Key:

Description	Symbol	Information
Drill		You will need a crosshead M4 attachment
Aluminium Saw		Use a fine tooth aluminium saw with a clean, sharp blade when cutting posts or slats
Rubber mallet		For securing slats on top of each other and the top cap onto the last slat
Bolt-Down		4 x M12 bolts required to fix each bolt-down post
Concrete-In		Place 565-570mm into the ground. For further stability, we suggest inserting a galvanised steel tube Ø 26.9 x 300mm (cut from code: 160225) horizontally through the concrete pouring hole

Please note: Post centre measurements are shown as a guide only. Whilst we do our best to advise and guide, it remains the installers responsibility to ensure the final installation complies with any current building regulations and is securely installed. As we have no knowledge of the location, ground type, or the layout of your system, we would always advise customers to consider these factors and adjust as appropriate.
