Cable

Setup Your Hub

- 1 Connect the Hub to power and your internet router using only the cables provided.

Avoid power strips and switched outlets

2

Download and install the latest INSTEON for Hub App from the Apple App Store, Google Play or Amazon App Store.

Don't feel like searching? Scan the QR Code and tap your store.

3

Join the the same WiFi network to which the INSTEON Hub is connected and launch the App. Create a new account.

Remote Access

You can monitor and control your devices when away if you setup Remote Access. You can even see your IP Camera from anywhere in the world.

We're here to help. Call us, chat with us online or visit [insteon.com/kits](https://www.insteon.com/kits)

If you need help setting up the Hub and/or camera for remote access, give our support team a call.

866.243.8022
5AM - 7PM M-F, 6AM - 3PM SAT Pacific Time

Gathering the following information will help speed up the process:

Router IP Address _____

Router User Name (if any) _____

Router Password _____

Wi-Fi Network Name _____

Wi-Fi Password _____

Add Devices

4

Follow the on-screen instructions to add your INSTEON devices. Quick Start Guides are included for your convenience.

You're done configuring your INSTEON Hub.

Create a Schedule

Schedules can be set for individual devices or entire scenes. Go to the device or scene properties and tap Schedule.

Time of Day

Sunset

Sunrise

Configure Alerts

Receive an email or text message alert every time a sensor or device is activated. Enable alerts by visiting the device properties and tapping Alerts.

Trigger a Scene

Sensors can activate scenes. To setup a trigger, simply add a sensor to a scene.
