precise and reliable engineering skills with particularly high quality (except pressure pump)
- * **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

ACCESSORIES

Hel-X 13 Biomedica 25 l

Expansion kit for the moving bed module. Increases the biological performance. 2 x 25 l sufficient for approx. 340 g feed/day.

Item no. 42904

ProfiClear Compact/BioTec Premium sieve set 60 µ

Increases the separation performance of the drum filter for maximum water brilliance. Note: The flushing cycles and the associated water consumption increase when using this set. Content: 6 sieve elements

Item no. 43600

Drain set ProfiClear Premium pumped

With the optional outlet adapter, you can operate the ProfiClear Premium in a pumped installation even without an individual chamber.

Item no. 50949

ProfiClear Premium sieve set 150 µ

Accessories for the drum filter module. With 150 µm, it provides a slightly coarser dirt removal and therefore reduces water consumption. Ideal for use in natural ponds or swimming ponds. Content: 8 sieve elements

Item no. 50947

ProfiClear Premium Compact

To calculate the correct UVC power for your pond:

Ponds without fish stock: 1 W UVC power per m³ pond content

Ponds with fish stock: 2 W UVC power per m³ pond content

Ponds with koi stock: 4 W UVC power per m³ pond content

Note: To keep the bacterial levels low in the koi pond, adhere to the recommend flow rate for the Bitron Premium range. Aim to achieve a circulation of at least 55% of the pond volume/hour.

BioTec ScreenMatic²

- **Highly effective flow-through filter for ponds up to 145 m³**
- **Convenient:** Filter sponges can be cleaned directly in the filter
- **Guaranteed:** Includes OASE clear water guarantee
- **Low maintenance:** Coarse dirt is removed before it enters the filter
- **Self-cleaning:** The filter belt is automatically driven; adjustable automatic cleaning system, which controls the belt run based on the degree of contamination, including LED function check
- **Mess-free:** Bottom drain with slide to remove dirt from the filter system
- **Smart combo:** Different filter media for optimal development of filter biology
- **Extra protection against thread algae:** Use of PhosLess filter cartridges for reducing thread algae (optional accessory)
- **Suitable pumps:** Optimally matched to OASE AquaMax Eco filter pumps
- **Good partners:** Direct connection option for UVC Bitron C and Eco clarifiers
- **No clogging:** Uniform water distribution on the filter belt
- **Practical:** Large-volume dirt basket with simplified handling

Optimised continuous belt: Continuous belt is easy to fold up and makes it easy to clean filter sponges.

Sludge basket: Accumulated sludge can be conveniently taken out and removed from the filter system.

DOUBLE-ACTING FLEECE FILTERS WITH SMART FUNCTION FOR KOI PONDS

ProfiClear Premium Fleece

- **Suitable for ponds up to 144.0 m³**
- **Three-fold effect:** Finest depth filtration, coupled with highly dimensioned filter biology due to the Hel-X material and ClearWave blocks, creates an even larger colonisation area
- **Full control:** Interface to the OASE Control System for digital monitoring of water temperature and fleece usage*
- **Compact design:** Enables use as a new filter or as a retrofit filter in existing systems; compatible with the modules of the ProfiClear L series
- **Easy care:** Easy replacement of the fleece rolls thanks to easy-to-use roller bearings
- **Pond-specific:** Available for koi ponds up to 26,000 or 38,000 l

* **System requirements:** A Garden Controller Cloud or InScenio FM-Master Cloud is required to use the OASE Control functions.

BioSmart Set

- **Suitable for ponds up to 36 m³**
- **Fish-friendly:** Additional oxygen enrichment through special water supply
- **All clear:** Guarantees clear pond water by combining mechanical/biological cleaning with effective UVC technology
- **Perfect fit:** Optimally adapted to the OASE AquaMax filter and watercourse pumps
- **Benefit:** Easy to hide as the filter housing can be buried to 1/3 of its height
- **Included:** Displays showing the degree of soiling and water temperature
- **Guaranteed:** Includes OASE clear water guarantee
- **Perfect package:** Incl. 100 ml BioKick filter starter*2

Very easy maintenance: After actuating the cleaning lever, the bottom drain can be opened and coarse dirt can be disposed of (BioSmart 18000/36000 only).

Nitrification and denitrification zone: Toxic degradation products such as ammonium, ammonia, nitrite and nitrate are effectively broken down in the various sponges.

POND MANAGER WITH AUTOMATIC SELF-CLEANING

FiltoMatic CWS

- **Suitable for ponds up to 25 m³**
- **Intelligent:** The automatic control system adjusts the filter performance to the seasonal needs of the pond
- **Goodbye mud:** Automatic mud discharge, meaning less cleaning effort
- **Economical:** Up to 40% energy savings through demand-driven UVC unit with patented self-cleaning and oxygen enrichment
- **Guaranteed:** Includes OASE clear water guarantee
- **Discreet:** Almost invisible; can be buried up to 70% at the edge of the pond
- **Convenient:** The filter sponges are especially easy to clean
- **Sophisticated:** Long service life combined with high-quality filter sponges provide optimal conditions for the filter biology
- **Goodbye algae:** Less thread algae due to constant phosphate and nutrient discharge
- **Interval cleaning:** UVC and pump function can also be controlled manually
- **Compact:** Particularly space-saving design
- **Clever design:** The UVC operating hours meter indicates when to replace bulbs

Cleaning: In addition to the fully automatic sludge discharge, sponge cleaning is carried out conveniently and without getting your hands dirty.

EXTRAS

AUTOMATIC CONTROL UNIT

The innovative control system ensures energy savings due to the temperature-controlled UVC unit and automatic cleaning intervals.

UNDERWATER FILTER WITH UVC AND WATER FEATURE

Filtral UVC

- **A good start:** Suitable for ponds up to 9 m³
- **Multi-talent:** With filter function, water feature and aeration nozzle (aeration nozzle included in delivery, from Filtral UVC 3000) Water feature and aeration nozzle available separately in GB
- **Guaranteed:** Includes OASE clear water guarantee
- **Control:** Individual control of water flow and fountain height
- **Adjustable:** Adjustable Y-distributor, for operating water spouts or small watercourses
- **Concealed:** Installation completely underwater, ensuring that the overall appearance of the pond remains undisturbed
- **Overview:** Thanks to UVC clarifier with optical function check

Joy and relaxation: Whether a gentle trickle or invigorating splashing – with the height-adjustable MAGMA, LAVA or VULCAN fountain attachments, you can bring variety to your water feature.

Innovative aeration function: The aeration nozzle provides additional oxygen input. A light flow is also generated in the pond, which leads to optimal filter results.

EXTRAS

RECOMMENDATION

To guarantee the full power of the UVC light waves, the UVC lamps should be replaced at regular intervals, ideally before the start of spring.

EFFECTIVE AND CONVENIENT PRESSURE FILTER

FiltoClear

- **Suitable for ponds up to 90 m³**
- **Cleaners:** Patented cleaning mechanism with optimised filter sponges
- **Convenient:** Easy to maintain and clean thanks to the simple pull-out mechanism
- **Easy to replace the lamp:** The UV lamp can be replaced during operation – no need to switch off the filter or dismantle the quartz glass
- **Secured:** The high-quality UVC housing protects the ballast from sunlight and moisture
- **2-way valve:** Select whether the water flows into the pond or into the waste water after cleaning the filter
- **Efficiency improvement:** The built-in OASE bypass technology ensures optimum water flow and prevents the filter from becoming clogged
- **High performance:** All the latest FiltoClear models feature upgraded, highly effective UV lamps
- **Strong and robust:** The tough housing made of high-quality plastic is easy to dig into the ground and impresses with its long durability
- **Clever:** The metal clamping ring with simple lever function makes opening and closing a FiltoClear easier and safer than ever
- **Guaranteed:** Includes OASE clear water guarantee

Convenient cleaning: Filter sponges can be cleaned quickly and easily using the patented pull-out mechanism.

Easy to replace the lamp: The UV housing can be easily removed during operation for replacing the integrated UV lamp.

Targeted drainage of dirty water: The dirty water is drained from the cleaned filter sponges via the two-way valve, for example into a flower bed.

Vitronic

- **Suitable for ponds up to 60 m³**
- **Greater clarity:** UVC irradiation destroys the cell structure of floating algae (green water), decimates harmful bacteria and germs and therefore effectively prevents their growth
- **Three inlets:** Individual options for attaching to a variety of OASE filter models (e.g. BioSmart), but also to third-party filters
- **Easy installation:** Simply attach the clarifier to the connecting hose between the pond pump and the filter
- **Easy assembly:** Extensive connection accessories, including high-quality UVC lights
- **Visibility:** Visual function check of the UVC light
- **Safe:** 100% VDE-certified safety; does not cause eye injuries
- **High quality:** Top workmanship with impact-resistant plastic housing
- **Easy:** Quick release for easy bulb replacement and for cleaning the quartz glass

Direct assembly on BioSmart: The 18–36 W Vitronic devices can also be mounted directly on the filter housing of the BioSmart and BioTec models.

UVC lamps in the glass tube: The use of high-quality UVC lamps guarantees a long service life and consistently good irradiation performance.

Control window: To check the lamp function (not included with Vitronic 11 W).

