Insio™ Nx Custom

At Signia we are committed to enhancing human performance. We put hearing aid wearers first, with products that fit their wants, needs and style. The wearer is at the center of our universe and their needs are woven into our DNA. For us, this is not about correcting a loss, it's about gaining an edge. Not just performing, but performing at their best.

A True Partnership

Signia understands that our success depends on your success. So we share your goal of delivering the best patient outcomes. And we support your expertise with support, trainings, and more to optimize your workflows and enhance each patient's life.

Our Approach: Iconic Innovations

Only Signia combines industry-leading audiology and technology to deliver iconic innovations in hearing. This not only enhances performance for the patient, but also empowers you to deliver optimal, personalized solutions and service. These innovations are why we can proudly claim to be a company of firsts. From the first ever rechargeable hearing aid to the industry's first Face Mask Mode, Signia stands apart, and helps you stand apart, too.

Signia perience

Signia Xperience is the industry's leading audiological platform, and it powers Signia hearing aids. It focuses on the lifestyle and actions of the wearer for optimized support in every situation. Intuitive and flexible programming software makes Signia Xperience adaptable and user-friendly, just another way we're putting the wearer first.

AMS

Acoustic Sensors

Analyzing and adapting to the acoustic changes around you, these sensors deliver personalized amplification and a clear understanding of speech from any direction, mirroring optimized natural hearing experiences.

Motion Sensors

Optimizing hearing in every situation by recognizing changes in your own movement to adjust acoustic settings and maximizing audibility as you move throughout the day.

OVP

Own Voice Processing (OVP™)

Separates the wearers own voice from other speech and noise for a natural sound, increasing first-fit acceptance to 80% and keeping patients engaged in conversations.

DSP

Dynamic Soundscape Processing

Utilizing Signia's iconic binaural audio processing with Binaural Directionality, this world's first technology has been clinically proven to provide better than normal hearing in noisy situations.

1 Haubold J. (2019) Real-world effectiveness of Signia Xperience Dynamic Soundscape Processing. Unpublished Manuscript.

2 Froehlich M, Branda E, Freels K. (2019) New dimensions in automatic steering for hearing aids: Clinical and real-world findings. Hearing Review. 26(11):32-36.

3 Høydal, E. H. (2017). A new own voice processing system for optimizing communication. Hearing Review, 24(11), 20-22. Further details: www.signia-pro.com/ovp-study.

4 Froehlich M, Freels K, Powers T. (2015). Speech recognition benefit obtained from binaural beamforming hearing aids: comparison to omnidirectional and individuals with normal hearing AudiologyOnline, Article 14338. Retrieved from <http://www.audiologyonline.com>

Signia App for Patients

Beyond streaming and remote control capabilities, the Signia app is customized to display specific features based on the patient's hearing aid model and gives them freedom and support with access to:

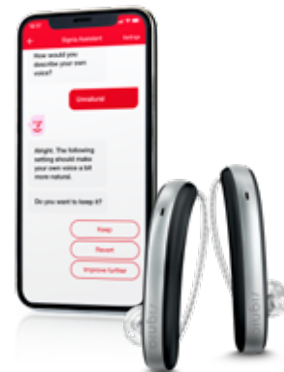

Telecare for remote care support with you! Patients fitted with Signia Telecare have a 19% higher acceptance rate than patients fitted without it.

Signia Assistant for on-demand AI support. 93% stated that using the Signia Assistant improved their satisfaction for listening in difficult situations.

Signia Face Mask Mode for an immediate boost in speech with the simple tap of a button. Facemasks have been shown to reduce audibility by up to 30%, and make lip reading impossible.

Signia TeleCare – 3.0

Proven remote care support to remain virtually connected to your patients

Remain connected with patients — Communicate with patients through Signia's safe and secure connection on any laptop, smartphone, or computer.

Higher patient satisfaction — More flexibility to support patient needs.

- In-person or remote activation of TeleCare for new and existing patients.
- Remote adjustments via Connexx.
- Compatible with multiple Signia platforms (Nx, X).
- Adjustments are sent to the patient in real-time (synchronously).

Patients fitted with Signia Telecare have a 19% higher acceptance rate than patients fitted without it.*

CROS X — RICs

DID YOU
KNOW?

