Operating time: 60rpm

05

FITTING THE HARBINGER

The HARBINGER MARAUDER model comes with a 316L surgical grade stainless steel bracelet in brushed finish. The length of this bracelet can be adjusted by either removing or adding links to it. To take out a link, push the pressure pin out in the direction of the arrow on the link.

06

PRECAUTIONS AND PREVENTIVE MEASURES

Temperature

Do not expose your watch to sudden temperature changes (exposure to sunlight followed by immersion in cold water) or extreme temperatures [over 60°C (140°F) or below 0°C (32°F)].

Magnetic Fields

Do not expose your watch to intense magnetic fields such as loudspeakers, portable telephones, computers or refrigerators and other electromagnetic appliances.

Shocks

Avoid thermal or other shocks as it may harm your watch. In the event of a violent shock please have your watch checked by an authorized HARBINGER Service Center.

Care and Checks

Clean the case and bracelet regularly using a soft cloth to prevent any corrosion caused by perspiration. All water resistant watches can be cleaned with a toothbrush and soapy water, and then dried with a soft cloth.

07

Water Resistance

Water resistance of watches is rated based on laboratory pressure tests comparable to a swimmer or diver sitting still at that pressure level. However many water-based activities involve a lot of movement and other environmental changes. These exceptions to how the watch was rated may challenge or defeat the water protection features of a water resistant watch. The water resistance of a watch cannot be guaranteed permanently. It may be affected by the aging of gaskets or by accidental shock to the crown.

Never activate the time-setting crown while the watch is under the water and make sure that the crown has been pushed/screwed down tightly after every operation. Do not under any circumstances open the watch yourself.

08

Water Resistance

This watch is rated to 20ATM / 200M / 660 FT".

We do not recommend wearing this watch in water (Shower, swimming pool, ocean, hot tub etc.)

International Warranty

Your HARBINGER watch is warrantied for a period of 12 months from the original date of purchase under the terms and conditions of this warranty. The warranty covers materials and manufacturing defects.

During the warranty period the watch movement, hands and dial are the only components covered under this warranty. A covered component will be repaired or the watch will be replaced free of repair charges, if it proves to be defective.

The warranty does not cover normal wear of components, or damage caused by accident or mishandling, or the loss or theft of your watch. Any modification of your watch by the addition of non-original parts, or the substitution of parts with non-original parts will void your guarantee.