UVC CLARIFIER WITH PATENTED SELF-CLEANING AND BYPASS TECHNOLOGY

Bitron C

- **Suitable for ponds up to 110 m³**
- **Greater clarity:** UVC irradiation destroys the cell structure of floating algae (green water), decimates harmful bacteria and germs
- **Self-cleaning:** Highly effective UV radiation at all times thanks to patented, independent lamp cleaning
- **Automatic:** Due to the water flow, the cleaning rotor is continuously and automatically guided around the quartz glass tube and therefore prevents dirt deposits
- **Quick-release closure:** For easy opening of the lamp housing. To protect against eye damage, a safety switch automatically deactivates the UVC lamp
- **Safe:** 100% protection against eye damage
- **Included:** High-quality UVC lights
- **Quality:** High-quality design with impact-resistant plastic
- **Eye-catching:** Visual function check of the UVC light
- **Guaranteed:** Includes OASE clear water guarantee (in conjunction with the OASE flow-through filters BioSmart, BioTec and ProfiClear)
- **Synchronous:** Individual regulation of the water flow rate allows you to optimally tune the Bitron C to the connected filter pump
- **Integrated:** Magnets for protecting the filter equipment from lime deposits

Automatic cleaning rotor: Due to the water flow, the cleaning rotor is continuously guided around the quartz glass tube and therefore prevents dirt deposits.

Closure technology: Quick-release closure for easy opening of the lamp housing. A safety switch automatically deactivates the UVC lamp to protect against eye damage.

Throttle twist handle: For customisable regulation of the water flow rate.

Bitron Eco

- **Concentrated UVC power clarifies ponds up to 240 m³**
- **Feasible:** Easy connection to other 2" filter systems
- **Guaranteed:** Includes OASE clear water guarantee (in conjunction with the OASE flow-through filters BioSmart, BioTec and ProfiClear)
- **New:** Large-volume UVC housing with new design and organic shape, for a particularly long retention time and treatment of the water
- **Bypass:** The integrated bypass membrane regulates the water distribution fully automatically based on the water flow and adapts to changing conditions such as the Seasonal Flow Control System
- **Automatic:** The control unit not only automatically shows you the current status of your lamps and the water temperature, it also allows you to adjust the output according to your needs
- **Climate protection:** The eco mode saves up to 525 kg CO₂/year*²
- **Up to 50% less:** The eco control system enables maximum energy efficiency with such a high savings potential
- **Any time:** Fully effective UVC radiation thanks to patented automatic cleaning of the UV lamp
- **Effective:** Very intensive treatment of floating algae, turbidity and harmful bacteria in pond water
- **Safe:** 100% protection against eye damage

Direct assembly: on the ProfiClear Premium Compact M.

Automatic control unit: The control unit not only shows the current status of your lamps and the water temperature, it also allows you to adjust the output to suit your needs.

Automatic bypass regulation: The integrated bypass membrane regulates the water distribution fully automatically based on the water flow and adapts to changing conditions such as the Seasonal Flow Control System.

HIGHLY EFFICIENT – PERFECT FOR BOTH PUMPED AND GRAVITY FILTER INSTALLATIONS

Bitron Premium

- **Suitable for ponds up to 280 m³**
- **Cleaners:** Extremely effective elimination of algae and pathogenic bacteria; works in the same way as an immersion UVC
- **Guaranteed:** Clear water guarantee when used in conjunction with OASE ProfiClear filters
- **Safe:** 100% protection against eye damage
- **Highly effective:** Exceptionally effective sterilisation thanks to the extra-long retention time of the water in the Bitron
- **Perfected:** The flow-optimised reactor design ensures direct and almost loss-free UV radiation
- **Optional:** Horizontal or vertical installation
- **Flexible:** Can be connected either upstream or downstream of the ProfiClear filter system – also applies to other gravity applications
- **Expandable:** If you enlarge the size of your pond or increase the amount of fish stock, additional Bitron Premium UVC devices can be incorporated with ease
- **Check:** Visual function check
- **Simple:** Particularly straightforward installation using stainless-steel fasteners

Highly efficient: Perfect for both pumped and gravity filter systems.

Drain module gravity XL: Enlarged pump and UVC chamber for easy integration of AquaMax Eco Expert and AquaMax Eco Titanium filter pumps as well as the new Bitron Premium UVC pre-clarifiers.

Pump chamber: Can be optimally integrated into the ProfiClear Premium System.

AquaOxy

- **Suitable for ponds up to 50 m³ or with high fish stock**
- **Extremely quiet:** The precise airflow (2500 to 7500 l/h depending on the model) ensures that the device operates extremely quietly
- **Suitable adapter:** The standardised air outlet allows easy connection to any individual area on site
- **Top-quality motor:** Reliability – that is what this powerful, durable, quiet, economical and energy-efficient premium-class unit promises
- **New metal housing:** The robust and high-quality housing is splash-proof all around (IP44 degree of protection)
- **UV stable:** The plastic housing protects the air pumps from splashing water and allows them to be installed outdoors
- **Incl. accessories:** Air stones are included in the scope of delivery of the AquaOxy models 250–1000

From AquaOxy 1000

- Wear-free air stones
- Infinitely adjustable air flow rate

From AquaOxy 2500

- Finished with high-quality metal housing
- Can be used as ice preventer

Compact design, powerful result:

Despite high performance, the models are handy and can be stored in the filter chamber or outdoors next to the pond in a space-saving way.

Optimal accessories: For an even more optimal supply, the ventilation rod and the ventilation ring convert the generated fresh air volume flow in the water into thousands of the finest air bubbles.

PROVEN VENTILATION SYSTEM FOR THE POND

OxyTex Set

- **Standard OASE:** Unique combination of oxygen supply, water circulation and nutrient breakdown
- **Single:** The OxyTex – as a single product for already installed air pumps (including adapter for 9 mm hoses)
- **Ready to connect:** Ready-to-connect complete sets with AquaOxy and OxyTex air pump
- **Filter plus:** As an ideal supplement to FiltoMatic CWS and FiltoClear, the overall filter performance can be increased by up to 25%
- **Miraculously spacious:** Lots of space for microorganisms thanks to the area-optimised fibre structure
- **OASE expertise:** Patented technology
- **Attractive:** Pretty design in a plant-like look

IceFree 4 Seasons

- **Summer operation:** In summer, it is ideal for use as a water feature
- **Effective airflow:** Brings oxygen into the water and releases harmful digester gases
- **Cosy:** Maintains the warm temperature zones at the bottom
- **Submerged:** Extremely energy-efficient pump technology without additional heating element (requires depth of at least 80 cm)
- **Fish-friendly:** An ice-free area is created around the floating body down to -20°C

EXTRAS

RECOMMENDATION

For the IceFree to function reliably, a minimum water depth of 80 cm is recommended.

KEEPS YOUR POND SAFE OVER WINTER

IceFree Thermo

- **Small pond:** Due to an active heating element it is also suitable for shallow ponds and permanently cold frost periods
- **Effective airflow:** Brings oxygen into the water and releases harmful digester gases
- **Cosy:** Maintains the warm temperature zones at the bottom
- **Fish-friendly:** An ice-free area is created around the floating body down to -20°C
- **Frost monitor:** IceFree Thermo 330 has a frost-monitoring function. Because it only starts when there is a risk of frost, you do not pay for energy consumption on warmer days
- **Performance plus:** Clever resistance heating technology, for higher performance in the freezing range and protection against temperature damage in the air

EXTRAS

RECOMMENDATION

The IceFree 330 is particularly energy-saving. Thanks to the frost monitor function, it only activates when there is a real risk of frost on the water surface.

PRODUCT	ICEFREE THERMO 330
Dimensions (L x W x H)	300 x 135 x 334 mm
Rated voltage	220–240 V/50 Hz

Water Starlet/Quintet

• Water Starlet complete package

The scope of delivery includes five pumps and light rings, each with six warm white LEDs, a cable and a transformer

- **Protected LEDrings:** Ensures that the water jets are illuminated constantly
- **Varied water patterns:** Fixed programming ensures fascinating water patterns
- **Two options:** Floating or standing on the ground
- **Plug 'n' spray:** Quick and easy installation
- **Less maintenance:** Constant maintenance is a thing of the past
- **Nicer splashing:** Can also be used in swimming ponds
- **Compact:** Floating water feature with five fountain nozzles

• Water Quintet complete package

Everything included: five pumps, five nozzles, transformer, cables, external controller with remote control

- **High-quality enjoyment:** Water feature fountains illuminated with warm-white LEDs
- **Safety first:** Durable base plate protects against damage
- **Full flexibility:** The mounting surface can be selected freely
- **Fascinating fountains:** Fountain heights (30–140 cm) and light intensities are pre-programmed and ready to go
- **Ample freedom:** Control the programs from up to 80 m away simply via remote control
- **Sustainable:** Low energy consumption
- **Maintenance:** It couldn't be simpler

ACCESSORIES

WATER RESERVOIR SQUARE 120

The weather-resistant solution for flexible installation.

Item no.: 90199

EXTRAS

RECOMMENDATION

Spray water can be minimised by selecting a pond with a diameter of at least 3 m.

The Water Reservoir Square 120 can be extended with a pond liner, for example.

