ENCLOSURES

The enclosure designs listed will give you the best possible performance from your VC-Series subwoofer.

PORTED BOX

Ported boxes are the enclosure type we recommend for optimum performance of your VC-Series Subwoofer.

A ported box features a vent or port to couple the woofer's back-wave with the front-wave. This results in markedly improved efficiency and low frequency response. These enclosures are somewhat larger than the sealed alternative.

VC-SERIES V3	VCW122/124
Recommended Enclosure Volume	1.85 cu. ft.
Tuning Frequency	34 Hz
F3 (Hz)	32 Hz

SEALED BOXES

A sealed enclosure offers improved acoustic suspension and cone control, which reduces distortion. They are smaller than their ported counterparts, and offer flatter bass response with more consistency across the frequency range.

VC-SERIES V3	VCW152/154
Recommended Enclosure Volume	0.7 cu.ft.
F3 (Hz)	44 Hz
