Self-Install Cellular Coverage Solution for Small Offices, Retail, and Homes

In today's digital world, many people still experience poor cellular coverage. This not only impacts productivity in the workplace, but also causes a poor experience for people at home wanting to make calls or stream content on demand.

The Cel-Fi CONNECT C41 Smart Signal Repeater solves the problem of poor coverage by making it easy for businesses and homeowners to improve their 3G, 4G, or 5G in-building cellular reception. Combining plug-and-play operation with industry-leading performance, CONNECT C41 is designed to be set up and boost cellular signal within minutes.

Whether coverage is needed for enabling mobile workstation essentials in the office or simply enjoying connectivity at home, Cel-Fi CONNECT C41 provides peace of mind that poor reception is a thing of the past.

Powered by IntelliBoost

The Nextivity proprietary IntelliBoost chip uses digital signal processing to enhance cellular performance in real-time and ensure Cel-Fi solutions provide unbeatable coverage for organizations and homes. In addition to delivering the industry's highest gain at the lowest cost per square foot, IntelliBoost enables Nextivity solutions to be unconditionally network safe and approved for use in over 100 countries by over 200 mobile network operators globally.