COLOURED WATER JETS – EVEN FOR SMALL AREAS OF WATER

Water Jet Lightning

- **Complete package:** Water Jet Lightning double set, pump (1500 l/h, 17 W), transformer, cable, external control system – everything you need in one set
- **Plug 'n' spray:** Quick and easy installation
- **Maintenance:** It couldn't be simpler
- **Fantastic colour:** Easily set your favourite colour
- **Free selection:** Programme selection from a distance of up to 80 m is possible via remote control
- **Jet stream:** The angles of the waterjets can be individually adjustable
- **Elegant and safe:** The high-quality stainless steel base can be screwed on, depending on the mounting surface
- **Sustainable:** Low energy consumption
- **To the minute:** Can be combined with a timer (not included)
- **Full program:** Four fixed programs with exciting combinations of multiple jet widths and RGB colours

EXTRAS

RECOMMENDATION

Enjoy the many different colours of the luminous water jets at dusk. They are shown to their best advantage in the evening light. To ensure that the water arcs retain their perfect shape, the installation should take place in a location that is protected from the wind. For perfect enjoyment ensure good water quality.

Aquarius Fountain Set Classic

- **Height-adjustable:** Position the water fountain as desired using the telescopic tube extension (including integrated swivel head)
- **Stable footing:** The supporting feet make it easy to position on the bottom of any pond
- **More water fun:** With a second, adjustable outlet for further features – from water spouts to mini watercourses
- **Now even better:** Energy consumption is reduced by up to 40% in comparison to previous models – yet it still boasts a higher water pressure and a higher flow rate
- **Adjustable:** Adjust the height of the fountain mechanically as desired
- **Included:** Three fountain attachments and a telescopic pipe extension with an integrated swivel head for a variety of water patterns
- **Clever design:** Optimised nozzle holder for precise, even water patterns
- **Thermal protection:** This feature ensures that the device is thermally protected

Aquarius Universal Classic

- **Pure lifestyle:** Can be enjoyed indoors or outdoors (440i only indoors)
- **High suction:** The pump conveys the water even when the water level is low
- **A feast for your ears:** Nothing but the sound of water splashing thanks to the extreme smoothness of operation
- **Flow rate:** Mechanically regulate the water flow rate quickly and easily
- **Well thought out:** Complete product series, with thermal protection
- **Universal:** From the Classic 600, installation can be either submerged or in dry conditions
- **Extra:** 1000 and 2000 series models are also available in the 12 V version

Examples of use: Aquarius Universal is ideal for small spring stones, statue and decorative fountains.

Aquarius Universal: For statue and decorative fountains, because even shallow water is optimally sucked in.

EXTRAS

RECOMMENDATION

For an attractive spring stone water pattern, the best way to choose a pump is to calculate 0.5–1 l/min water per cm of stone diameter.

Your OASE dealer will be happy to advise you.

LIGHTING CONCEPT

Tips for optimal showcasing of your garden

To design the lighting in your own garden, proper planning is essential. OASE offers garden owners a variety of ways to add a special charm to the greenery with cleverly placed lighting effects. Benefits of the OASE lighting range: The installation is simple, making the effect even more stunning. We are happy to help you decide which spotlight from the OASE LunAqua series is the right one to perfectly stage your garden. For this reason, we have pictured all the models in

one photo series. What makes these pictures special: So you can assess the light effect of the different spotlights, each of them is shown in an identical perspective – with a distance of 70 cm from the wall. Compare, select and create a magical, glowing oasis of tranquillity in your pond.

TIP

POWER SOURCES

Sufficient power sources throughout the appropriate parts of your garden facilitate the light installation. The remote-controlled FM masters (page 93) are a particularly practical solution. They allow the lighting to be conveniently controlled from the comfort of your terrace. The revolutionary Garden Controller Cloud even allows convenient app control from your smartphone or tablet.

Test it out!

*1 Further information on the energy efficiency class on page 116.

EXTRAS

WATTS DO NOT EQUAL OUTPUT

Most people's image of luminosity stems from a classic 25 W incandescent lamp. The economical LED lamps lack this relationship between power consumption and brightness. To compare the brightness of different lamps, the luminous flux (given in "lumens") is therefore what counts. To give an example: at 580 lumens, the luminosity of our LunAqua Power LED lamp is approximately equivalent to a 50 watt incandescent lamp. It only requires only 5.8 W for this luminosity. See the comparison diagram on the left for additional lamps.

SWITCH ON AND THEN SIT BACK AND RELAX –
WHEREVER YOU ARE.

OASE Control

On holiday or on the go, on the sofa or on a sun lounger: Control and monitor your garden technology and entire pond system, from filters to lighting, conveniently from your smartphone with the smart OASE Control system. Get push notifications about the status of your devices any time, anywhere, so you can respond when you need to. Experience a whole new dimension of convenience and relaxation.

Be it pump delivery, filter flushing or fountain height – all the functionalities of compatible pond devices can be easily controlled from your smartphone. You can also use the cloud version of the system as needed to check important parameters, such as the water temperature, and view interesting analyses of filter functions.

A fast response – anytime, anywhere: the InScenio FM-Master or Garden Controller is easy to connect to your home network. The additional benefit of the cloud variant is the ability to monitor from anywhere. Even when at work, travelling for business or on holiday with the family, garden and pond owners are notified immediately via email and push notification in the event of malfunctions and discrepancies. This gives you the opportunity to respond appropriately at any time. Peace of mind – wherever you may be.

LunAqua Connect: The system explained

The universal lighting system for gardens and ponds – flexible use for illumination of ponds, water features, flower beds, hedges and buildings.

Modular system

The LunAqua Connect system is a modular concept that can be expanded at any time. It can be started either with one of three sets or with individual components – depending on your application and requirements. Extension cables, outlet cables and three-way distributors can be used to provide light precisely where you need it in your garden and pond. Furthermore, the LunAqua Connect controller can be retrofitted later to enable smart control.

Smart control system

White spotlights can be operated either via the power supply or via the OASE Switch controller and app (controller is required for RGB lights). This control system enables you to dim white lights, select the colours of RGB lights and set the timer for both light types.

RGB light, white light or both!

The RGB and white lights feature IP68 degree of protection and are therefore suitable for permanent use under and above water. In addition, they can be easily controlled via the OASE Switch controller and OASE Switch app on your smartphone or tablet. Each controller has two outputs for white lights and one output for RGB lights.

Connections for white and RGB

The plugin connection technology with IP67 degree of protection allows temporary submersion (e.g. due to rainfall) in puddles and burying in flower beds, for example.

LunAqua Connect – step by step

Step-by-step guide to choosing the right lighting system for your garden and pond

1. Lights

Use the application overview to select suitable spotlights. (See page 80/81).

2. Optional control system

Add the OASE Switch controller as desired. (Required for RGB)

3. 36 W power supply

Add a power supply (total power consumption of all connected lights must not exceed 36 W)

4. Accessories (optional)

Choose accessories from 5 m and 10 m extension cables with four outlets and three-way distributors (available for both white and RGB)

Application areas

The LunAqua Connect system offers the right light for every garden application – whether under or above water.

Tip: Tall objects are best illuminated from the bottom upwards. Depending on the desired effect, it is worth experimenting to find the ideal distance between the light and the object and, if necessary, positioning the light slightly further away.

Bushes

Application	Small bushes up to 0.5 m high
Ideal light	LunAqua Connect S
Application	Large bushes up to 1 m high
Ideal light	LunAqua Connect M

Trees

Application	Small tree up to 2 m high
Ideal light	LunAqua Connect M (at least two lights)
Application	Medium tree up to 5 m high
Ideal light	LunAqua Connect L (at least two lights)

Ponds and water features

Application	Shallow and deep ponds and water features
Ideal light	LunAqua Connect S, LunAqua Connect M

Watercourses

Application	Watercourses, spring stones or waterfalls
Ideal light	LunAqua Connect S, LunAqua Connect M

Path lighting

Application	Edge lighting on paths to prevent tripping
Ideal light	LunAqua Connect S

Buildings and summer houses

Application	Illumination of walls up to approx. 1.50 m high
Ideal light	LunAqua Connect M
Application	Illumination of walls up to approx. 3 m high
Ideal light	LunAqua Connect L

Garden decoration

Application	Sculptures, ornaments, architectural objects up to 0.5 m high
Ideal light	LunAqua Connect S
Application	Up to 2 m high
Ideal light	LunAqua Connect M

Examples of combinations

The LunAqua Connect system adapts flexibly to your garden: Thanks to the extensive accessory range of cables and distributors, the system can be expanded at any time – whether it is controlled via the OASE Switch controller and app or not.

Example 1: White spotlights without control system

- 1x LunAqua Connect S spotlight (power consumption 2.5 W)
- 2x LunAqua Connect M spotlight (power consumption 2x 4 W)
- 1x LunAqua Connect three-way distributor
- 1x LunAqua Connect White 5 m extension cable
- 1x LunAqua Connect 36 W power supply

Total power consumption of spotlights:
 $2.5\text{ W} + 4\text{ W} + 4\text{ W} = 10.5\text{ W} < 36\text{ W}$ ✓

Example 2: RGB spotlights (control system required)

- 4x LunAqua Connect M RGB spotlight (power consumption 4x 7.5 W)
- 1x LunAqua Connect three-way distributor
- 1x LunAqua Connect RGB 10 m outlet cable
- 1x LunAqua Connect OASE Switch controller
- 1x LunAqua Connect 36 W power supply

Total power consumption of spotlights:
 $7.5\text{ W} + 7.5\text{ W} + 7.5\text{ W} + 7.5\text{ W} = 30\text{ W} < 36\text{ W}$ ✓

Example 3: White and RGB spotlights in one system (control system required)

- 2x LunAqua Connect M RGB spotlight (power consumption 2x 7.5 W)
- 1x LunAqua Connect S white spotlight (power consumption 2.5 W)
- 1x LunAqua Connect M white spotlight (power consumption 4 W)
- 1x LunAqua Connect RGB three-way distributor
- 2x RGB 5 m extension cable
- 1x white 10 m outlet cable
- 1x LunAqua Connect OASE Switch controller
- 1x LunAqua Connect 36 W power supply

Total power consumption of spotlights:
 $7.5\text{ W} + 7.5\text{ W} + 4\text{ W} + 2.5\text{ W} = 21.5\text{ W} < 36\text{ W}$ ✓

Example of use

Use of the system for gardens and ponds

HOW MANY LIGHTS PER SYSTEM?

