WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

MEET THE FELINE FAN DESIGNER

 Damian Andres (known by the LEGO® Ideas community as The Yellow Brick) is a technical product design student from Belgium. His love of LEGO building started when he was only three years old and started playing with his older siblings' LEGO sets. And he didn't have to look far for the initial inspiration for this model:

"I just wanted to build a model for myself that looked like our own cat, Miro, so my original design was inspired by his colors and personality. I also measured him, which was a big help in getting the proportions right instead of just looking at pictures. I did a lot of research and used pictures of cats on the internet to get the right shapes and proportions. I didn't have much experience with building organic shapes, so it wasn't easy! The biggest challenge was the head. Finding a well-shaped face that looks realistic was very difficult, so I experimented a lot over a long period until I found it. Then I updated the design and decided to post it on the LEGO Ideas website because I thought it might be a great product idea. At first, I didn't have the goal of reaching 10,000 supporters, I just did it mostly for fun. Then the project gained a lot of support in the first weeks. When it reached 7,500 votes, I created a little promotion video for it that went viral on social media, really boosted new interest in the project and helped it reach 10,000 votes. It's crazy and so amazing. I still can't even grasp that it has become a final project, to be honest. Thanks to everyone who supported the set!"

RENCONTRE AVEC LE CONCEPTEUR AMATEUR DE FÉLINS

 Damian Andres (connu par la communauté LEGO® Ideas sous le nom de The Yellow Brick) est un étudiant belge en conception de produits techniques. Son amour de la construction LEGO est né lorsqu'il n'avait que trois ans et qu'il a commencé à jouer avec les ensembles LEGO de ses aînés. Il n'a pas eu à chercher bien loin pour trouver l'inspiration initiale de ce modèle :

« Je voulais simplement me construire un modèle qui ressemblerait à notre chat, Miro, et mon concept original s'inspirait donc de ses couleurs et de sa personnalité. J'ai également pu prendre ses mensurations plutôt que de me contenter d'étudier des photos, ce qui m'a beaucoup aidé à obtenir les bonnes proportions. J'ai fait beaucoup de recherches et j'ai utilisé des photos de chats trouvées sur Internet pour obtenir les bonnes formes et les bonnes proportions. Je n'avais pas beaucoup d'expérience dans la construction de formes organiques, alors ce n'était pas facile ! Le plus grand défi a été la tête. Il a été très difficile d'arriver à un visage bien formé qui ait l'air réaliste, alors j'ai fait beaucoup d'essais pendant une longue période jusqu'à ce que je trouve la bonne forme. J'ai ensuite actualisé le modèle et décidé de le publier sur le site Web LEGO Ideas, car je pensais qu'il pourrait s'agir d'une excellente idée de produit. Au début, je n'avais pas pour objectif d'atteindre les 10 000 votes ; je l'ai surtout fait pour le plaisir. Le projet a ensuite reçu beaucoup de soutien au cours des premières semaines. Lorsqu'il a atteint 7500 votes, j'ai créé une petite vidéo de promotion qui est devenue virale sur les médias sociaux, ce qui a vraiment stimulé l'intérêt pour le projet et l'a aidé à atteindre 10 000 votes. C'est exceptionnel et incroyable. Pour être honnête, je n'arrive toujours pas à croire qu'il s'agit d'un projet final. Merci à tous ceux et celles qui ont soutenu l'ensemble ! »

CONOCE AL FAN DISEÑADOR DEL FELINO

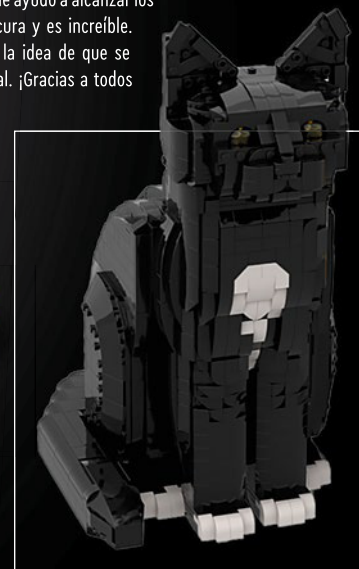

*Damien's original submission,
inspired by his cat, Miro*

*La contribution originale de Damien,
inspirée de son chat, Miro*

*Propuesta original de Damien
inspirada en Miro, su gato*

 Damien Andres (conocido en LEGO® Ideas como The Yellow Brick) es un estudiante de Diseño Técnico de Productos originario de Bélgica. Su pasión por construir con LEGO se remonta a cuando tenía solo tres años, edad a la que empezó a jugar con los sets LEGO de sus hermanos mayores. Y no tuvo que mirar demasiado lejos para encontrar el chispazo de inspiración que dio origen a este modelo. En sus palabras:

"Mi intención era tener un modelo que representara a nuestro gato, Miro, así que mi diseño original se inspiró en sus colores y su personalidad. Incluso me di a la tarea de tomarle algunas medidas, lo que resultó fundamental para determinar las proporciones precisas, algo que quizá no habría logrado partiendo únicamente de las fotos. Hice una investigación bastante profunda y también utilicé algunas imágenes de gatos tomadas de Internet para afinar las formas. No tenía mucha experiencia construyendo siluetas orgánicas, ¡así que no fue tarea fácil! El mayor desafío fue la cabeza. Dar forma a un rostro que tuviera una apariencia realista fue bastante complicado. Tuve que experimentar mucho durante un largo tiempo hasta quedar satisfecho con el resultado. Una vez que lo logré, actualicé el diseño y decidí publicarlo en el sitio web de LEGO Ideas porque pensé que podría ser una gran idea para un producto. Empecé este proyecto con el objetivo de hacer algo divertido, de modo que, por lo menos al principio, no me planteé la meta de alcanzar 10.000 votos. Aun así, el modelo tuvo una gran aceptación y recibió mucho apoyo durante las primeras semanas. Cuando la cifra de simpatizantes llegó a 7500, creé un pequeño video promocional que se hizo viral en las redes sociales, despertó el interés por el proyecto y le ayudó a alcanzar los 10.000 votos necesarios. Es una locura y es increíble. A decir verdad, todavía no asimilo la idea de que se haya convertido en un proyecto final. ¡Gracias a todos los que han apoyado este set!"

OUR FABULOUS, FURRY FRIENDS

🐾 Little Tiger, Pawesome Panther, Bob... Whatever you call your domesticated *Felis catus*, there is a good chance they will go to extraordinary lengths to ignore you completely. Unless, of course, they can reasonably convince themselves (and you) that sharing a space with a human that happens to be in their vicinity was entirely *their* idea. So, why are we so drawn to creatures that, unlike dogs who hang on their owners' every word, often treat us like lowly servants and would leave us in a heartbeat if our neighbor served a better treat?

Yes, house cats have periodically had a reputation for being arrogant little know-it-alls and have even been misconceived as creatures of witchcraft and dark magic. But for thousands of years, both our species have enjoyed numerous mutual benefits from the successful domestication of humans. Sorry, *cats*.

NOS FABULEUX AMIS À FOURRURE

🐾 Petit Tigre, Petite Panthère, Bob... Quel que soit le nom que vous donnez à votre *Felis catus* domestique, il y a de fortes chances qu'il déploie des efforts extraordinaires pour vous ignorer complètement. À moins, bien sûr, qu'il puisse raisonnablement se convaincre (et vous convaincre) que le fait de partager un espace avec un humain qui se trouve à proximité était entièrement son idée. Alors, pourquoi sommes-nous si captivés par des créatures qui, contrairement aux chiens qui s'accrochent aux moindres paroles de leurs maîtres, nous traitent souvent comme de modestes serviteurs et nous quitteraient en un clin d'œil si le voisin leur offrait un meilleur repas ?

Oui, les chats domestiques ont parfois eu la réputation d'être de petits futés arrogants et ont même été considérés à tort comme des créatures issues de la sorcellerie et de la magie noire. Mais depuis des milliers d'années, nos deux espèces ont bénéficié de nombreux avantages mutuels grâce à la domestication des humains. Pardon, des *chats*.

NUESTROS FANTÁSTICOS AMIGOS PELUDOS

🐾 Pequeño Tigre, Pantera Asombrosa, Betito... Como sea que llames a tu *Felis catus* domesticado, es muy probable que él haga todo lo posible por ignorarte por completo. A menos, claro está, que pueda tener una razón de peso para convencerse (y convencerte) de que compartir el espacio con un humano que casualmente se encuentra en sus inmediaciones fue enteramente su idea. Y entonces, ¿por qué nos sentimos tan atraídos por criaturas que, a diferencia de los perros, que están pendientes de cada palabra de sus dueños, con frecuencia nos tratan como a sirvientes inferiores y nos abandonarían sin miramientos si nuestro vecino les ofreciera un mejor trato?

