## Equator 3-Axis Handheld Setup

- Loosen both the knobs of the Pan Tilt Head and mount it on a C-stand **(Not Included)**.

- Then properly tighten & secure both the knobs of the Pan Tilt Head, as shown in the image.

- Loosen both the bolts at the side of the Pan Tilt Head with the help of an Allen key.

### Height Adjustment Side Rod Assembly

- Insert the Height Adjustment Side Rod into the Pan Tilt Head and align the bottom position using your finger.

- After aligning the Side Rod, tighten & secure both the bolts back into the Pan Tilt Head using an Allen key.

- Similarly, attach the other Height Adjustment Side Rod with the Pan Tilt Head, following the same process.

## Height Adjustment Bracket Assembly

- Loosen both the knobs of the Height Adjustment Bracket.
- Insert the Adjustment Bracket into the rods of the Dovetail Base by aligning the holes, as shown in the image.
- After positioning the Adjustment Bracket and the Dovetail Base parallel to each other, tighten & secure them via both the knobs.
- Similarly, follow the same process to attach the other Adjustment Bracket with dovetail base.

## Roll Axis Handle Assembly

- Loosen the knob of the Roll Axis Handle, then insert it in the Adjustment Bracket by aligning them together.
  - Tighten the knob after inserting the handle into the Adjustment Bracket.
- NOTE:** You can adjust the position of the handle according to your requirements.

- Similarly, follow the same process to attach another Roll Axis Handle with Adjustment Bracket.

**NOTE:** The handheld mode is more flexible, direct, fast and precise than Steadicam to control the camera.

### Features of Both Handle

- Mount the Dovetail Base with the Roll Axis Handle on the Side Adjustment Rod and parallelly align the position of the rods.

- Then secure the Roll Axis Handle by tightening both the knobs.

- Then pull the knob of the Pan Tilt Head & unlock it to give it tilting movement.

## Flycam Equator 3– axis Features

- The three-axis Flycam Equator has a tilting range of  $\pm 25^\circ$ .

**NOTE:** Flycam Equator is a three-axis zero-gravity gimbal, with a tilting range of  $\pm 25^\circ$  from center. Each with their own independent locking knobs, the stabilizer provides ample operational flexibility.

- Loosen the back knob of the Pan Tilt Head to facilitate panning movement.

**NOTE:** Flycam Equator, with a panning range of  $360^\circ$  & an independent locking knob for it, offers ample flexibility in operations.

- Loosen the tension adjustment knob to facilitate rolling movement for the setup and then tighten the knob back to lock the position.

**NOTE:** A tension adjustment knob helps you balance the setup optimally.

## Dovetail Plate with Camera Assembly

- Align the Dovetail Plate to the Camera (Not Included) then properly tighten and secure it with the help of a screwdriver.

- To secure & lock the Camera **(Not Included)** to the plate, use the provided locking lever.

**NOTE:** To adjust the height of the Adjustment Bracket, use the provided knob symbols (H- High & L- Low).

- Loosen and remove the knob of the Side Handle Bar.

- Insert the Side Handle Bar into the side hole of the Docking Bracket and properly tighten it with the help of the knob.

- Similarly, follow the same process to attach the other Side Handle Bar with Docking Bracket.

- After attaching the Docking Bracket and the Side Handle Bars together, align & mount it on a 5/8" Baby Pin **(Not Included)** via the receiver at the base of the bracket.

- After attaching the Camera (**Not Included**) to the plate, place it on top of the Dovetail Base.

- Then with the help of the provided knob of the Docking Bracket, properly tighten and secure the assembly.

**NOTE:** Mount the stabilizer on any C-Stand or Light Stand via the 5/8" Baby Pin receiver at the base of the docking bracket.

- It easily adapts to large cameras and has an O'Connor Standard Quick Release Dovetail Base Mount & Plate, ensuring quick camera setup. A docking bracket designed to hold the stabilizer in place lets you switch from handheld-mobile shooting to fixed-camera shooting in no time.

## YOUR FLYCAM EQUATOR 3-AXIS HANDHELD GIMBAL STABILIZER ALL DRESSED UP AND READY TO GO!