CROS Pure Charge&Go X

CROS Pure 312X

- Li-ion rechargeability and auto on/auto off function when removed from charger for easy handling.
- World's first CROS/BiCROS technology to benefit from acoustic-motion sensors for the clearest speech understanding that adapts to the wearer's movements (with BiCROS).
- Own Voice Processing (OVP™) and Binaural Directionality (narrow focus)(with BiCROS).
- Directional pattern skewed toward the unaidable ear for improved speech understanding.
- CROS mixing-level adjustment available in the Signia App to balance spatial benefit vs. noise level.
- Compatible with Signia App and miniPocket™.

Signia leads the industry in CROS/BiCROS technology.

A survey* among hearing care professionals found that:

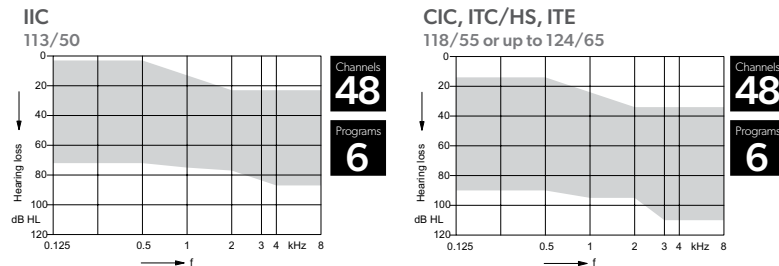

- Signia CROS technology received an average of **4.5 out of 5 stars**, the majority stating it is the **BEST TECHNOLOGY** on the market.
- Most reported that they and their patients were **EXTREMELY SATISFIED** with Signia CROS.

When asked for specific feedback, here's what your peers had to say:

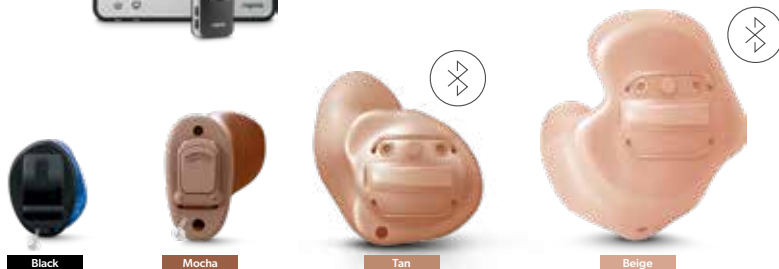

- "It is **the only CROS product that I have had success with**. These patients still have some challenges, but overall they **accept the fitting at a much higher rate than any other CROS product** I have tried."
- "Patient is **hearing in situations they never heard** with their old [competitive CROS product]."
- Although we have used [competitor] in the past, my **previous [competitor] users who now have the Signia CROS are happier**.

miniReceiver 2.0

Receiver Types

Robust connector

Protects against dust, dirt, and moisture

Color indicator

Blue left side and red right side immediately identifiable

Reliable click interface

Proven connection to Click Domes™ and Click Molds™

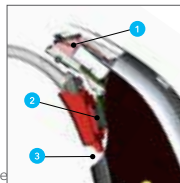

Effective 2-step wax protection

In combination with Click Domes and Click Molds

SIM Card Smart technology

- Auto identification safety feature
- Reliable and secure logical connection
- Enables better sound quality

- 1 Front microphone moved to top
- 2 SIM card
- 3 Plug and jack moved down

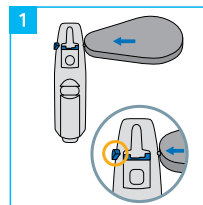

Quick Guard

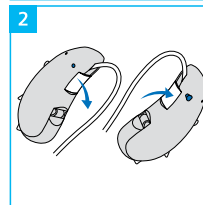

The high-tech filter reliably protects the hearing aid by repelling dirt, cerumen, oil, and water – for extra-long usability

miniReceiver 2.0 – exchanging is as easy as 1, 2, 3

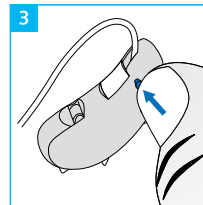

The miniReceiver 2.0 is easily exchangeable. To replace the miniReceiver, use the exchange tool to open and close the locking bar for reliable securing and no risk of dislodgement.

Open the locking bar.

Remove / Insert the miniReceiver.

