The diagram shows a 3D printed part with a hole. A cross-section view is shown in the top left corner, indicating the internal structure of the part. The main part is a perspective view of the 3D printed object, showing the hole and the surrounding material.

NOTE: A value of 0.00 indicates no effect.

Hydrocarbons may also be produced from coal. They are considered a secondary resource because they are produced from a primary resource, coal. Therefore the specific uses of hydrocarbons are subject to change when fuel prices change.

ERROR CODE	ERROR NUMBER	SOLUTION
$CLIPAN(REF) \neq (TRF) \text{ (wrong)}$	1	Check the correlation between angles and the corresponding lengths, and make the angle the same as the angle indicated in the table.
$CLIPAN(REF) \neq REF$	10	Check the angle between the two lines in the corner, or check the angle between the two lines.
$DOCK(REF) \neq REF$	5	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) \neq REF$	14	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) \neq REF$	7	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) \neq REF$	9	Check the angle between the two lines in the corner, or check the angle between the two lines.
$DOCK(REF) + (REF) \text{ (wrong)}$	4	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) + (REF) \text{ (wrong)}$	11	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) + (REF) \text{ (wrong)}$	10	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) + (REF) \text{ (wrong)}$	9	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) + (REF) \text{ (wrong)}$	9	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) + (REF) \text{ (wrong)}$	21	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) \text{ (wrong)}$	14	Check the angle between the two lines in the corner, or check the angle between the two lines.
$RASTERIZATION(REF) \neq REF$	24	Check the angle between the two lines in the corner, or check the angle between the two lines.
$CLIPAN(REF) + DOCK(REF) \text{ (wrong)}$	9	Check the angle between the two lines in the corner, or check the angle between the two lines.
