## **01** Overview

Of the various indoor gases, CO<sub>2</sub> is the one that best represents indoor air quality. High levels of CO<sub>2</sub> can cause headaches, fatigue, rapid heartbeat, and shortness of breath. Prolonged exposure to high levels of CO<sub>2</sub> can have negative effects on the respiratory system and even lead to diseases such as tracheitis and pneumonia. It is therefore vital to maintain an appropriate range of indoor CO<sub>2</sub> concentrations for the sake of health. That's why we introduced the IAM-O2, an intelligent indoor air quality monitor that helps you stay safe and healthy.

## 02 *Technical Specification*

<b>Product name</b>	Smart Indoor Air Quality Monitor
<b>Model</b>	IAM-02
<b>Battery capacity</b>	3000mAH Lithium Battery
<b>Power supply</b>	DC5V/1A with USB Type C charging cable (the cable length is 1M)
<b>Screen Type</b>	LCD screen with white backlight

<b>Sampling Interval</b>	1min/2min/5min/10min (default 1min)
<b>Production Dimension</b>	111*66*21mm
<b>Production Weight</b>	180g
<b>Package Dimension</b>	178*105*36.5mm
<b>Charging time</b>	About 6 hours
<b>Battery life</b>	more than 12 months

**Remarks:**When the sampling interval is set to 1 minute, the battery can last for approximately 90 days; when the sampling interval is set to 10 minutes, the battery can last for more than 12 months. The longer the sampling interval, the longer the battery life.

Testing data	Measurement range	Resolution	Accuracy
CO <sub>2</sub> concentration	0-9999ppm	1 ppm	± 40 ppm (±5%)
Temperature value	-9.9°C - 100°C	0.1 °C (0.1 °F)	±0.2 °C (±0.36 °F)
Relative humidity	0-99%	1%	± 1.8 %

## 03 LCD Screen Definitions/Product Introduction

### 3.1.LCD Screen Definitions

### ①Auto-Calibration icon:

**A** When this icon appears, the smart auto-calibration is turned on.  
When this icon disappears, the smart auto-calibration is turned off.

### ②CO<sub>2</sub> Concentration value:

**8888** \*CO<sub>2</sub> PPM (parts per million) ,CO<sub>2</sub> concentration level in ppm (parts per million).  
\*Current CO<sub>2</sub> concentration value (ranged from 0 to 9999)

### ③Buzzer ON/OFF icon

 When this icon appears, the buzzer is turned on; when this icon disappears, the buzzer is turned off.

**NOTE:** See Section 4, «Operating Buttons Definitions» , in this manual for details on switching the buzzer on or off.

#### ④Battery indication

Current battery level.

The device is charging.

⑤**Temperature ( °C/°F )** The temperature of the air in °C or °F

#### ⑥Relative Humidity (%RH)

The relative humidity of the air, expressed in %RH.

#### ⑦CO<sub>2</sub> level indicator light

\*If the CO<sub>2</sub> indicator light blinks green 3 times each time the CO<sub>2</sub> concentration value is refreshed, it means that the CO<sub>2</sub> concentration level is in good condition (<1000 ppm).

\*If the CO<sub>2</sub> indicator light blinks yellow 3 times each time the CO<sub>2</sub> concentration value is refreshed, it means that the CO<sub>2</sub> concentration level is in medium condition (1000~1400 ppm).

\*If the CO<sub>2</sub> indicator light blinks red 3 times each time the CO<sub>2</sub> concentration value is refreshed, it means that the CO<sub>2</sub> concentration level is in unhealthy condition (>1400 ppm).

## 3.2 Product Appearance Introduction

## 04 Operating Buttons Definitions

### A: °C/°F Switch button

**Short press:** Change the temperature unit between °C and °F;

### B: Buzzer button

**Short press :** Turn on/off the buzzer

**Long press :** Press and hold the button for 3 seconds to turn on/off the CO<sub>2</sub> concentration calibration.

Note: Automatic self-calibration ensures highest long-term stability without the need of manual action steps from the user. The automatic self-calibration algorithm assumes that the sensor is exposed to the atmospheric CO<sub>2</sub> concentration of 400 ppm at least once per week.

**Please do not activate automatic calibration if the device has been stored in an environment with CO<sub>2</sub> levels  $\geq 1000$  ppm (e.g., a grow tent) for extended periods. Manual calibration may be conducted when necessary.**

**C: Short press both buttons at the same time to go into LCD screen setting mode:**

**Step 1:** Short press both buttons again and the screen will display parameters of 5 modes in turn, i.e. the CO<sub>2</sub> concentration sampling interval "INT", the high CO<sub>2</sub> concentration threshold "Hi", the low CO<sub>2</sub> concentration threshold "Lo", the CO<sub>2</sub> calibration value "CA" and the backlight switch "bLT".