Close the locking bar.

Watch handling videos online

veterans.signiausa.com/howto

miniReceiver 2.0

receiver types

S, M and P miniReceivers are available for size 0-3 and M miniReceivers are also available in size 4

Type S

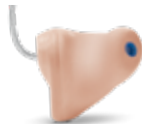

Type P

Type M

Type HP

Correct position of receiver in ear canal

PROPER insertion depth

When the receiver length is accurate and the dome fits well, the lateral end of the receiver should barely be visible and the receiver wiring should be flush against the ear.

IMPROPER insertion depth

If the receiver is clearly visible in the ear and there is bending of the receiver wiring, then the insertion depth is insufficient.

RIC miniReceiver 2.0 wax protection

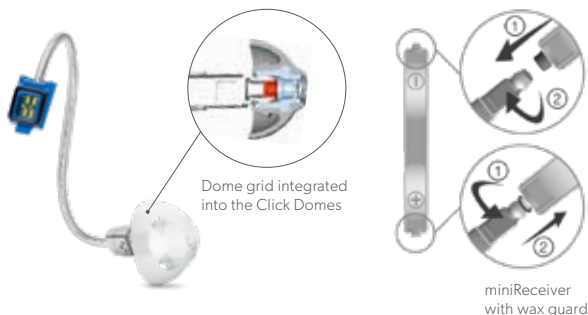

miniReceiver 2.0 is equipped with the proven 2-step wax protection system.

The wax grid in the Click Domes and Click Sleeves has been modified and is now made of a soft silicone and is easily squeezed. The Click Domes and Click Sleeves can be replaced by the Audiologist or the patient.

A second line of defense sits directly in the tip of the receiver itself. The miniReceiver wax guard is an additional filter that prevents cerumen from entering the receiver and can easily be exchanged to ensure optimal sound quality.

With these two effective and easy-to-clean exchange measures, most patient problems with cerumen can be resolved quickly and easily.

Effective 2-step wax protection (wax guard)

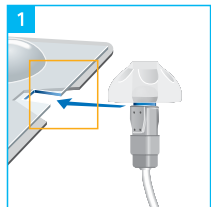

How to remove and replace Click Sleeves and Click Domes

Replacing Click Sleeves or Click Domes is simple

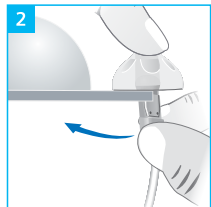

The packaging is designed to help you easily remove used sleeves and domes.

Once the used sleeve or dome is removed, simply press the tip of the miniReceiver unit into the new Click Sleeve or Click Dome until it clicks in.

Remove

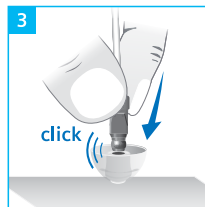

The Click Sleeve/Dome packaging is designed with a slot for removal of the single dome.

Slide the miniReceiver into the slot and gently remove the used Click Sleeve/Dome.

Connect

Press the tip of the miniReceiver unit into the Click Sleeve/Dome. The miniReceiver clicks in and is ready for use!

Click Sleeve 2.0 & Click Domes

For Signia Xperience RICs and the ITE Silk

Premium acoustic coupling for superior sound and comfort

The new material provides better durability and ensures longer wearing time. Turn protection and side indicators offer better usability for orientation and improved comfort for the wearer.

The flexible way to fit.

Fitting your patients with Click Domes is quick and easy thanks to the innovative click mechanism. For even more flexibility, you can instantly fit your patients with the miniReceiver size P using a Double Dome. Order the Click Domes as needed. You will receive them in various sizes and forms so you can adapt them to the hearing loss and ear anatomy of your patients easily and reliably.

