

# A power efficient wide operating range accelerometer with in-sensor compute

June 25, 2024 | Santa Clara, CA

Matteo Fusi  
Product Marketing Director  
STMicroelectronics

What quantity is equal to 0 for an object in free-fall?

# Orders of magnitude (acceleration)

# Introducing the LSM6DSV320X

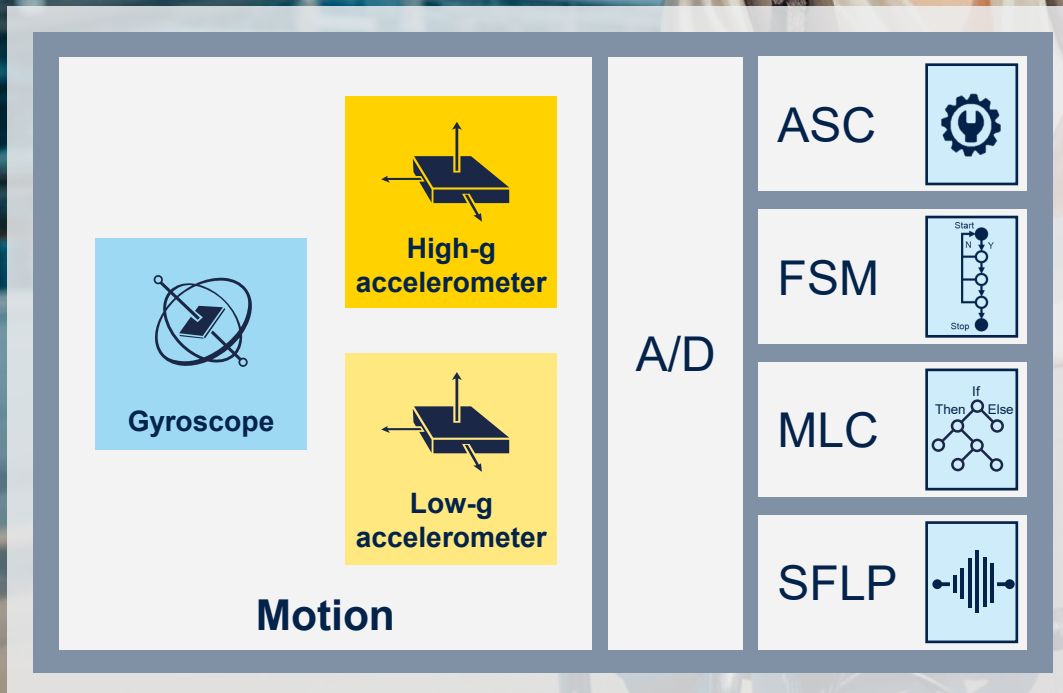

New sensor for accurate and efficient measurement of both high and low acceleration levels

Embedded intelligence for a power efficient management of all sensing channels

## Edge AI and self-configuration:

- Finite state machine (FSM)
- Machine learning core (MLC)
- Adaptive self-configuration (ASC)
- Sensor fusion low power (SFLP)

# LSM6DSV320X

## Differentiating features for new applications

Industry-first high performance 6-axis IMU with a **dedicated high-g accelerometer** for intensity impact and shock detection

Top view of MEMS unit of LSM6DSV320X

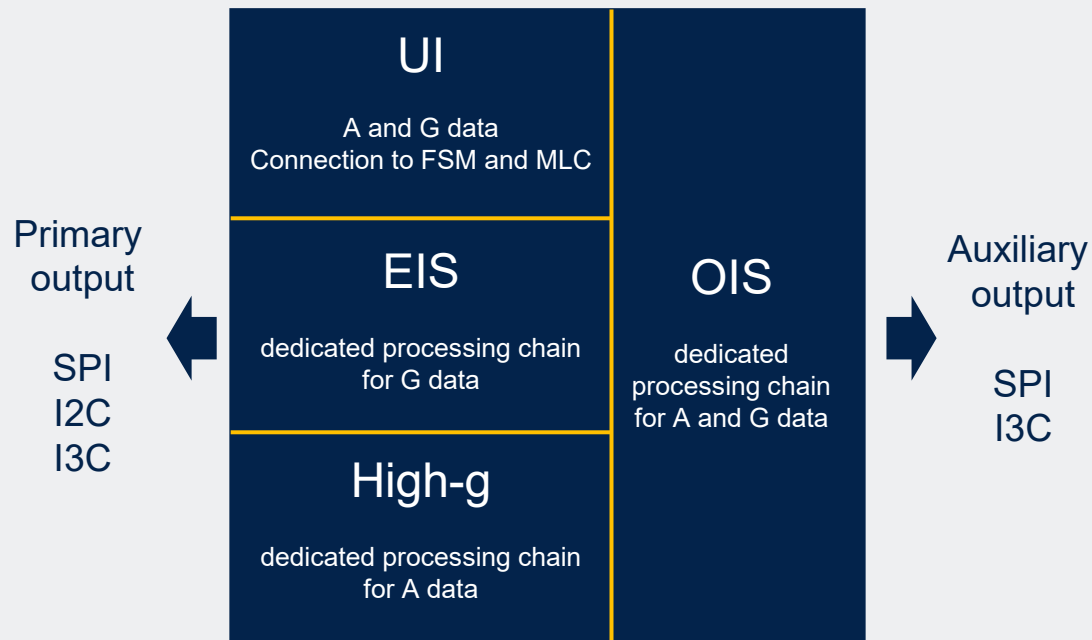

# LSM6DSV320X

## Differentiating features for new applications

Multi-core enables advanced partitioning

# Library for fusing high-g and low-g data: MotionXLF

**High-g data** are characterized by poor resolution and high dynamic range

**Low-g data** are characterized by high resolution and poor dynamic range

**Handles** time-varying offset evolution, discontinuity, noise profile inconsistency

**Finite State Machine** manages the activation and deactivation of the high-g accelerometer for optimal power efficiency

# You and all around you Connecting users with their environments

## IMUs with two accelerometers

A differentiating feature for new applications

Enhanced **contextual awareness** with an IMU embedding AI and advanced processing features

MLC

FSM

ASC

SFLP

**Emergency calls activation**

**Asset tracking & damage sensing**

**Intense movements tracking**

**Concussion monitoring**

MLC = machine learning core  
FSM = finite state machine  
ASC = adaptive self-configuration  
SFLP = sensor fusion low power

# You and all around you

## Smartphone & foldable

Emergency call  
Activity recognition  
Step counting  
Lid angle detection  
Image stabilization

## Wearable

Emergency call  
Intense sports tracking  
Wrist tilt  
Activity recognition  
Step counting

## Smart tags & IoT

Shock and drop  
impact tracking  
Context awareness  
Motion tracking

## PC, laptop, and tablet

High impact recording  
Lid angle detection  
In and out of bag  
Lap versus desk

## Gaming

High impact recording  
Intense gestures  
Motion tracking

# A product for you and all around you

**Industry-first IMU with dual MEMS accelerometer**  
Accurately measures up to 320 g full-scale range

**New applications for personal electronics and IoT**  
Emergency call, drop & fall tracking, concussion monitoring, etc.

**Miniaturized AI-enabled sensor with context-awareness**  
for reducing system-level complexity and enhancing efficiency

# Our technology starts with You