The number of lights connected to the 36 W power supply must not exceed a total power consumption of 36 W. If the power consumption of 36 W is exceeded, an additional power supply and, if necessary, an additional controller are required to install a second system.

SMART CONTROL

The LunAqua Connect controller can be used to control both white and RGB spotlights from your smartphone or tablet using the OASE Switch app – at a distance of up to 40 m from the controller.

ONE CABLE FITS ALL

The 10 m outlet cable with four outlets enables lights to be easily positioned along flower beds, hedges or paths.

DIRECT CONNECTION TO A SOCKET

For white spotlights, it is not necessary to use the LunAqua Connect controller – the lights can also be operated via the power supply and corresponding two-pin extension cables and distributors. However, the controller can be retrofitted at any time to use the timer or to dim the spotlights via the OASE Switch app.

EXTENSION

Every cable from the controller or power supply can be extended as desired (up to 100 m per cable), enabling them to reach even the furthest corners of your garden.

IP67* CONNECTION TECHNOLOGY

The robust plugin connections mean that the cables and connectors can easily withstand rain showers and puddles and can also be buried.

IP68 SPOTLIGHTS

The LunAqua Connect spotlights are all suitable for permanent operation under water – no matter whether in a pond, in shallow water or for illuminating water features.

*IP67 is suitable for temporary submersion under water.

LunAqua Connect Starter Set

controllable

- **Everything included:** Complete set of 1x M white spotlight and 1x M RGB spotlight, one OASE Switch controller and one 36 W power supply
- **Excellent light quality:** A high colour rendering index (CRI) of over 90 ensures natural, intense lighting with rich colours
- **Smart:** Easy control of dimming, colour selection and timer via the OASE Switch controller and app for smartphone or tablet*³
- **RGB, white or both:** RGB and white lights can be controlled in one system via the OASE Switch controller and app and can be expanded at any time (two white cables and one RGB cable per controller)

PRODUCT	LUNAQUA CONNECT STARTER SET CONTROLLABLE
Dimensions (Ø x H)	61 x 98 mm
Rated voltage (primary, secondary)	230 V AC/24 V DC
Lamp power consumption	M spotlight 4 W, M RGB spotlight 7.5 W
Energy efficiency class of lamp ^{*1}	G
Guarantee (+ request guarantee) ^{*p, 119}	2 + 1 years
Luminous flux	250 lm/217 lm
Item no. (GB Version)	-
Item no.	74350

LunAqua Connect Set 3

- **Universal lighting system: For gardens and ponds** IP68 spotlights and IP67 connection technology for use in flower beds, along hedges, for ponds and water features
- **Smart:** Dimming or setting time scenarios – all simple using the LunAqua Connect OASE Switch controller and OASE Switch app via smartphone or tablet
- **Outstanding product design:** Light-resistant surface and clever installation properties such as a weighted base with screw holes, height adjustment extender and adjustable head
- **Flexible, expandable system:** Easy to install and can be retrofitted at any time with 3 m cable on the spotlight and optional 5 m extension cable, 10 m cable with 3 outlets and 3-way distributor for white and RGB spotlights

PRODUCT	LUNAQUA CONNECT S SET 3	LUNAQUA CONNECT M SET 3
Dimensions (Ø x H)	53 x 87 mm	61 x 98 mm

Item no.	87506	87501

^{*1} Further information on the energy efficiency class on page 116.
System requirements: iOS 12.5.0 (Apple) or Android version 8.0 or later is required to run the app on mobile devices.

LUNAQUA CONNECT – THE FLEXIBLE MODULAR SYSTEM FOR GARDENS AND PONDS

LunAqua Connect M Solo RGB

- **Flexible use:** RGB light for operation under and above water with 3 m cable (IP68 spotlights and IP67 connection technology for temporary submersion)
- **Smart control:** Select colours and set the timer using the OASE Switch controller and a smartphone or tablet (controller and power supply required, not included)
- **LunAqua Connect:** Modular lighting system for gardens and ponds that can be expanded at any time thanks to an extensive accessory range consisting of extension cables and distributors

PRODUCT	LUNAQUA CONNECT M SOLO RGB
Dimensions (Ø x H)	61 x 98 mm
Rated voltage (primary, secondary)	230 V AC / 24 V DC
Lamp power consumption	7.5 W

LunAqua Terra LED

- **Waterproof in accordance with protection class IP68:** No water entry possible! Thanks to the high-quality design according to protection class IP68, the lamp is suitable for permanent, safe operation above and under the water (connection: IP44)
- **Included:** Six-way distributor and low-voltage plug-in transformer (sets)
- **Robust and economical:** Traversable, energy-efficient LED light
- **High quality:** Made from shiny stainless-steel material
- **Easy clip:** With a stainless steel clip for mounting in a 40 mm hole – no sleeve required
- **Warm white:** LED light with pleasantly diffused warm white light

PRODUCT	LUNAQUA TERRA LED SET 6	LUNAQUA TERRA LED EXTENSION CABLE 10 M

RADIANT LED ILLUMINATION FOR SPRING STONES

LunaLed

- **Flood light:** Beam angle of the LED: 72°
- **Included:** Low-voltage plug-in transformer included in the scope of delivery
- **Waterproof:** Protection class IP68 – suitable for permanent underwater use
- **Simple to install:** The innovative hose connector makes it possible: Simply feed the mains cable through the opening – it is not necessary to thread it through the entire length of the hose
- **Cool light:** With six or nine cold-white LEDs

SMALL AND COMPACT WITH HIGH LUMINOSITY

LunAqua Power LED

- **Robust:** Spotlights, drivers and cables can be safely used in water up to 4 m deep (in accordance with standards, it is not possible to use the driver underwater in swimming ponds)
- **Upgradable:** A 10 m cable is available as an accessory to extend the distance between the light and the driver (max. 4x per line)
- **Highlight:** Bright light with low power consumption: One of the brightest LED spotlights in the OASE pond lighting range
- **Efficient:** As bright as a 50 W incandescent lamp with a power consumption of only 5.8 W
- **Durable:** The excellent thermal management and the high LED quality enable a service life of more than 36,000 hours
- **Compact:** Attractive small spotlight with robust underwater connection technology
- **Safe:** Also suitable for use in swimming ponds thanks to its low voltage (24 V DC)
- **Expandable:** Up to four lights per set with the separately available LunAqua Power LED W

SIMPLE AND ECONOMICAL: CREATE A COLOURFUL LED SEA OF LIGHTS VIA APP

ProfiLux Garden LED RGB

- **Control a colourful sea of lights via app:** Colourful RGB effects are easily controllable via app with OASE Control
- **Want more?** ProfiLux Garden LED RGB is expandable by up to four lights per controller
- **Docking:** Directly compatible with light fixtures from the OASE Fountain Technology range
- **Thought of everything?** You will also need the following accessories: ProfiLux Garden LED controller, OASE Control connection cable, InScenio FM-Master Cloud
- **Patented:** Robust spotlight with protection class IP68 and OASE underwater connection technology
- **Robust:** Spotlights, drivers and cables can be safely used in water up to 4 m deep (in accordance with standards, it is not permissible to use the driver underwater in swimming ponds)

LunAqua Power LED XL

- **Colour design:** A colour temperature of 3000 Kelvin is well suited to showcasing red objects; lights with 4000 Kelvin are particularly suitable for emphasising green tones (bamboo, hedges etc.)
- **Durable:** The excellent thermal management and high LED quality enable a service life of more than 50,000 light hours
- **Thought of everything?** Accessories for an immediate start: LunAqua Power LED Driver with connection possibilities for up to four spotlights (2x LunAqua Power LED XL or 1x LunAqua Power LED XL and 2x LunAqua Power LED or 4x LunAqua Power LED)
- **Included:** 1 spotlight with 5 m cable and 1 peg
- **Individual:** Available in four different beam angles (Narrow Spot, Spot, Flood, Wide Flood)
- **Safe:** Also suitable for use in swimming ponds thanks to its low voltage (24 V DC)
- **Robust:** Spotlights, drivers and cables can be safely used in water up to 4 m deep (in accordance with standards, it is not permissible to use the driver underwater in swimming ponds)

CONTROLS OASE CONTROL TECHNOLOGY BY APP OR COMPUTER

Garden Controller Cloud

- **OASE Control:** Up to 12 OASE Control-enabled devices (pumps, filters, lighting) can be connected, controlled and monitored
- **Compatible with the app:** Simply download the OASE Control app (App Store or Play Store), register and get started*
- **Cloud-compatible:** Accessible worldwide via the free OASE Cloud
- **Year-round:** The housing is protected against splashing water (IP68) and can be operated outdoors all year round
- **Included:** Flexible mounting material for wall mounting or peg mounting included in the set

* **System requirements:** iOS 12.5.0 (Apple) or Android version 8.0 or later is required to run the app on mobile devices.