- Integrated silicone grid for wax protection
- Disposable solution for frequent replacement
- Click interface for reliable and easy use

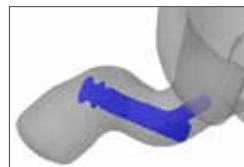

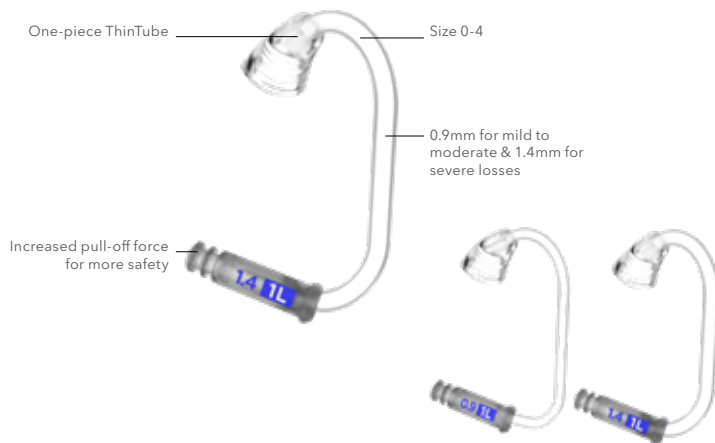

Open	For patients who require maximum comfort and no occlusion.	4 mm 8 mm 10 mm	
Semi-Open	The new semi-open dome combines the benefits of an open and a closed dome for patients who desire the comfort of an open fitting but need more power.	8-12 mm	
Closed	For patients who require more loudness than the open dome can offer.	6 mm 8 mm 10 mm	
Double	For patients who require broad-band amplification and more retention.	8/10 mm 10/12 mm	

NEW EarWear 3.0

New for Motion Charge&Go X BTE and P BTE

Both ThinTube 3.0 options offer proven better retention, comfort, usability and physical fit rate

The new 1.4mm-width PowerTube also delivers a cosmetically appealing solution for more severe degrees of hearing loss.

Retention

Improved bending of tube + outlet locks the acoustical coupling reliably into the ear canal, prevents lateral migration and makes concha-locks redundant.

HOW TO ORDER IN ROES

ROES Main Menu – Patient Orders.

Select an Action: Wireless Devices

Remotes

Wireless Transmitter

Select Device Type: SIVANTOS

Select Make: StreamLine Mic

StreamLine Mic – Overview

Multi-function button (MFB)

- Switch on (press 3 sec) and off (press 6 sec)
- Toggle between two modes:
 - Bluetooth® Phone Mode
 - Remote Microphone Mode

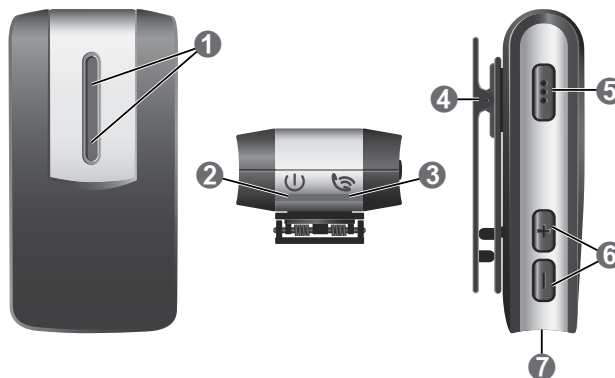

Wearer controls/status indicators

- VC / Program up
- VC / Program down
- Power indicator
- Status indicator

StreamLine Mic offers intuitive onboard control and status elements

Accessories included in the shipment

- 2 lanyards (regular and long)
- USB wall plug + USB connector
- Pouch
- User Guide

StreamLine Mic controls

- 1 Microphones
- 2 Power indicator 
- 3 Status indicator 
- 4 Lapel clip
- 5 Multi-function button (volume, program, mute) 
- 6 Volume buttons  and 
- 7 USB port for charging

StreamLine Mic – Pairing Quick Start Guide

Pairing with Hearing Aids

- Open/close the battery doors of the hearing aids and/or place in/out of the charger to place them in pairing mode.
- Turn on StreamLine Mic by holding down the MFB until the power indicator is green. This takes approximately 3 seconds. The status indicator flashes yellow.
- Place both hearing aids close to StreamLine Mic (maximum distance 20 cm or 8 inches). The pairing process starts automatically. Pairing is finished when the status indicator is solid yellow.
- A solid green power indicator and solid yellow status indicator verify connection to hearing aids is successful with no mobile device paired.
- Your hearing aids need to be paired once with StreamLine Mic.

