

VESTIBULE INSTRUCTIONS

*Attach the vestibule to the tent **BEFORE** you attach the fly to the tent.*

- Hook the center grommet of the vestibule over the fly rod that extends out from the junction tube.
- Slide the vestibule back toward the tent. Pull the reinforcement panel up and over the junction tube.
- Wrap the shock-corded sides over the front poles and attach the S-hooks to the ring & pin at the base of each pole.
- On the four person model, at the center of each side, attach the clips to the poles.
- Pull the vestibule out and stake the front beackets down. Make sure the flaps are tucked inside vestibule.
- Attach the fly to the tent.
