

LG Xenon Battery Replacement

If you are having issues with your LG Xenon...

Written By: Micaela Saqui

INTRODUCTION

If you are having issues with your LG Xenon GR500, before attempting repairs, remove the battery for safe handling.

Step 1 — Back Case

- Turn the phone so the back side is face up.

Step 2

- Use your thumb to press on the small ridge at the bottom of the phone, then push upward to slide off the back casing.

Step 3 — Battery

- Use your index finger to pull the top of the battery out from the top center divot. Then pull the battery towards yourself to remove it from the compartment.

To reassemble your device, follow these instructions in reverse order.
