### Product Diagram

1. USB Port

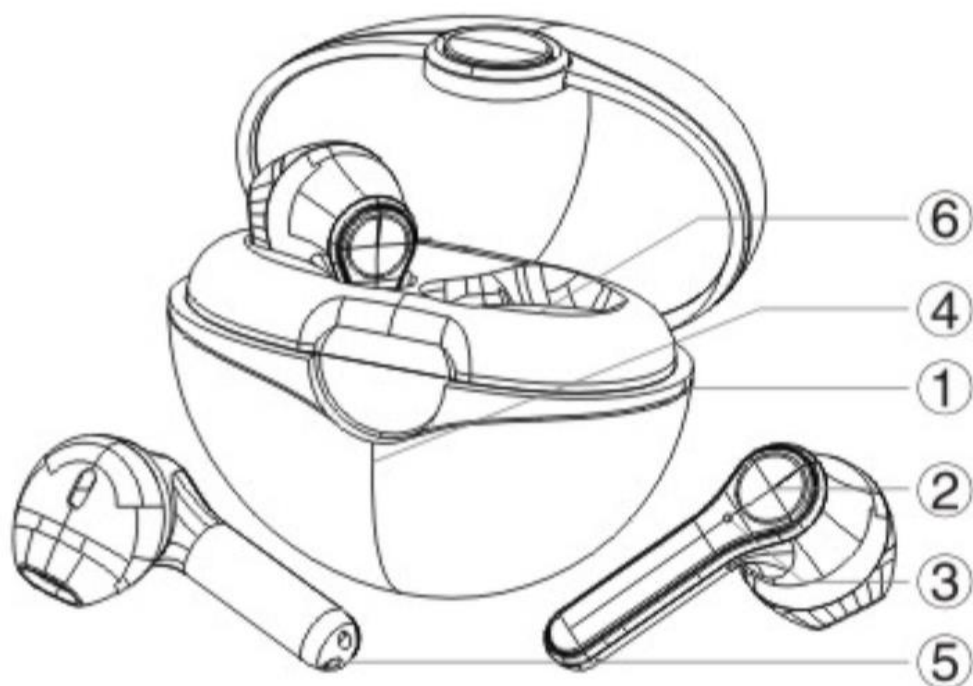

2. Multi-function Touch Area

3. Earphone Indicator Light

4. Charging Case Indicator Light

5. Earphone Charging Button

6. Charging Button of Charging Case

#### **The headset**

- 1, charging: red breathing light flashing
- 2, fully charged: lights off
- 3. Low power: red light flashes with low power alarm sound
- 4. Power on/pairing: red and blue lights flash alternately
- 5, paired : one of the hosts alternates red and blue, and the other lights go out
- 6. Connect to mobile phone: lights off
- 7, game mode: blue light breathing rhythm flashing

#### **Charge box**

- 1. When charging box power put in , the red light flashes
- 2. When the battery is fully charged, the red light is steady on. Please pull out the charging cable in time
- 3. The charging box light flashes when the cover is opened, and bluetooth headset is turned on
- 4. Close the cover of the charging box to charge the Bluetooth headset

#### **Charging Box Description**

With 300MAH charging box, can charge the earphone for about 3 times, meet the needs of listening to music outside for a long time. The red LED lights on the left and right earphones blink during charging and turn off after charging full.

(During the charging of the charging box, the red light of the charging box will be on, and when it is full, the red light will be steady on. Please disconnect the charging box from the charging device.)

#### **earphone instructions:**

1. Open box, take the earphone from the package, tear off the blue insulation patch, and then put the earphone into the charging box, close the charging box cover, and activate the earphone (or long press for 3 seconds to activate the earphone, when the red and blue lights blink alternately).

2. Open the cover of the charging box, and the left and right earphones will flash red and blue alternately, which will be paired automatically. Paired successfully, only one earphone's red and blue light flashes and the other light goes off.

3. Turn on the bluetooth of the mobile phone, find the name of the **M62** Bluetooth device on the device, click Connect, and the headset will hear the voice (Connect) indicating that the connection is successful.

4. Automatic connection

Open the cover of the charging box, and if the earphone has been connected to the phone before, the ear will automatically connect to the last connected phone

**Manual pairing method:** Turn off the bluetooth of the mobile phone, Hit three times in a row after the earphone is turned on, the earphone is turned off, and then put the earphone into the charging box. Do the same for the other earphone, close the charging cover, charge the earphone, and then open the charging cover. The left and right ears will start pairing automatically (only one of the earphones will blink red and blue), and the pairing will wait within 10 seconds.

#### **turn off**

Press the touch area of the left and right earphones for 6 seconds, and then power off after the red light blinks three times. Put earphones into the charging box to charge, and the earphone will also turn off (the earphone will turn off automatically if it is not connected for five minutes).

#### **Q&A**

The bluetooth device cannot be found on the phone

Remove all bluetooth pairing data stored on the phone, then turn on the phone's Bluetooth again and search for the device.

Headphones only have sound on one side?

1. Check whether both earphones are powered on
2. Check whether both earphones are turned on
3. Check whether the two earphones are paired successfully

The earphone is stuck or disconnected when talking or listening to music

1. The battery of bluetooth headset is low
2. The distance between the mobile phone and the Bluetooth headset is more than 10 meters
3. There is a large area of signal shielding between the mobile phone and bluetooth headset, such as a wall.
4. The left and right ears are not synchronized. You are advised to power off the device and reconnect the left and right ears.

Bluetooth headphones sound less than ideal?

New earphones need a cooking process, it is recommended to play music step by step, after a period of time, the audio quality of earphones in each audio stage will be improved.