Sí, los gatos domésticos han tenido fama de arrogantes y sabelotodos reiteradamente, e incluso se les ha llegado a considerar criaturas propias de la brujería y la magia oscura. No obstante, a lo largo de miles de años, nuestras dos especies han gozado de numerosos beneficios mutuos gracias al éxito de la domesticación humana. Siento decirlo de esta manera tan contundente, mininos.

FROM DEITIES TO PETS

🐾 Revered as sacred animals and deities in ancient Egypt as far back as 12,000 years ago, cats gradually began to ingratiate themselves into human settlements when agricultural societies started to form in the Middle East, around 9,000 years ago. Grain and produce storage attracted rodents, and the risk of entering human zones would have been worthwhile for wild cats to get access to this kind of critter smorgasbord. The smaller cats' average size and territory needs compared to those of their larger cousins in the wild meant that they were not considered competition for food or other resources. Farming communities would have seen the benefits of keeping these pest control officers close by, and cats could most likely sneak the occasional human food scraps from their new hosts, too.

DE DEIDADES A MASCOTAS

🐾 Venerados como animales sagrados y deidades en el antiguo Egipto hace ya 12.000 años, los gatos empezaron a integrarse gradualmente en los asentamientos humanos en los albores de las sociedades agrícolas del Medio Oriente hace unos 9000 años. El almacenamiento de granos y otros productos atraía a los roedores, y el posible acceso a un festín tan tentador hacía que el riesgo de incursionar en zonas habitadas por humanos valiera la pena para los gatos salvajes. Al tener un menor tamaño y necesitar menos espacio que sus primos más grandes en estado salvaje, a los gatos no se les consideraba competidores por alimentos ni otros recursos. Las comunidades agrícolas deben haber notado las ventajas de tener cerca a estos agentes de control de plagas, y lo más probable es que los gatos también hurtaran ocasionalmente restos de comida a sus nuevos anfitriones.

DE LA DIVINITÉ À L'ANIMAL DE COMPAGNIE

🐾 Vénérés comme des animaux sacrés et des divinités dans l'Égypte ancienne il y a 12 000 ans, les chats ont progressivement commencé à s'immiscer dans les établissements humains lorsque les sociétés agricoles ont commencé à se former au Moyen-Orient, il y a environ 9000 ans. L'entreposage des céréales et des produits agricoles attirait les rongeurs, et le risque de pénétrer dans les zones humaines valait la peine pour les chats sauvages, qui avaient ainsi accès à un vrai buffet. En raison de leur taille et de leurs besoins territoriaux moindres comparés à ceux de leurs cousins plus grands, les petits chats n'étaient pas considérés comme des concurrents pour la nourriture ou les autres ressources. Les communautés agricoles auraient vu l'intérêt de garder ces agents de lutte contre les animaux nuisibles à proximité, et les chats ont très probablement pu s'approprier les restes occasionnels de nourriture de leurs nouveaux hôtes.

THEY'RE SO CUTE (WHEN THEY SLEEP)

 Today, while some cats seem to uphold a perception of themselves as higher beings, we can't imagine our lives without them. They may sleep up to 18 hours a day, but they are our warm, cuddly, unpredictable, graceful, clumsy, irresistibly funny, and yes, loving companions. Researchers are tracking how cats communicate with each other and have found that cats have evolved a unique meowing and purring language to 'talk' to their humans compared to when they 'talk' to other cats. As anyone who has been pinned down by a purring house cat can confirm, the soothing sound and subtle vibrations can work wonders to calm our nervous system after a long day. Don't have a cat? Luckily, the internet was invented just for cat videos (wasn't it?), and recent research shows that watching cat videos online for just a few minutes a day can boost your energy and positivity, and reduce stress. No wonder they're so irresistible!

