Step 3 Wiring

NOTE ⚠⚠⚠ : After installed SIM card correctly , it is very important to connect the tracker with external power no less than 12V for power supply before operation!

Step 4 Configure APN

Please get the exact correct APN name from local SIM card provider. Take the tracker to a good signal place for operation and configure the APN for it as below:

SMS Command Format	Reply	Example	Note
APN,ApnName,User, Password#	SET APN OK	APN,orange, orange,orange#	If the SIM card has APN user and APN password, then use this command.
APN,ApnName#	SET APN OK	APN,internet#	If the SIM card operator doesn't have APN user and APN password, then please use this command.

Note: The APN information is very important, it must 100% correct to match with the sim card of the tracker, if you configured wrong APN, the tracker also will reply "SET APN ok" but it will can't get online!

* Send this sms command from the center number:

RELAY,A#

A=0/1/2; (0: Resume Fuel; 1: Cut Off Fuel Immediately;
2: Cut Off Fuel Safely)

For example:

b. Vibration Alert:

This vibration alert function just work under stationary status. How to use this function:

- * Configure SOS numbers for the tracker by this sms command:

SOS,A,1st number,2nd number,3rd number#

3 SOS numbers supports at the most

- * Enable the device to enter into arm mode by this sms command: **ARM#**

- * Configure the alarm ways by this sms command:

SENALM,[A],[M]#

A=ON/OFF, default: OFF;

M=0/1/2, way of alarming,

0 : GPRS only, 1: SMS+GPRS, 2: GPRS+SMS+phone call, default:1

- * Keep the device under stationary status more than 5min to let it enter into sleep arm mode;
- * Vibrate the device then the tracker will send the vibration alarm messages

For example:

c. Open Door Alarm

- * Command format: **DOORALM,A,M#**

A=ON/OFF, default: ON;

M=0/1/2, way of alarming, 0: GPRS only, 1:

SMS+GPRS, 2: SMS+GPRS+Call,default:1;

For example: DOORALM,ON,1# (Means once the door open the alarm message will be sent out via SMS and server)

For example:

d. Engine Start and Flameout Alarm

- * Command format: **ACCALM,A,B,M#**

A=ON/OFF, Default: ON;

B: 0/1/2; 0: ACC ON Alarm; 1: ACC OFF Alarm; 2: ACC

ON&OFF Alarm; Default:2

M: 0/1/2 (way of alarm): 0 : Server only,

1: SMS+Server, 2: SMS+Server+Call, Default:1;

For example: ACCALM,ON,2,1#

This means once the device detects engine start and engine flameout it will send alarm message via server and sms.

For example:

6. Installation Recommendation

- 1) The device should face up to the sky.
- 2) Metal thermal barrier of heating layer of the windshield affects the signal.

7. Troubleshooting

Type	Use
Unable to connect to tracking platform	Check the APN and settings. Check whether the data service of SIM card is enabled. Check the balance of SIM card.
Tracker shows offline	Check whether external power is still connected. Check if the vehicle entered network blind area. Check the balance of SIM card.
Unable to locate	Make sure the top side facing upward without metallic things shielded. Make sure it's not in area with no satellite coverage.
Location drift	In area with poor GNSS signal (tall building around or basement), drifting may happen. Check whether vibration happens around to trigger the accelerator.
No command reply	Make sure command format is correct. Vehicle may be in network blind area. Make sure SIM card is well inserted and has SMS service.
