

Install the Smart Radiator Thermostat on your own

Good to know:

- The valve itself stays intact. So don't worry, there will be no water leakage during installation.
- No special tools are required.
- Fits on most radiators with thermostatic valves.
- Each Smart Radiator Thermostat comes with six different adapters and can fit almost any valve.

Step 1

Start the online installation assistant

Go to my.tado.com and add your Smart Radiator Thermostat. Follow the step-by-step instructions in the web app which will guide you through the installation process.

Remove your existing valve head

Thermostatic valve heads can be removed in different ways. Find out more on how to do this [here](#).

Step 2

Step 3

Attach an adapter (if required)

The Smart Radiator Thermostats fits on a M30x1.5 thermostatic radiator valve body thread. The adapters that come with your order ensure that tado° fits almost all thermostatic radiator valves. Find out which adapter you would need for your radiator valve [here](#).

Mount the Smart Radiator Thermostat

Follow the instructions in your tado° app. They'll guide you to mount the Smart Radiator Thermostat effortlessly.

Step 4

AS EVERY HOME IS DIFFERENT, THESE STEPS ARE A GUIDELINE TO GIVE A GENERAL IDEA OF WHAT AN INSTALLATION ENTAILS. TO INSTALL AND SET UP YOUR TADO° DEVICES CORRECTLY, PLEASE FOLLOW THE INSTALLATION INSTRUCTIONS IN THE APP.
