

Limited Factory Warranty

This warranty supersedes all prior warranties

Except as expressly stated in this agreement, there are no warranties, express or implied, by operation of law or otherwise. Fantech disclaims the implied warranties of merchantability and fitness for a particular purpose as to both Fantech and non-Fantech products.

Fantech's warranties extend to its customers and its end users. Fantech will not be liable for any incidental, indirect, special, or consequential damages, including, but not limited to, loss of use, revenues, profits, or savings, even if Fantech knew or should have known of the possibility of such damages.

During the entire warranty period:

Fantech warrants that Equipment sold to its account holders will be free from defects in material and workmanship during the Warranty Period. If a factory defect is detected, the product needs to be returned to the distributor where it was purchased from. On claims issued by Fantech account holders, Fantech will repair or replace any part that has a factory defect in workmanship or material. If necessary, return this product to the Fantech factory together with a copy of the bill of sale, identified with the return materials authorization (RMA) number. "Warranty Period" means the period stated to be as such from the table below.

For factory return, you must:

- Have a Return Materials Authorization (RMA) number,
- Have the bill of sale available,
- All parts and/or products returned must be shipped prepaid back to the buyer, and
- Write the RMA number clearly on the outside of the carton.

If all these conditions above are not met, the carton will be **REFUSED**.

Then:

Once these conditions are met, all parts and/or products will be repaired/replaced and shipped back to the user; no credit will be issued.

OR

The Distributor may place an order for the warranty part and/or product and is invoiced. The Distributor will receive a credit equal to the invoice only after the product is returned prepaid and verified to be defective.

Fantech warranty terms do not provide for replacement without charge prior to inspection for the defect. Replacements issued in advance of defect inspection are invoiced, and credit is pending inspection of returned material. Defective material returned by end users should not be replaced by the distributor without charge to the end user, as a credit to the distributor's account will be pending inspection and verification of the actual defect by Fantech.

Equipment Warranty and Disclaimers

1. Subject to conditions (2) through (7) below, during the Warranty Period, Fantech will repair or replace any defective item of Equipment or part or component of Equipment, promptly sent to Fantech by Customer, which Fantech determines was defective due to faulty material or workmanship.
2. This Warranty is void if the Fantech label control number or date of manufacture, which is affixed to the Equipment, has been removed or altered in any way.
3. While necessary maintenance or repairs on your Fantech product can be performed by any company, we recommend that you use licensed personnel only. Improper or incorrectly performed maintenance or repair voids this Warranty.
4. This Warranty does not apply to damage occurring after Fantech has delivered the Equipment to a shipper. If damage, whether concealed or visible, has been caused by shipping, the Customer must file a claim with the freight company.
5. This Warranty does not apply to damages resulting from improper wiring or installation, or resulting from improper consumer procedures such as lack of proper maintenance, unlicensed work, misuse, abuse, abnormal use, use by an application other than one recommended by Fantech, or accident or application of incorrect electrical voltage or current.
6. This Warranty does not apply to damage or failure caused by any cause beyond the control of Fantech, including acts of God, war, terrorism, riot, or insurrection.
7. Any other warranty, expressed, implied, or written, and to any consequential or incidental damages, loss or property, revenues, or profit, or costs of removal, installation, or reinstallation, for any breach of warranty.

Warranty Validation

- The user must keep a copy of the bill of sale to verify purchase date.
- These warranties give you specific legal rights, and are subject to an applicable consumer protection legislation. You may have additional rights which vary from state to state.

Limitation of Warranty and Liability

This warranty does not apply to any Fantech product or part which has failed as a result of faulty installation or abuse, incorrect electrical connections, or alterations made by others, or use under abnormal operating conditions or misapplication of the product or parts. We will not approve for payment any repair not made by us or our authorized agent without prior written consent. The foregoing shall constitute our sole and exclusive warranty and our sole exclusive liability, and is in lieu of any other warranties, whether written, oral, implied, or statutory. There are no warranties which extend beyond the description on the page hereof. In no event, whether as a result of breach of contract, or warranty or alleged negligence, defect incorrect advice or other causes, shall Fantech be liable for special or consequential damages, including, but not limited to, loss of profits or revenue, loss of use of equipment or any other associated equipment, cost of capital, cost of substitute equipment, facilities or services, downtime costs, or claims of customers of purchase for such damages. Fantech neither assumes or authorizes any person to assume for it any other liability in connection with the sale of product(s) or part(s). Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages so the above limitations and exclusions may not apply to you.

Warning

Fantech products are designed and manufactured to provide reliable performance, but they are not guaranteed to be 100% free from defects. Even reliable products will experience occasional failures and this possibility should be recognized by the user. If these products are used in a life support ventilation system where failure could result in loss or injury, the user should provide adequate backup ventilation, supplementary natural ventilation, failure alarm system, or acknowledge willingness to accept the risk of such loss or injury.

Note: Items not listed below, including accessories or non-Fantech items such as housings or brackets, carry a one year limited warranty.