EXTRAS

RECOMMENDATION

The OASE Control app is compatible with iOS or Android mobile devices. As soon as updates that may be of interest to you are available, you will receive information about how to download these for free. To ensure the best possible Wi-Fi connection range (2.4 GHz) from the device or the router, make sure that the field of view between the smartphone/tablet and the Garden controller is clear. Commercially available repeaters can be used to extend the range further.

Item no.	55433	36310

A full-page background image of a garden pond. In the foreground, a wooden deck is visible with several purple flowers. The pond's surface is dark and reflects the surrounding greenery and the bright sky. A black net is being used to skim the water's surface, creating a splash. The background is filled with lush green plants and trees, with a bright sun shining through the clouds in the upper right corner.

FLOATING FOR CLEAR WATER SURFACES

SwimSkim

- **Superskimmer:** Effectively skims pond surfaces of up to 50 m²
- **Automatic:** Adapts to any water level from a depth of 40 cm
- **Venturi function:** Prevents sediment at the bottom of the pond
- **Low consumption:** Particularly energy-saving eco motor technology
- **OASE expertise:** Particularly effective suction performance thanks to patented hinge technology
- **Deep view:** Removes dirt directly on the surface – experience significantly better water quality and deeper visibility
- **Injector:** For better oxygen supply to the pond

PRODUCT	SWIMSKIM 25	SWIMSKIM 50
Dimensions (L x W x H)	332 x 297 x 263 mm	450 x 400 x 390 mm
Rated voltage	220–240 V/50 Hz	220–240 V/50 Hz
Power consumption	40 W	45 W
Power cable length	10.00 m	10.00 m
Filter volume	0.9 l	4.5 l
Max. pump output	2500 l/h	3500 l/h
Max. pond surface area	25 m ²	50 m ²
Venturi function	No	Yes
Item no. (GB Version)	50124	-
Item no.	57384	50170

VARIABLE STANDING AND GRAVITY-FED SKIMMER

AquaSkim

- **Superskimmer:** Effectively skims pond surfaces of up to 50 m²
- **Ideal:** Perfectly suited to working in conjunction with all AquaMax Eco Premium filter and watercourse pumps
- **Compatible:** The AquaSkim Gravity – with high-quality DN 160/110 adapter, for easy integration into DN 110 line systems
- **Nice and easy:** The easily accessible coarse dirt basket makes device maintenance a breeze
- **Hands on:** The dirt basket can be removed even from a distance thanks to the practical grip hooks
- **Perfect:** Ideally, run the AquaSkim 20 with the AquaMax Eco Premium 5000–9000 pump
- **Deep view:** Removes dirt directly on the surface – experience significantly better water quality and deeper visibility
- **Stability:** Fill the large tray on the stand with stones to weigh it down

PRODUCT	AQUASKIM 20	AQUASKIM 40	AQUASKIM GRAVITY
Dimensions (Ø x H)	350 x 800 mm	350 x 800 mm	170 x 260 mm
Height adjustment	370–850 mm	380–880 mm	-
Filter volume	1.2 l	1.4 l	1.4 l
Possible water level difference	100 mm	120 mm	120 mm

SKIMMER FOR INSTALLATION AT THE POND EDGE

BioSys Skimmer +

- **Superskimmer:** Effectively skims pond surfaces of up to 50 m²
- **Best choice:** For operation with the optionally available AquaMax Eco filter pumps (in the integrated pump vault)
- **Firmly fixed:** Install the skimmer directly on the edge of the pond, firmly in the soil
- **Simple:** Simply flange the skimmer onto the pond liner
- **Convenient:** Coarse dirt is particularly easy to remove
- **Included:** Cover with natural rock-like appearance is included
- **Adjustment** The skimmer independently adapts to fluctuations in water level up to 100 mm

PRODUCT

BIOSYS SKIMMER +

Dimensions (L x W x H)	580 x 400 x 450 mm
Possible water level difference	100 mm
Filter volume	12 l
Max. pond surface area	50 m ²
Min./max. pump capacity	6000/16,000 l/h
Outlet connections	25/32/38 mm (1", 1 1/4", 1 1/2")
Item no. (GB Version)	-
Item no.	57137

THE PROFESSIONAL FOR SHALLOW WATER ZONES

ProfiSkim Wall / ProfiSkim

- **Add-on:** Perfect supplement for gravity or pumped filter systems
- **Firmly fixed:** Stable base made of stainless steel
- **You choose:** Can be used in either gravity (DN 110) or pumped operation (includes 2" adapter [50 mm])
- **Ideal:** For use in the shallow water zone
- **Effective:** Optimal water supply ensures enormous suction power
- **Easy clean:** Large, easy-to-clean stainless-steel basket with 8 mm mesh width (ProfiSkim 100 + Premium)

PRODUCT

PROFISKIM WALL 100

PROFISKIM PREMIUM

Dimensions (L x W x H)/(L x W)	273 x 267 x 408 mm	500 x 340 mm
Height adjustment	-	350-550 mm
Outlet connections	DN 110	50 mm (2"), DN 110
Rec. Flow rate (pumped)	-	6000-16,000 l/h
Rec. Flow rate (gravity)	12,000 l/h	6000-12,000 l/h
Filter volume	-	7 l
Max. pond surface area	30 m ²	65 m ²
Item no. (GB Version)	-	Not available in GB
Item no.	70895	51185

TIP

It is best to include the ProfiSkim Wall during the planning stage of the pond construction. This is much easier than retrofitting.

PondoVac Classic

- **1400 watts:** Effective sludge removal thanks to powerful 1400 W motor
- **Depth penetration:** Achieves a maximum suction depth of 2 m
- **High suction:** Achieves up to 3000 l/h, depending on the operating conditions
- **Smart:** Fully automatic activation and emptying thanks to intelligent motor electronics
- **Control:** The transparent suction tube lets you keep an eye on the flow at all times
- **Design:** Compact and with a 27 litre dirty water tank

PRODUCT	PONDOVAC CLASSIC
Dimensions (L x W x H)	370 x 370 x 580 mm
Power consumption	1400 W
Power cable length	4.00 m
Warranty ^{*) p. 119}	2 years
Max. suction depth	2.00 m
Max. flow rate (litres per hour)	3000 l/h
Length of suction hose	4.00 m
Length of discharge hose	2.00 m
Item no. (GB Version)	50110
Item no.	50529

CONVENIENT AND EFFECTIVE – WITHOUT IRRITATING INTERRUPTIONS

PondoVac 3

- **Move it:** Thanks to its transport wheels and adjustable handle, you can move your PondoVac 3 quickly and with little effort
- **Versatile:** You can use your PondoVac 3 to clean garden ponds, swimming pools or natural pools. Or use it as a powerful wet vacuum cleaner in your home or business premises
- **Depth penetration:** Achieves a maximum suction depth of 2.10 m with its powerful 1600 W motor
- **High suction:** Achieves up to 4000 l/h, depending on the operating conditions
- **Control:** The transparent suction tube lets you keep an eye on the flow at all times
- **Non-stop technology:** The two cylinders of the same size in the two-chamber system fill and empty simultaneously, in an alternating fashion. This enables non-stop suction

PRODUCT	PONDOVAC 3
Dimensions (L x W x H)	435 x 395 x 670 mm
Power consumption	1600 W
Power cable length	4.00 m
Guarantee (+ request guarantee) ^{*) p. 119}	2 + 1 years
Max. suction depth	2.10 m
Max. flow rate (litres per hour)	4000 l/h
Length of suction hose	4.00 m
Length of discharge hose	2.50 m
Item no. (GB Version)	37148
Item no.	37102

POWERFUL POND AND POOL VACUUMS – WITHOUT IRRITATING INTERRUPTIONS

PondoVac 4

- **Non-stop technology:** The two cylinders of the same size in the two-chamber system fill and empty simultaneously, in an alternating fashion. This enables non-stop suction
- **Versatile:** You can use your PondoVac 4 to clean garden ponds, swimming pools or natural pools. Or use it as a powerful wet vacuum cleaner for your home or business premises
- **Manual:** With hand-held controls for regulating the suction power
- **Control:** The transparent suction tube lets you keep an eye on the flow at all times
- **Depth penetration:** Achieves a maximum suction depth of 2.40 m with its powerful 1700 W motor with optimised blade geometry
- **Move it:** With its transport wheels and adjustable handle, you can move your PondoVac quickly and with little effort
- **High suction:** Achieves up to 5000 l/h, depending on operating conditions

EXTRAS

TWO-CHAMBER SYSTEM

Two cylinders of the same size are alternately filled and emptied at the same time, therefore enabling continuous vacuuming.

