

# ACKFORM WIRELESS

## CHARGER USER MANUAL

Model No.: TF-W01

Input: 5V/2A 9V/2A 12V/1.5A

Output: 10W / 15W/ 20W

Compatible with all Qi wireless charging devices.

### Important Notes:

1. For optimal performance, it is recommended to use a USB-C PD or Qualcomm Quick Charge 3.0 power adapter.
2. Do not disassemble this product for any reason.
3. Do not use this product in extremely high temperature or high humidity environments. Specifically, do not use near open flames or water.
4. When using this product, NEVER place any metal objects (such as keys, coins, batteries, jewelry etc.) on it. This will produce heat and may result in damage to the charger, wireless device or both.
5. Please make sure the device being charged contains no metal plates or any other type of metal objects before placing it on the charger

### FCC Requirement

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