Pairing with Smartphone

- Confirm that Bluetooth® of the mobile device is on.
- Turn on StreamLine Mic by holding down the MFB until the power indicator is green. This takes approximately 3 seconds.
- Hold down the the MFB and “+” button on the StreamLine Mic at the same time until status indicator flashes blue. This takes approximately 6 seconds.
- The wearer has 3 minutes to complete the pairing.
- Select “StreamLine Mic” from the list of detected devices on the Bluetooth® menu.
- If requested, enter the PIN “0000”.
- A solid green power indicator and solid blue status indicator verify connection to smartphone is successful.

StreamLine Mic – Battery Runtime

- Charging status is clearly displayed via power indicator on the StreamLine Mic
- Full charge takes approx. 2 hours
- Up to 6 hours battery runtime after full charge with full functionality (phone calls, audio streaming, remote mic)
- Can be charged via USB or usual plug-in (all necessary cables are included in the delivery)
- Can be used while charging

StreamLine TV – Compatible with all Signia Bluetooth® hearing aids

The perfect companion
for TV fans.

StreamLine TV.

Thanks to Streamline™ TV audio from television or any device with audio output can be fed directly into Signia X and Nx hearing aids. Wearers can even adjust the volume individually via the Signia app.

All wearers of X and Nx hearing aids have direct binaural streaming for TV via the StreamLine TV.

This includes use without the Signia app for non-smartphone users.

HOW TO ORDER IN ROES

ROES Main Menu – Patient Orders.

Select an Action: Wireless Devices

Remotes

Wireless Transmitter

Select Device Type: SIVANTOS

Select Make: StreamLine TV

Pairing for StreamLine TV

If ordered together, Signia will pair all Bluetooth® compatible hearing aids to the Streamline TV.

The hearing aids need to be paired once with the transmitter. After that, the pairing is saved in the hearing aids and remembered each time they are turned on.

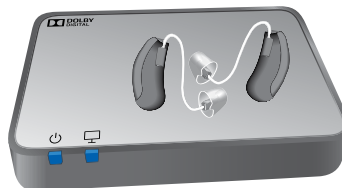

- Ensure that the transmitter is connected to the power supply.
- Turn the hearing aids off and on again: open and close the battery compartments. If your hearing aids do not have a battery compartment, turn them off and on as described in the hearing aids' user guide.
- Place both hearing aids close to, or on top of, the transmitter. The pairing process starts automatically.
- Observe the indicators:

Description

If pairing is completed, both indicators are blue for about 30 seconds.

Multiple users:

- The transmitter can be paired to multiple hearing aids. All hearing aids will be able to hear the same audio signal.
- To clear the pairings of one current user, first reset the transmitter to factory settings. This will clear the pairings of all users. After that, pair the hearing aids of the other users again. Refer to the section "Resetting to factory settings".

Connecting StreamLine TV

TOSLINK connection

- Before connecting the cable, remove the protection caps from the TOSLINK cable plugs.
- Plug the cable into the TOSLINK **input** of the transmitter and into the TOSLINK (optical audio) **output** of electronic device. To prevent the TOSLINK cable from breaking, do not forcefully bend it.

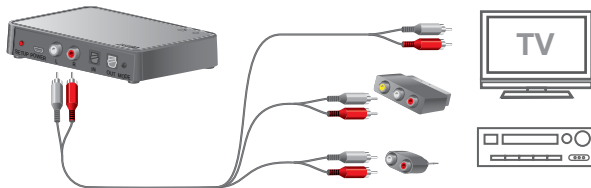

Further information

- Refer to the electronic device's manual: set the output format of the electronic device to either PCM (pulse-code modulation) or Dolby® Digital.*

RCA connection

- Plug the cable into the RCA connections of the transmitter.
- Plug the other side of the cable into the RCA output of the electronic device or via adapter into the SCART or via mini jack output of the electronic device.

For more information and details on how to connect to your home theater amplifier or a sound bar watch the handling videos online at veterans.signiausa.com/howto

miniPocket — Remote control compatible with all Signia hearing aids

Small enough to hang on a keyring, the miniPocket™ is ideal for wearers who want quick, discreet control of their hearing aids without using a smartphone.