PRODUCT

PONDOVAC 4

Dimensions (L x W x H)	435 x 395 x 670 mm
Power consumption	1700 W
Power cable length	4.00 m
Guarantee (+ request guarantee) ²⁰⁻¹¹⁹	2 + 1 years
Max. suction depth	2.40 m
Max. flow rate (litres per hour)	5000 l/h
Length of suction hose	5.00 m
Length of discharge hose	2.50 m
Item no. (GB Version)	42939
Item no.	50388

PondoVac 5

- **Flexible:** Drain away any amount of dirty water
- **Double equipped:** The drain hose has a C-connection on both sides
- **Non-stop technology:** With an integrated drainage pump for non-stop suction
- **Manual:** With hand-held controls for regulating the suction power
- **Versatile:** You can use your PondoVac 5 to clean garden ponds, swimming pools or natural pools. Or use it as a powerful wet vacuum cleaner in your home or business premises
- **Depth penetration:** The PondoVac 5 achieves a maximum suction depth of 2.50 m with its powerful 1700 W motor with optimised blade geometry
- **Control:** The transparent suction tube lets you keep an eye on the flow at all times
- **Suction monster:** Depending on the conditions of use it can achieve a suction capacity of up to 8000 l/h
- **Goodbye waste water!** Pumps out waste water even at different heights
- **Big wheel design:** More ground clearance, noise-reducing tyres included
- **Move it:** With its transport wheels and adjustable handle, you can move your PondoVac quickly and with little effort

ACCESSORIES

Telescopic pole PondoVac Item no. 40303

Floating hose set PondoVac 5

Set consists of 8 m, Ø 38 mm floating hose and adapter for using the nozzle attachments included in the delivery.

Item no. 41984

PRODUCT

PONDOVAC 5

Dimensions (L x W x H)	436 x 425 x 716 mm
Power consumption	1700 W
Pump power consumption	900 W
Power cable length	7.50 m
Guarantee (+ request guarantee) ^{*) p. 119}	2 + 1 years
Max. suction depth	2.50 m
Max. flow rate (litres per hour)	8000 l/h
Length of suction hose	5.00 m
Length of discharge hose	8.00 m
Item no. (GB Version)	41983
Item no.	41982

FOR RELAXED WORK IN AND AROUND THE GARDEN POND

Useful pond aids

AQUANET POND NETS

Protects the pond from leaves in autumn

- Prevents sludge from building up at the bottom of the pond and fermentation gases from forming due to falling branches and leaves
- Weather-resistant and robust net with 20 mm mesh width
- Includes pegs for attachment
- Available in sizes 3 x 4 m, 4 x 8 m and 6 x 10 m

AquaNet pond net 1 / 3 x 4 m

Item no. 53751

Not available in GB

AquaNet pond net 2 / 4 x 8 m

Professional pond net

Algae nets

AquaNet pond net

DIPPING NETS

For work on the garden pond

- Various fishnets from a mesh size of 6 mm for releasing and catching fish
- Fine-meshed pond and algae nets for effortlessly removing fine algae and plant residues (from a mesh size of 0.3 mm)
- Professional pond and fish nets with telescopic handle and a total length of up to 2.3 m
- Easy to use thanks to the handles
- Made from anodised aluminium

POND GRABBERS/POND SHEARS

Pond cleaning without getting your hands dirty

- EasyPick premium telescopic pond tongs for gripping and removing cut material or leaves in and around the pond
- Shears for cutting work in and around the garden pond
- Tongs for removing foreign bodies and plant residues from the garden pond
- The clever item for fast and comfortable work: The 1.6 m long FlexiCut 2 in 1 cuts while remaining steady. The adjustable head protects the pond liner from cuts and allows convenient working
- FlexiCut shear head available as spare part from OASE (item no. 51272)

EasyPick

A-B-C-D CONCEPT

Typical pond problems – our solutions

Pond water quality is key for plants and pond inhabitants.
The OASE pond care concept consists of **three stages** plus disinfection and cleaning for ornamental fountains, large ponds and swimming ponds without living organisms.

A: Improve water quality

Natural preparation and enrichment of pond water

B: Bind nutrients

Nutrient binding without biocides

If A and B are not sufficient, then follow with C.

C: Combat algae

OASE algaecides against excessive and therefore harmful algae growth

D: Cleaning and maintenance

Effective for water features without living organisms

FOR USE IN FILTERS AND PONDS

Starter cultures

They provide the crucial kick-start in the filter and pond, which is vital for the biological balance of the water.

The OASE test sets always give you a clear overview of your water quality. This allows you to detect problems early on and take countermeasures before fish or plants are damaged.

OASE TEST SET

QuickSticks 6in1

WATER ANALYSIS

- **Six-in-one:** Quick and easy analysis of the six most important water parameters
- **Good price/performance:** Enough to test 50 water samples, i.e. 300 parameters
- **Works fast:** Only takes one minute

Item no. 50570

BioKick

STARTER CULTURES FOR USE IN FILTERS AND PONDS

- **Starting aid:** Awakens the pond biology in the filter during spring
- **Performance booster:** Immediately active microorganisms for best filter performance

Ponds up to max.	(m³) 5.00	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	Not available in GB	75834	Not available in GB
Item no.	51277	50295	50939

BioKick Fresh

STARTER CULTURES FOR USE IN FILTERS AND PONDS

- **Starting aid:** Activates the pond biology in the filter in spring or upon restarting the pond
- **Billions strong:** Contains more than 1 billion microorganisms* (*at the time of filling)
- **Performance booster:** Optimum pond filter performance reached within just 1–2 weeks

Ponds up to max.	(m³) 10.00
Item no. (GB Version)	75837
Item no.	50562

BioKick Premium

HIGHLY CONCENTRATED STARTER CULTURES FOR USE IN FILTERS AND PONDS

- **Thorough cleaning:** Highly concentrated filter bacteria for filter systems handling heavily contaminated water
- **Billions strong:** Contains more than 50 billion microorganisms (at the time of filling)
- **Performance booster:** Optimum pond filter performance reached within just a few days

Ponds up to max.	(m³) 40.00
Item no. (GB Version)	-

Filter performance within	a few weeks	1–2 weeks	a few days

OPTIMALLY SUPPORT POND BIOLOGY – WITH A TWO-PHASE EFFECT

A: Improve water quality

Safe use

For fish stocks, the DuoBoost balls can be put into a practical net.

Rapid development of the filter biology

To support the pond biology, the DuoBoost balls can be inserted directly into the filter.

Basis for clear water

By supporting pond biology and improving water values, the basis for a healthy water is created.

78110: Ø 5 cm

78111/78112: Ø 2 cm

DuoBoost

EFFECTIVE WATER PURIFIER

- **Basis for clear water:** Positively influences pond biology
- **Straightforward:** Place the gel and ball directly in the filter or pond; if the pond contains fish, place the balls in the enclosed net
- **For all pond types:** Important trace elements and minerals for all types of pond
- **Two-phase effect:** Use in two phases: 1. A gel made of highly active enzyme and bacterial fluid to break down organic pollutants, ammonium and nitrites, and to activate the filter biology. 2. Soluble balls with a diameter of 2 cm or 5 cm. These balls release important trace elements, cosubstrates, minerals and valuable additives into the pond.

	Ø 5 cm	Ø 2 cm	
Ponds up to max.	(m³) 20.00	(m³) 30.00	(m³) 90.00
Item no.	78110	78111	78112

INFO

DuoBoost has been specially developed to support pond biology. It consists of two complementary phases of action:

The **first phase of action** is a **gel** that is placed straight in the pond or the filter chamber. This gel is a highly active fluid containing enzymes and bacteria that removes organic dirt, ammonium and nitrite. The filter bacteria are activated at the same time.

The **second phase of action** is a **ball** measuring 2 cm or 5 cm in diameter that dissolves over time, releasing important trace elements, cosubstrates, minerals and valuable additives that are otherwise difficult to put into an artificial pond.

The **treatment** with DuoBoost can be repeated several times a year if required. Both phases lay the foundations for achieving clear, healthy water and exceptional pond biology. However, if the water is green, you should use a UVC clarifier to remove the algae causing the problem.

BASIS FOR STABILISING WATER

Water treatment

OptiPond

STABILISES THE MOST IMPORTANT WATER VALUES

- **Purifier:** Treats soft well water and rainwater to ensure that it is suitable for the application
- **Supplement:** Adds essential minerals and macro elements
- **Instant aid:** Helps to resolve acute problems caused by excessive levels of ammonia, nitrite or heavy metal in the pond

Ponds up to max.	(m³) 5.00	(m³) 50.00
Item no. (GB Version)	75823	-
Item no.	50557	50558

Safe&Care

WATER TREATMENT WITH MUCOSA PROTECTION

- **Purifier:** Treats filling water so that it is suitable for fish and biotopes
- **Eliminator:** Quickly and reliably binds heavy metals and removes chlorine
- **Fish friendly:** Protects mucous membranes from becoming irritated and strengthens the gills
- **No stress:** Reduces the stress levels of fish using vitamin complexes

Ponds up to max.	(m³) 10.00
Item no. (GB Version)	70449
Item no.	50563

BioKick Care

BIOLOGICAL POND CARE

- **Activator:** Revitalises the pond water by introducing particularly important bacterial strains
- **Clarifier:** Creates sustainably healthy, very clear pond water, ensuring visibility right into the depths
- **Colour booster:** These natural minerals enhance the colouring of your fish
- **Probiotic:** Valuable probiotics boost the immune system and enhance the well-being of your fish

Ponds up to max.	(m³) 40.00
Item no. (GB Version)	Not available in GB
Item no.	51288

PROBLEM SOLVER:

SediFree

EFFECTIVE AGAINST POND MUD

- Contains high-performance bacteria to degrade organic sludge deposits
- Accelerates sludge removal effectively – using 2-component technology with active oxygen granulate
- Works naturally
- Prevents both of the following in a targeted way: Sludge formation and prolonged turbidity

Ponds up to max.	(m³) 5.00	(m³) 100.00
Item no. (GB Version)	75820	-
Item no.	50560	50561

OxyPlus

INCREASES THE OXYGEN CONTENT

- Prevents the formation of dangerous gases
- With controlled sustained release
- Rapid remedy in case of oxygen deficiency, e.g. in the case of algae outbreaks or nitrite poisoning
- Supports biological self-cleaning. Removes brown water discolourations

Ponds up to max.	(m³) 10.00
Item no. (GB Version)	75828
Item no.	50559

INFO

Dechlorinator reliably detoxifies chlorine-contaminated tap water. Ideal for filling ponds and aquariums.

