Interface and Buttons

- | | | |
|--------------------|----------------------------|-----------------------------|
| 1. Signal status | 5. Total user status | 9. Home button |
| 2. Operator status | 6. SMS | 10. Nano SIM slot |
| 3. Wi-Fi status | 7. Time & date information | 11. USB Type-C port (Input) |
| 4. Battery status | 8. Power button | 12. Reset button |

Home button

- Click to toggle between time information, SSID information, speed information and Wi-Fi fast connection, or QR code information.

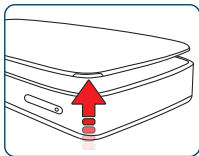

Toggle between Wi-Fi 2.4GHz / 5GHz

- Press and hold for 5 seconds to switch between Wi-Fi 2.4GHz mode and 5GHz mode.

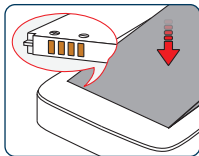

3 Hardware Installation

1. Insert SIM card and battery

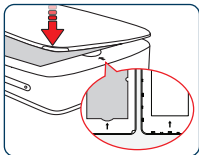

Please follow the following to install the battery and SIM card.

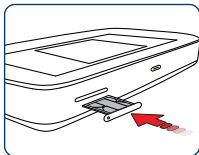

1. Open the battery cover upwards.

2. Insert the battery into the battery compartment gently.

3. Put the battery cover back to its original position.

4. Use a SIM ejector pin (or a small pointed object) to eject the tray. Insert the nano SIM card into the tray, then gently push the tray back into the device.

Note: The SIM ejector pin is not provided - please use your own pin or a similar tool.

2. Charge the battery

If the unit has not been used for a long time or the battery is completely depleted, the unit may not power up immediately after the charger is plugged in. Please charge the battery for a period of time before trying to turn it on.

Note:

1. **Recharge the battery:** connect the provided USB cable to DL-7211's USB Type-C port.
2. **Power on:** Press and hold the power button for 5-10 seconds until power is turned on.

4 Web-based Configuration

1. Connecting to the device.

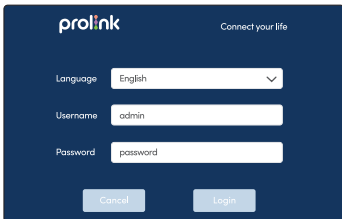

A. With Wi-Fi connection.

- Use your normal Wi-Fi application on the client to search for the available wireless network
- Select the SSID of your device (default SSID **Prolink_xxxx** from the device screen) to connect
- Default password is **prolink12345**

B. With USB connection.

- Connect the device with USB cable into Computer USB port
- NDIS driver will be installed automatically

2. Open the browser and enter <http://192.168.1.1> (<http://192.168.2.1> with USB connection). Enter default Username: **admin** and Password: **password** to login.

The screenshot shows the Prolink web-based configuration interface. At the top left is the 'prolink' logo, and at the top right is the text 'Connect your life'. Below this, there are three input fields: 'Language' with a dropdown menu showing 'English', 'Username' with the text 'admin', and 'Password' with the text 'password'. At the bottom, there are two buttons: 'Cancel' and 'Login'.

You can change WiFi SSID Name, WiFi Password and Web UI Login Password for the first time login, also can Skip it and remain the default settings.

Set Wi-Fi name and Password

For better security purpose, please set a new Wi-Fi and Login password.
The password must be at least 8 characters long and must contain uppercase letters, lowercase letters, numbers, and special characters (~!@#\$%^&*~) 3 Three of them

Antaramuka dan Tombol

- | | | |
|--------------------|------------------------------|-------------------------------|
| 1. Status sinyal | 5. Total status pengguna | 9. Tombol Beranda |
| 2. Status operator | 6. SMS | 10. Slot SIM nano |
| 3. Status Wi-Fi | 7. Informasi waktu & tanggal | 11. Port USB Tipe-C (Masukan) |
| 4. Status baterai | 8. Tombol daya | 12. Tombol atur ulang |

Tombol Beranda

- Klik untuk beralih antara informasi waktu, informasi SSID, kecepatan informasi dan koneksi cepat Wi-Fi, atau informasi kode QR.

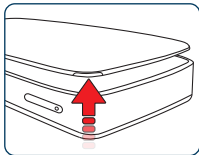

Beralih antara Wi-Fi 2.4GHz / 5GHz

- Tekan dan tahan selama 5 detik untuk beralih antara mode Wi-Fi 2.4GHz dan mode 5GHz.

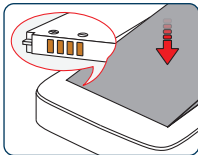

3 Instalasi Perangkat Keras

1. Masukkan kartu SIM dan baterai

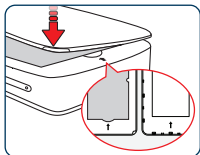

Silakan ikuti langkah berikut untuk memasang baterai dan kartu SIM.

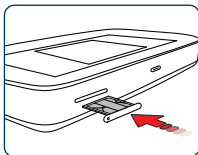

1. Buka baterainya menutupi ke atas.

2. Masukkan baterai ke dalamnya baterai kompartemen dengan lembut.

3. Pasang kembali penutup baterai ke posisi semula.

4. Gunakan pin pelepas SIM (atau benda runcing kecil) untuk mengeluarkan baki. Masukkan kartu SIM nano ke dalam baki, lalu dorong perlahan baki kembali ke dalam perangkat.

Catatan: Pin pelepas SIM tidak disediakan - harap gunakan pin Anda sendiri atau alat serupa.

2. Isi daya baterai dan hidupkan

Jika unit sudah lama tidak digunakan atau baterai benar-benar habis, unit mungkin tidak langsung menyala setelah pengisi daya dicolokkan. Harap isi daya baterai selama beberapa waktu sebelum menyalakannya kembali.

Catatan:

1. Isi ulang baterai: sambungkan kabel USB yang disediakan ke USB DL-7211 Pelabuhan Tipe-C.
2. Nyalakan: Tekan dan tahan tombol daya selama 5-10 detik hingga daya mati dihidupkan.

4 Konfigurasi Berbasis Web

1. Menghubungkan ke perangkat.

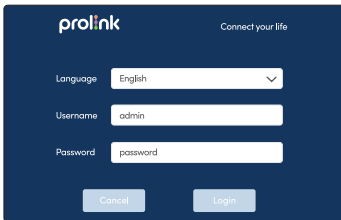

A. Dengan koneksi Wi-Fi.

- Gunakan aplikasi Wi-Fi normal Anda di klien untuk mencari jaringan nirkabel yang tersedia
- Pilih SSID perangkat Anda (SSID default **Prolink_xxxx** dari layar perangkat) untuk dihubungkan
- Default password is **prolink12345**

B. Dengan koneksi USB.

- Hubungkan perangkat dengan kabel USB ke port USB Komputer
- Driver NDIS akan terinstal secara otomatis

2. Buka browser dan masuk ke <http://192.168.1.1> (<http://192.168.2.1> dengan koneksi USB). Masukkan Nama Pengguna: **admin** dan Password: **password** untuk login.

Anda dapat mengubah Nama SSID WiFi, Kata Sandi WiFi, dan Kata Sandi Login UI Web untuk login pertama kali, juga dapat Melewatinnya dan tetap menggunakan pengaturan bawaan.

Set Wi-Fi name and Password