- Battery type CR2450
- Pairing remains in place when battery dies and is replaced

Components

- ❶ Status LED
 - ❷ Volume buttons
 - ❸ Keyring
 - ❹ Key lock switch
 - ❺ Program change button
-

Pairing hearing aids with miniPocket

1. Move key lock switch to 'lock' position

2. Turn on hearing aids and place in ears
3. Hold down **P** button on the remote control while switching the key lock to the unlock position
4. Release **P** button (LED on)
5. Press and hold **P** button until the pairing confirmation tone is heard
6. Move Key Lock switch to Lock position to exit pairing mode

HOW TO ORDER IN ROES

When ordering a hearing aid in ROES, look for the "Select a remote" dropdown. Select "miniPocket"

Rechargeability

Closed-lid Inductive Charger

- Compatible with Pure Charge&Go X and Motion Charge&Go X.
- Dehumidifies, fits custom molds.

Styletto X Charger

- Compatible with Styletto X.
- Portable, closed-lid charger equipped with Qi Wireless Technology — enables wireless charging on any standard charging pad, including those built into cars and cafe counters. *

Dry&Clean Charger

- Each charger is compatible with either the Motion Charge&Go P X and Motion Charge&Go SP X. (There are two models of chargers, one for P and one for SP.) The world's first hearing aid chargers that simultaneously dry and clean molds/earpieces in just 15 minutes using UV light (UV-C).

*Wireless charging pad not included with purchase

Closed-lid Inductive Charger

NOTICE

Please make sure that the power plug is easily accessible to remove it from power supply if necessary.

- Connect the charger to the power supply. All LEDs for each charging slot turn on successively indicate the charger has power and is ready for use.
- Put the hearing aids in the charging slots as shown in the picture. You can charge both hearing aids at the same time. The hearing aids are automatically turned off and start charging. The charging status is indicated, see table "Charging status".
- When you want to use your hearing aids, take them out of the charger. They will automatically turn on.

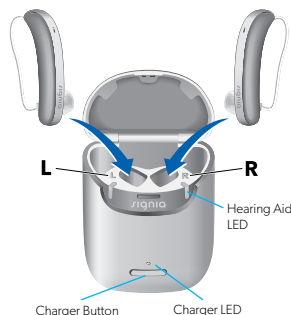

Charging status

LED	Status description
	No LED: Charger is not connected to power supply.
	Single green LED turns on successively: Charger is connected to a power supply and ready to charge. No hearing aid is inserted in the respective charging slot or the hearing aid is not inserted correctly.
	Flashing orange LED: Charging status of the hearing aid is read out before charging starts.
	Single orange LED: Charging status 0 to 33 %
	Turn on single green LED: Charging status 34 to 66 %
	Turn on two green LEDs: Charging status 67 to 99 %
	Three green LEDs: Hearing aid is fully charged.
	Single orange LED flashes successively: Cooling phase Charging is resumed after 5 minutes.
	Flashing red LEDs: Error Read more in section "Troubleshooting".

Stylecto X Charger

- Place the right hearing aid in the charging slot marked with an "R", and the left hearing aid in the charging slot marked with an "L".
- Stow the ear pieces nicely.
- Close the charger's lid for battery power saving reasons.
- The hearing aids are automatically turned off and start charging. The charging status is shown for 7 seconds.

If the status LEDs do not light up when you insert the hearing aids, check the following:

- The hearing aids are not correctly placed. Push them slightly into their charging slots or close the charger's lid.
- The charger is turned off. Press and hold the button for 5 seconds to turn on the charger.
- The charger's internal battery is too low for mobile charging. Connect the charger to an electrical outlet.

NOTICE: If you put a hearing aid in the wrong charging slot, the receiver cable may be damaged when closing the charger's lid.

Charging status of hearing aids

The LED next to the hearing aid indicates the charging status of the hearing aid. Note that the status is only displayed immediately after putting the hearing aids in the charger, when you briefly press the button or when you open the lid. When the charger is off, no status is displayed at all.

Hearing Aid LED Status description

Pulsing green: Hearing aid is being charged.

Green: Hearing aid is fully charged. Internal battery has enough capacity to fully charge two hearing aids.

Charger LED Status description

LED is off: No hearing aid is in the charger, hearing aid is not placed correctly, or charger is off.

Pulsing orange: Cooling phase. Charging is resumed when the device has cooled down. Please refer to section "Troubleshooting".

Blinking red: Hearing aid error. Please refer to section "Troubleshooting".

Green: Internal battery has enough capacity to fully charge two hearing aids.