Item no.: 48790

B: Bind nutrients

PondLith

PROTECTION AGAINST ALGAE OUTBREAKS

- **High purity:** Finest natural zeolite, in the grain size 5–10 mm. In a practical filter media bag
- **High performance:** Particularly powerful filter material for the removal of nitrogen compounds
- **For emergencies:** Quick aid in case of ammonium excess
- **Let's get started:** Ideal support of your filter during the run-in phase
- **Starved out:** Leaves algae without important food sources

Ponds up to max. (m³) 2.50
Item no. Not available
(GB Version) in GB
Item no. 54049

PhosLess Direct

ALGAE PROTECTION BY BINDING NUTRIENTS

- **Live physics:** Physically removes the phosphate that algae feeds on
- **Easy on the nose:** Effectively binds to hydrogen sulphide before unpleasant odours can occur
- **For emergencies:** Rapid aid for elevated phosphate levels

Ponds up to max. (m³) 10.00 (m³) 100.00
Item no. 75817 -
(GB Version)
Item no. 51284 51287

AquaHumin

NATURAL NUTRIENT REMOVAL

- **Humin substances:** Special peat for the garden pond
- **Useful:** Unaltered natural product

Ponds up to max. (m³) 10.00
Item no. Not available
(GB Version) in GB
Item no. 53759

PhosLess

BIOLOGICAL PROTECTION

- **Eliminator:** Quickly and reliably binds chlorine and heavy metals such as copper, lead and zinc
- **Reliable supply:** Also available in a useful refill pack
- **Duo-Tec:** Particularly effective thanks to the two-component technology in the exchange system
- **Permanent solution:** Effectively removes phosphate for the long-term
- **Live physics:** Physically removes the phosphate that algae feeds on

Ponds up to max. (m³) 40.00 (m³) 40.00
Item no. -
(GB Version)
Item no. 36981 57477

Phosphate binding
in perfection
with PhosLess
Flow 3000
cartridges

PhosLess Flow 3000

REMOVAL OF PHOSPHATES

- Ideal start for phosphate levels > 0.2 mg/l
- Binding capacity: 90 g PO₄³⁻
- Prepares the pond for use of the PhosLess PowerFlow

Item no. -
(GB Version)
Item no. 48792

PhosLess Power Flow 3000

HIGHLY REACTIVE ABSORBER

- Significantly reduces the phosphate content below the minimum algae requirement
- Recommended for sustainable use from values < 0.2 mg/l
- Binding capacity: up to 150 g PO₄³⁻
- For swimming ponds up to 75 m³ usually sufficient for one swimming season

Item no. -
(GB Version)
Item no. 48791

Secure Flow 3000

PRE-FILTER FOR PHOSLESS FLOW

- With easy-to-rinse glass beads
- Required if pre-filtered water is not available

Item no. -
(GB Version)
Item no. 48793

CREATES CLEAR POND WATER

C: Combat algae

PondClear*

CREATES CRYSTAL-CLEAR WATER

- **Perspective:** Makes cloudy ponds clear again
- **Micro-effective:** Reliably combats even the finest, unfilterable impurities
- **Get rid of it:** Helps you safely remove phosphates

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	70453	-
Item no.	50552	50555

AlGo Direct*

RAPIDLY EFFECTIVE AGAINST
THREAD ALGAE

- **Works!** Works through direct contact
- **Precise:** Ideal for treating localised infestations, e.g. in watercourses
- **Includes:** a KH rapid test for safe application
- **Bathing day:** Also suitable for use in swimming ponds

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	70451	-
Item no.	50546	50549

AlGo Universal*

EFFECTIVE ALGAE CONTROL

- **Works!** Powerful aid for combating the most common types of algae, such as thread algae, slime algae and brown algae
- **Slowing down:** Effectively slows down algal metabolism
- **Reducer:** Significantly reduces the formation of new algae

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	70450	93593
only available in GB		

AlGo Greenaway*

FOR CRYSTAL-CLEAR POND
WATER

- **Floated out:** Sustainably eliminates floating algae – the cause of green water
- **Effective:** The ideal alternative for preventing green and blue algae growth
- **Extremely simple to use.** Officially certified and approved biocidal product

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	70452	not available in GB
Item no.	40235	96556

AlGo Universal Plus*

EFFECTIVE ALGAE CONTROL

- **New recipe:** With the same benefits
- **Works!** Powerful aid for combating the most common types of algae, such as thread algae, slime algae and brown algae
- **Slowing down:** Effectively slows down algal metabolism

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	not available in GB	
Item no.	97599	96685

RECOMMENDATION

Many AquaActiv products are also available in attractively priced large containers.

D: Cleaning and maintenance

AIGo Fountain*

ALGAE PROTECTION FOR WATER FEATURES

- **Hassle-free:** Thanks to long-lasting effects
- **Indoors and outdoors:** Keeps ornamental fountains and other decorative water features sparkling fresh and clear
- **Instant aid:** Urgent assistance against algae, odours and slippery surfaces
- **Stops limescale:** Prevents limescale buildup

Ponds up to max.	(m³) 0.20	(m³) 10.00
Item no. (GB Version)	75803	-
Item no.	51278	40234

OxyPool*

CHLORINE-FREE POND PROTECTION

- **Cleaner:** Reliably eradicates algae, bacteria and fungi without the use of chlorine
- **Versatile:** Suitable for animal-free water bodies, e.g. pools, water features, fountains or ponds
- **Germ-free:** With disinfecting properties

Ponds up to max.	(m³) 100.00
Item no. (GB Version)	Not available in GB
Item no.	88252

PumpClean*

CLEAN POND TECHNOLOGY WITH EASE

- **Effective:** Gently cleans pond equipment such as pumps, strainers, quartz glass etc.
- **Works!** Reliably removes limescale and other deposits within 24 hours
- **Concentrated:** Makes a total of 10 l of cleaning solution
- **Long life:** Significantly prolongs the service life of your pond pump

Item no. (GB Version)	75806
Item no.	40242

comprehensive pond
hygiene

THE RIGHT PRODUCT FOR EVERY SEASON

Pond care with AquaActiv

Spring

PURIFY WATER, ACTIVATE POND BIOLOGY AND BIND NUTRIENTS AT THE START OF THE SEASON

- **OptiPond** standard care for optimal water conditions
- **BioKick** filter starter gets the filter biology going
- **PondLith Zeolite** reduces ammonium or nitrite during the startup phase
- **QuickSticks** and **water analysis set** monitor the water values
- **PhosLess** reduces phosphates and helps prevent thread algae
- **SediFree** reduces deposits on the bottom – ideally combined with the PondoVac
- **Fish medicine** provides a remedy for diseases affecting the fish stock

Summer

SUMMERTIME IS ALGAE TIME

- Effectively combat algae in three stages with the **AquaActiv A-B-C anti-algae programme**
- Take care of algae growth with **AquaHumin**
- **OptiPond** balances the minerals and thus prevents dangerous pH fluctuations
- **Safe&Care** prepares tap water to make it suitable for the pond
- **OxyPlus** fights oxygen deficiency due to algae bloom during warm temperatures

Autumn

LARGE-SCALE CLEANING BEFORE THE WINTER

- Use the **PondoVac** to remove dead plant residues, detritus and sludge
- **SediFree** helps with sludge degradation
- **BioKick Care** optimises the water values
- **OptiPond** prevents pH fluctuations

Winter

REST TIME FOR THE POND AND ITS INHABITANTS

- **PumpClean** cleans and maintains the pond technology
- **PhosLess** filter cartridges prevent thread algae forming in the new season
- **QuickSticks** and the **water analysis set** control the water values, especially when the fish are fed through the winter

AquaActiv fish medicine

Universal**

AGAINST THE MOST COMMON POND FISH DISEASES

Area of application

- Unclear diagnosis
- Mixed infections
- For preventing diseases
- Bacterial infection
- Single-cell parasites (protozoa)
- Fungal diseases

Symptoms

- Whitish yellow, slimy coverings
- Coverings that resemble cotton wool
- Ulcers, wounds, inflammations
- Flicking
- Loss of skin & scales
- Blood spots

Ponds up to max.	(m³) 10.00	(m³) 100.00
Item no. (GB Version)	Not available in GB	
Item no.	50564	50927

1 AntiParasite**

AGAINST SINGLE-CELLED PARASITES

Area of application

- Single-cell parasites (protozoa) such as skin parasites (Costia, Trichodina, Chilodonella), spot disease (Ichthyophthirius)
- Velvet disease (Oodinium)
- Cryptobia
- Bacterial diseases that accompany these parasites