1  
Int

### Step 2:CO<sub>2</sub> sampling interval setting

Short press both °C/°F and buzzer buttons at the same time again, the upper LCD screen will display the interval time, the lower LCD screen will display the "INT". Short press the °C/°F or buzzer button to select the sampling interval(1minute, 2 minutes, 5 minutes, or 10 minutes).At last press and hold the °C/°F and Buzzer buttons simultaneously for 2 seconds or wait 30 seconds without operation to exit and save the setting.

1400<sup>PPM</sup>  
Hi

### Step 3:High CO<sub>2</sub> concentration setting value (range: 300-5000ppm)

Short press both °C/°F and buzzer buttons at the same time again, the upper LCD screen will display the high CO<sub>2</sub> concentration setting value, the lower LCD screen will display the character "Hi". Short press the °C/°F or buzzer button to modify the high CO<sub>2</sub> concentration setting value.At last press and hold the °C/°F and Buzzer buttons simultaneously for 2 seconds or wait 30 seconds without operation to exit and save the setting.

650<sup>PPM</sup>  
Lo

### Step 4:Low CO<sub>2</sub> concentration setting value (range: 300-5000ppm)

Short press both °C/°F and buzzer buttons at the same time again, the upper LCD screen will display the low CO<sub>2</sub> concentration setting value, the lower LCD screen will

display the character "Lo". Short press the °C/°F or buzzer button to modify the low CO<sub>2</sub> concentration setting value. At last press and hold the °C/°F and Buzzer buttons simultaneously for 2 seconds or wait 30 seconds without operation to exit and save the setting.

10<sup>PPM</sup>  
CA

**Step 5: CO<sub>2</sub> concentration calibration setting value (range: -200-200ppm)**

Short press both °C/°F and buzzer buttons at the same time again, the upper LCD screen will display the CO<sub>2</sub> calibration value, the lower LCD screen will display the character "CA". Short press the °C/°F or buzzer button to modify the CO<sub>2</sub> calibration value. At last press and hold the °C/°F and Buzzer buttons simultaneously for 2 seconds or wait 30 seconds without operation to exit and save the setting.

OFF  
bLT

**Step 6: Backlight off/on setting**

Short press both °C/°F and buzzer buttons at the same time again, the upper LCD screen will display the backlight working state, the lower LCD screen will display the character "bLT". Short press the °C/°F or buzzer button to turn off/on the backlight. At last press and hold the °C/°F and Buzzer buttons simultaneously for 2 seconds or wait 30 seconds without operation to exit and save the setting.

## **D:Power Button**

**ON:** Turn on the device

**OFF:** Turn off the device

## 05 Installation Instructions

*Two ways to place the IAM-O2 monitor*

**A: Standing on the table**

**B: Hanging up**

## **06** *Operation Instructions*

*6.1 Push the switch to the "ON" position to turn on the device, and the device LCD will display as shown below:*

- ①: When turning on the device, the LCD screen will display " 8888 " for 3 seconds.
- ②: After 3 seconds, the LCD screen will show " - - - - " and flash for 30 seconds at 1 second interval, indicating that the sensor is warming up for collecting data.
- ③: After 30 seconds, the LCD screen will display the current CO<sub>2</sub> concentration, the ambient temperature, and the relative humidity.

①

②

③

**6.2.1 Low battery alarm:** When the battery is low, the battery level icon"  " will flash; after one minute, the device will be automatically turned off.

**6.2.2 Unhealthy data alarm:**

When the sampled value continuously exceeds the alarm value within a period, the buzzer will sound at the first sampling time when the preset alarm value is judged to be exceeded.

## **07** ***Cleaning and Maintenance***

- 8.1.** Do not expose this product to water, or place it in high-temperature environments over 50°C. Keep it away from fire sources.
- 8.2.** This product is a precise measuring instrument, do not disassemble it by yourself.
- 8.3.** Do not place this product in an environment full of dust or corrosive gas for measurement.
- 8.4.** Do not directly expose this product to the sun for long.

## **08** *Important Notes/Warnings*

<b>ISSUES</b>	<b>POSSIBLE SOLUTIONS</b>
The value of CO <sub>2</sub> /temperature/humidity did not change for a long time	<ol style="list-style-type: none"><li data-bbox="393 363 1554 576">1. The device samples once per minute at the fastest. Please wait for it. If you need to change the sampling time to 2min/5min/10min, please press the °C/°F and buzzer buttons at the same time to enter the LCD screen setting.</li><li data-bbox="393 586 1584 798">2. At the same place, and when the air environment is slightly flowing, the CO<sub>2</sub> concentration is relatively stable, so the value will not change rapidly. This is a stable and accurate method of air quality detection.</li></ol>

## **09** ***FCC Requirement***

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

## **10** ***Customer Service***

This item carries a 1-year warranty against defects in either components or workmanship. During this period, products that prove to be defective will, at the discretion of INKBIRD, be either repaired or replaced without charge. For any problems in use, please feel free to contact us at **support@inkbird.com**. We will do our best to help you.
