

## DIGITAL LIVING

There's no doubt we live in the digital era. Music, photography, video — it is all digital, and it is at our fingertips. Digital technology has transformed the way we work, play and communicate. From the pictures we take with our digital cameras, to the music we listen to on our digital music players, and all the information stored on our computers, PDAs, and mobile phones, everything is based on some type of digital file format.

Whether we are traveling by train, plane, automobile, or boat; while studying, jogging, working out—and even swimming—we obviously want our videos, music, movies, TV programs, and podcasts with us. The industry overall has made great progress toward developing innovative products and services that are helping make digital living a reality for consumers.

**Airport Express Base Station**

Setting up a Wi-Fi network using an iPhone, iPad, Mac, or PC is faster and easier than making a cup of coffee. That's because a setup assistant is built into iOS and in AirPort Utility for OS X. As soon as you plug in the Express Base Station and connect it to your DSL or cable modem, you just follow the instructions on your computer or iOS device. No complicated steps to follow or obscure terminology to learn. Setup assistant does all the work, so you don't have to. #APAPEBSTUSA.....**93.49**

**AirPort Extreme Base Station (6th Generation)**

Features simultaneous dual-band 802.11ac Wi-Fi support. With three-stream 802.11ac technology, the Base Station can reach data rates of up to 1.3Gbps, which is triple the 802.11n standard. If you're using a 802.11a/b/g/n Wi-Fi device, AirPort Extreme can still optimize the connection for those Wi-Fi standards as well. There are three antennas for 2.4GHz and three antennas for 5GHz. Vertical design contributes to a smaller footprint and more desk space. #APAPEQ.....**184.99**

**Mac Pro**

The Most Radical Mac Ever

Designed around an innovative unified thermal core, Mac Pro features 4-core, 6-core, 8-core or 12-core Intel Xeon processors running at Turbo Boost speeds up to 3.9 GHz that deliver double the floating point performance of the previous generation Mac Pro. Two workstation-class AMD FirePro GPUs with up to 12GB of video memory provide up to seven teraflops of compute power and up to eight times the graphics performance of the previous generation Mac Pro. Its unique cylinder design is made with refined impact extrusion technologies for effective material use and a polished aluminum enclosure. It stands at just 9.9 inches tall with a diameter of just 6.6 inches, allowing you to place it on your desk.

- PCIe-based flash storage delivers sequential read speeds up to 1.2Gbps
- Six Thunderbolt 2 ports, each with up to 20Gbps of bandwidth per device. Thunderbolt 2 uses existing copper or optical Thunderbolt cables and is completely backward compatible with existing Thunderbolt peripherals and cables, and also supports the latest 4K displays.
- Four USB 3.0 ports give you the versatility to hook up dozens of external devices. Two Gigabit Ethernet ports let you connect to multiple networks. And an HDMI 1.4 port provides support for the high-definition televisions, projectors, and displays, including Ultra HD TVs. As you rotate Mac Pro to plug in a device, it senses the movement and automatically illuminates the I/O panel. So you can easily see the ports you need when you need them.
- Mac Pro comes with Mac OS X 10.9 Mavericks preinstalled.

**DELL** XPS 15

15.6" Multi-Touch Ultrabook

Features a carbon fiber base that is strong and thin like aluminum while also being lighter and cooler to the touch. The display is also a capacitive touchscreen so you'll be able to utilize all the multi-touch gestures incorporated into Windows 8.1. Powered by a quad-core 4th gen Haswell 2.3 GHz Intel Core i7-4712HQ processor, it has 16GB of RAM, 1TB 5400 rpm hard drive, 32GB mSATA solid state drive, a 3-in-1 card reader, 802.11ac Wi-Fi, Bluetooth 4.0, an integrated webcam, and a microphone. **ASUS** ZENBOOK

13.3" Ultrabooks

Astonishingly thin, these ultra portables are made possible through the use of a strong but light aluminum alloy shell with a unique 'spun' finish on polished surfaces. The artistry of the series draws inspiration from luxury timepieces, displaying sharp edges, an oversized keyboard and smart-phone-like touchpad for added comfort, as well as reinforced hinges for extended longevity. For audio, they incorporate SonicMaster technology, co-developed by Bang & Olufsen ICEpower.