NEW Dry&Clean Charger

For Motion P X BTE and Motion SP X BTE

Cleaning and Drying

- Drying and cleaning focuses on tubes, ear tips and molds.
- Put the hearing aids into the charging slots and close the lid.
- UVC cleaning starts automatically after closing the lid and lasts 15 minutes.
- Ongoing UVC cleaning process is indicated by LEDs (see table "Charging and cleaning status").
- Drying starts automatically after closing the lid and lasts 4 hours.

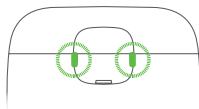

Charging

A full charging cycle takes approximately 3 to 4 hours.

After 30 minutes, it is possible to use your hearing aids for up to 7 hours.

Charging times may vary due to the use of the hearing aids and the age of the power cell.

Dry&Clean Charger

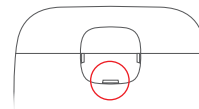

CHARGE INDICATORS

Solid yellow 	The charger is detecting the hearing aid.
Flashing green 	The hearing aid is charging, low battery, less than 40%.
Glowing green 	The hearing aid is charging, battery more than 40%.
Solid green 	The hearing aid is fully charged, battery 100% charged.

One indicator flashing red 	An error occurred during charging, and the charging has stopped.
Both indicators flashing red 	An error occurred during charging, and the charging has stopped.
Flashing yellow 	The temperature of the hearing aid has become too high during charging, and charging is paused.

DRY AND CLEAN INDICATORS

Solid yellow 	The maintenance cycle is paused, but the charging cycle continues.
Flashing white 	The maintenance cycle is in progress (drying/UV-C).
Solid white 	The maintenance cycle is complete.

Flashing red 	An error occurred during the maintenance, the cycle has stopped.
Flashing yellow 	The maintenance cycle is paused due to overheating (fan still running).

How to order a Charger in ROES

Choose from Other Commodities, and follow these ordering steps:

ROES Main Menu – Patient Orders

Select an Action: Other Commodities
Accessories

In Commodity Group pull-down menu, choose: SIVANTOS

In Vendor pull-down menu, choose:

In Search box please enter one of the following words:

ROES Name	Description	Part Number
Inductive Charger II	Closed-lid inductive charger	10966942
Charger Styletto X	Styletto X charger	10972015
Dry & Clean Charger Motion X BTE P	Dry & Clean Charger for Motion Charge&Go P X BTE	10991638
Dry & Clean Charger Motion X BTE SP	Dry & Clean Charger For Motion Charge&Go SP X BTE	10991644
Charger Active Pro X	Charger for Active Pro X	10991347
Smart Lithium-ion Dryer	NX and older charging options	10960141

NOTE If you want it delivered to your station, then change the “Deliver To” shipping address, otherwise, it will ship to the patient by default. Please note: a charging unit comes shipped with every Li-ion hearing aid order.

Portable Power Supply

- The Portable 2600mAh Mobile Power Bank is the perfect power solution when on the road or stuck somewhere without convenient electricity.
- It fits comfortably in a pocket, purse, backpack, or laptop bag to keep Pure Charge&Go or Motion Charge&Go hearing aids charged when needed.
- Capacity of 2600mAh will provide three full charges.

Signia Fitting Guide

NOTE: All ordered hearing aids have already been First Fit.

1. Select your patient from NOAH patient database
2. Launch Signia Connexx fitting software
3. Select "Detect Hearing aids"

Audiogram

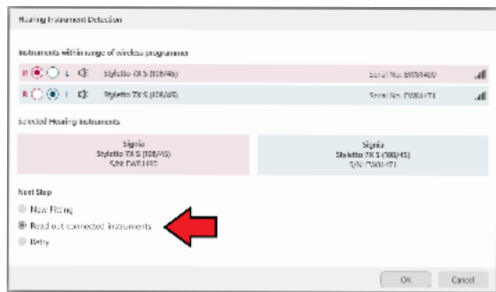

Detect Hearing Instruments

Hearing Loss Simulator

4. Once hearing aids are detected, read out connected instruments

5. Run OVP (Own Voice Processing)

For optimal results

Complete the OVP training: Tell your patient that they will hear a beep, and that they should count loudly and continuously from 2100 upwards. Example 2100, 2200, 2300 and so on.

OVP is automatically enabled. Select "OK".  Training was successful