Symptoms

- White-grey to dark, velvet-like coverings
- White spots
- Projecting gills
- Increased respiratory activity
- Scraping against objects
- Clamped fins
- Apathy and weight loss

Ponds up to max.	(m³) 10.00
Item no. (GB Version)	Not available in GB
Item no.	50565

1 Parasite infestation

1 Parasite infestation

2 Fungal infection

3 Bacterial infection

2 AntiFungus**

AGAINST FUNGAL INFECTIONS

Area of application

- Fungal diseases (Dermocystidium)
- Mould (Saprolegnia)
- Bacterial diseases that accompany these parasites
- Note: Fungal infections are common on injured skin areas

Symptoms

- Cotton wool-like coverings on gills, bodies and fins
- Whitish brownish covering on wounds

Ponds up to max. (m³) 10.00

Item no. (GB Version) Not available in GB

Item no. 50566

3 AntiBacteria**

FIGHTS INTERNAL AND EXTERNAL BACTERIAL INFECTIONS

Area of application

Internal and external bacterial infections such as

- Ascites (Aeromonas, Pseudomonas)
- Mouth rot (Columnaris)
- Fin rot (myxobacteria)
- Hole in the head disease (Aeromonas, Pseudomonas)
- Streptococcus
- Inflamed injuries

Symptoms

- Loss of skin & scales
- Swelling, redness
- Broken skin, open wounds, ulcers
- Fin rot, raised scales
- Slowed/accelerated movements
- Flicking, cramps
- General darkening
- Protruding bellies

Ponds up to max. (m³) 10.00

Item no. (GB Version) Not available in GB

Item no. 50568

Over-the-counter medicines in accordance with Section 60 of the German Drug Act (AMG)
* GMP quality standards (Good Manufacturing Practice – guarantees constant physical, chemical and microbiological inspections, from receipt of raw materials to manufacturing of the product)
** The products Universal, AntiParasit, AntiPilz, AntiBakterien and AntiArgulus are over-the-counter medications in accordance with Section 60 of the German Drug Act (AMG).

Energy efficiency classes

The European Union energy label provides information about the energy efficiency class of a lamp, i.e. how much energy the lamp consumes in relation to its light output, as well as other features of the product. This information is used to assign LED lamps an energy efficiency class from A to G.

For your reference, please find an overview of the energy efficiency classes of the OASE lighting range, as well as additional relevant information.

Item no.	Product	Catalogue page	Energy efficiency class	This lamp contains built-in LED bulbs	The bulbs in the lamp cannot be replaced.

Watercourse diagrams

How: Which pump is right for your watercourse?

These diagrams are recommendations to help you select the correct pump for your watercourse (average watercourse application). This includes an approx. 5 m hose with a diameter of 1 1/2" (with a pressure loss of about 0.15 m of water column).

As a rule of thumb, the following applies to determining the correct pump for a watercourse:

Width of watercourse in cm x 1.5 l/min. = output l/min.

Friction losses in pipe and hose lines:

To make optimum use of the pump outputs, the hose diameter should be as large as possible.
Too small a diameter or angle and flow restrictions due to hose connections influence the flow rate!

FLOW RATE (litres / min.)	LIGHT VALUES (mm / inch)	PRESSURE LOSS per running metre (mWC)
15	13 mm – ½"	0.34 mWC
30		1.20 mWC
30	19 mm – ¾"	0.12 mWC
50		0.32 mWC
50	25 mm – 1"	0.08 mWC
75		0.19 mWC
100		0.34 mWC
100		0.11 mWC
150	32 mm – 1¼"	0.21 mWC
100		0.03 mWC
150	38 mm – 1½"	0.07 mWC
200		0.12 mWC
250		0.15 mWC
200		0.04 mWC
250	50 mm – 2"	0.06 mWC
300		0.08 mWC
350		0.10 mWC
400		0.14 mWC
450		0.17 mWC

Notes

All values given for the fountain attachments are approximate.

H = height in cm mWC = metre of water column

Ø = diameter of the spray water in cm

The spring diameters and spring heights may vary depending on the individual installation and the water quality.

Note: Electrical connection points must be at least 2 m away from the pond edge, dry and protected with a maximum 30 mA residual current protective device.

PRO

All OASE products are developed and produced to the highest quality standards. For us, they are not just products – our aim is to combine innovative solutions, the highest quality and above all pure convenience in one product. And all this from a single source. We regularly analyse our products in our own test laboratory. We never compromise to ensure that we stay true to the OASE commitment to quality.

The products marked with **PRO** set new standards and form the latest generation of innovations. This helps you to find the most innovative OASE products at a glance. Our developers have equipped these products with special properties or made them even easier to use. Enjoy total convenience of the highest level.

Guarantee

Guarantee

OASE GmbH grants a manufacturer's guarantee under the conditions cited below; the guarantee period is designated on a productspecific basis. This is provided in the form of supplemental text with the product.

The designated guarantee period starts with the initial new product purchase from an OASE dealer. In the event of subsequent sale the guarantee period does not start over again from the beginning. The guarantee period is neither extended nor restarted through guarantee performances; legal guarantee claims do not occur on guarantee performances.

If the content of the guarantee is not otherwise specified separately, OASE grants a guarantee in the scope cited below: The prerequisite for claiming any guarantee from OASE, including the extension guarantee is that in the case of parts replacement /repair, the customer must have properly installed original OASE spare parts exclusively for any repair or remediation. Any OASE guarantee is invalidated if products from other manufacturers are used.

We provide guarantee performances, at our discretion, through no charge repair, or no charge delivery of original spare parts or of a replacement device of comparable value. If the type in question is no longer manufactured, we reserve the right, at our discretion to deliver a replacement device from our product line that is most like the original object of the guarantee claim. Reimbursement of expenses for removal and installation, inspection, claims for lost profit and compensation for damages are not covered by the guarantee, nor are more extensive claims for damages and losses, regardless of type, that have been caused by the device or its use.

The guarantee only applies for the country in which the product was purchased from an OASE dealer. German law applies for this guarantee in accordance with these conditions; with exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The legal rights of the purchaser, particularly arising from the warranty, continue in effect and are not limited by this guarantee.

Defects or damage that are due to faulty installation or operating errors, as well as insufficient care, or for example due to the use of unsuitable cleaning agents or neglected maintenance, non-intended use, damage, impact, the effects of freezing, etc. cutting off the plug, shortening the cable, calcium deposits or improper repair attempts, do not fall under the protection of the guarantee. With regard to intended use, we refer you to the user instructions, compliance with which is the basic prerequisite for a guarantee claim. Parts subject to wear, such as bulbs, are not part of this guarantee. If there is a guarantee case please contact your OASE dealer that sold the product to you.

If there is a guarantee case please contact your OASE dealer that sold the product to you. If this possibility does not exist, then claims arising from the guarantee can be made binding against OASE GmbH Tecklenburger Str. 161, 48477 Hörstel, Germany by shipping the device or the parts in question to us at your expense, together with the original purchase receipt of the OASE dealer, the guarantee certificate, as well as written information about the claimed defect.

A directory of OASE dealers is available at: www.oase.com

Extended Guarantee

Extended OASE Guarantee

Guarantee on request Based on the product, we extend our advertised manufacturer guarantee one time by 1 year, or alternatively by an additional 2 years of guarantee time in specially identified cases, under the same guarantee conditions in the special cases advertised by the manufacturer, and only on special request, this is done regularly only on request. We grant the extension guarantee only to end customers who have purchased the product from an OASE dealer and who do not commercially resell the product and install it on the premises of third parties in the course of their professional activities.

The term of the guarantee period starts with the expiration of the first guarantee, with the prerequisite that the product was verifiably purchased from an OASE dealer. Therefore in the event of resale the guarantee period does not begin at a later point in time, nor does it start over again. The guarantee period is neither extended nor restarted through guarantee performances.

At OASE's discretion the guarantee performance extends to free-of-charge repair of the defective part or replacement delivery of a comparable / equivalent value product with exclusion of more extensive claims. In addition, in a guarantee case, we shall accept the appropriate costs for sending in the defective product and the return delivery.

More extensive claims are excluded. The legal rights of the purchaser are not limited by this guarantee. The guarantor is **OASE GmbH, Postfach 2069, 48469 Hörstel, Germany** The extension guarantee can be acquired either through online registration or via the Hotline with submission of a copy of the original purchase receipt at: www.oase.com/en_GB/extended-guarantee **OASE-Hotline +44 (0) 1256 896886 (at the standard rate from the German landline network)** In the absence

of a deviating agreement, OASE collects your data exclusively for processing of the described guarantee, particularly for assurance of your identity and verification of the purchase object and the time of purchase. This data is used solely by OASE and is not disclosed to any third party.

Data protection

We use your personal data only to the extent required for execution and processing of the contract. Furthermore we would like to inform you of new products via regular mail, email, telephone and fax. We will request your express consent in this regard at the appropriate point, to the extent necessary. You can notify us at any time if you no longer want to receive such information by contacting us on our Hotline **+44 (0) 1256 896886**.

If you purchase goods from us, in the future we will send information emails to you for similar goods. Even if a consent is not required, at any time you can request that you no longer receive such information emails from us. In this regard please contact us via e-mail at info@oase.com. Otherwise please take note of our Data Protection Policy at www.oase.com/en_GB/privacy-policy
