8. 2.3X Glass Eyepiece Convex Lens
9. Head mounted bracket screw hole
10. Mode / Menu
11. IR ON/OFF
12. Power ON/OFF
13. 2.4inch Inner IPS screen
14. Focus Ring
15. Objective Lens
16. Tripod Thread
17. Micro SD card slot
18. Type-C/GPS port

## **HOW TO USE NV BINOCULARS**

### **BATTERY AND SD CARD INSTALLATION**

#### **Install Battery**

Unscrew the battery compartment cover by hand, insert the battery, and then install the battery compartment cover.

#### **Charging Your Device**

After installing the lithium battery, you will need to charge the device. Open the Rubber Cap on the bottom of your device to find the charging port and memory card slot. Insert the USB type-C end of the included charging cable into the charging port, then insert the standard USB end into a USB power port such as one on a PC or a wall adapter.

#### **Install Micro SD Card**

- Open the rubber cap covering the Type-C Port and Micro SD Slot, and insert a micro SD card (up to 128 GB, class 10 or greater for best results with video files) into the Micro SD Slot (metal contacts facing down, see card icon right of slot for correct orientation).
- If you will only use Night Vision Binoculars for “live” viewing and do not wish to use it for photos/videos, the unit will function normally without a card.

**WARNING: NEVER LOOK AT THE SUN THROUGH THIS NIGHT VISION UNIT (OR ANY OTHER OPTICAL INSTRUMENT). IT MAY PERMANENTLY DAMAGE YOUR EYES AS WELL AS THE UNIT.**

## Powering On & Off

### Powering On

Press and hold the Power button to power on your night vision binoculars.

### Powering off

Press and hold the Power button to power off your night vision binoculars.

### Setting up your night vision Binocular:

1. Power on your device and look at the screen.
2. Adjust the sharpness by turning the focus wheel in either direction until it becomes clear.
3. Zoom up to 8x by pressing and holding the Up/Zoom+ button(4) until you reach your desired level. If you keep pressing the Down/Zoom- button(3), you will zoom down to the default of 1X.
4. When using the binoculars at night, the lens should automatically adjust to the brightness level. You can use this night vision binoculars without IR light and get color image on screen.

For better night vision performance, you can tap the IR button (11) to turn on IR light to get clear black/white image on screen. When IR light on, you can tap UP(4) or down(3) button to adjust the IR brightness from levels 1 to level 7 to get better image quality and night vision distance. You can tap IR button(11) again to turn off IR light.

### Taking video:

1. When you power on your night vision binoculars, it will automatically start on video Mode. You should see the video icon  in the upper left corner of your LCD screen. If you do not see the camera icon, short press the Mode/Menu button (10) until it appears.
2. Adjust the image sharpness by turning the focus wheel (14). For better night vision performance, you can tap IR button to turn on IR light, and adjust the IR light brightness level by Pressing the UP (4) or Down(3) button.
3. Press the OK/Confirm button (2) to capture the video. Press it again to stop recording video and the video file will be saved on Memory card automatically.

### Taking photo:

1. In Standby mode, short tap the Mode/Menu button (10) until you see the camera icon  in the upper left corner of your screen.
2. Adjust the image sharpness by turning the focus wheel (14). For better night vision performance, you can tap IR button to turn on IR light, and adjust the IR light brightness level by Pressing the UP(4) or Down(3) button.

### FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction Specific Absorption Rate (SAR) information: This product meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device type: DT69 (FCC ID: 2BM48-DT69) was also tested against these values. The highest SAR value for accessories worn on the body is 0.45 W/kg, Head Tissue is 0.25 W/Kg. The device tested typical body wear operations with the back of the product 0cm from the body. To meet FCC RF exposure requirements, use accessories that maintain a separation distance of 0cm between the user's body and the back of the product. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