ILS SONT SI MIGNONS
(QUAND ILS DORMENT)

 De nos jours, bien que certains chats semblent se percevoir comme des êtres supérieurs, nous ne pouvons pas imaginer notre vie sans eux. Ils dorment peut-être jusqu'à 18 heures par jour, mais ils sont nos compagnons chaleureux, câlins, imprévisibles, gracieux, maladroits, irrésistiblement drôles et, oui, affectueux. Les chercheurs étudient la façon dont les chats communiquent entre eux et ont découvert qu'ils ont développé un langage unique de miaulements et de ronronnements pour « parler » à leurs humains, bien différent de celui qu'ils utilisent pour « parler » à d'autres chats. Quiconque s'est déjà fait cloquer sur place par un chat ronronnant peut le confirmer : le son apaisant et les vibrations subtiles peuvent faire des merveilles pour calmer notre système nerveux après une longue journée. Vous n'avez pas de chat ? Heureusement, Internet a été inventé pour les vidéos de chats (non ?), et des recherches récentes montrent que regarder des vidéos de chats en ligne quelques minutes par jour seulement peut stimuler votre énergie et votre positivité, ainsi que réduire votre stress. Pas étonnant qu'ils soient si irrésistibles !

SON TAN LINDOS (CUANDO DUERMEN)

 Hoy en día, si bien algunos gatos parecen mantener una percepción de sí mismos como seres superiores, no podemos imaginar nuestras vidas sin ellos. Puede que duerman hasta 18 horas al día, pero, como compañeros, son cálidos, mimosos, imprevisibles, graciosos, torpes, irresistiblemente divertidos y, sí, incluso cariñosos. La forma en la que los gatos se comunican entre sí es objeto de múltiples estudios serios y es un hecho comprobado que han desarrollado un singular lenguaje a base de maullidos y ronroneos para *hablar* con sus humanos distinto del que usan con otros de su especie. Como puede confirmar cualquiera que haya sido inmovilizado por un gato doméstico en un ataque de afecto, el relajante sonido y las sutiles vibraciones de sus ronroneos pueden hacer maravillas para calmar nuestro sistema nervioso después de un día cargado de tensiones. ¿No tienes un gato? Por suerte, Internet se inventó exclusivamente para los videos de gatos (¿quién lo diría?), e investigaciones recientes demuestran que ver felinos en línea solo unos minutos al día puede aumentar tu energía y optimismo, y reducir los niveles de estrés. ¡No es de extrañar que sean tan irresistibles!

MAJESTIC

 The black-and-white tuxedo cats are commonly found all over the world. They do not belong to a specific breed, they just happen to be bi-colored with a coat pattern that looks like they're wearing a tiny tuxedo and, might we add, a rather sophisticated-looking one. Like an elegant little butler, they will also, occasionally, proudly leave you little 'treats' of various categories when you least expect it. While a cat's coat color is no sure sign of its personality (typically, the breed is a more reliable indicator), tuxedo cats are often super friendly and social with their human family, curious, distinctly playful and outgoing.

Your new LEGO® cat is guaranteed to be housebroken and will sit anywhere it fits. If you can find something square for it to sit on, it will be very happy. Or you could keep the box and create a truly authentic display for it.

MAJESTUEUX

 Les chats tuxedo noir et blanc sont répandus dans le monde entier. Ils n'appartiennent pas à une race spécifique ; ils sont simplement bicolores et leur pelage donne l'impression qu'ils portent un minuscule tuxedo et, qui plus est, un tuxedo d'allure plutôt sophistiquée. À l'instar d'un élégant petit majordome, il vous apportera aussi, à l'occasion, de petites « gâteries » de diverses catégories lorsque vous vous y attendez le moins. Bien que la couleur du pelage d'un chat ne soit pas un signe certain de sa personnalité (la race est généralement un indicateur plus fiable), les chats tuxedo sont souvent très amicaux et sociables avec leur famille humaine, curieux, très enjoués et extravertis.

Votre nouveau chat LEGO® est propre et s'installera partout où il pourra s'installer. Si vous pouvez trouver quelque chose de carré sur lequel il peut s'asseoir, il sera très heureux. Ou vous pouvez garder la boîte et créer un présentoir vraiment authentique avec elle.

MAJESTUOSOS

 Los gatos blanco y negro son comunes en todo el mundo. El patrón bicolor de su pelaje, que hace parecer que llevan puesto un traje de gala en miniatura (e incluso algunos opinarían que les confiere un aire de sofisticación) no se debe a que pertenezcan a una raza en particular. Como pequeños y elegantes mayordomos, también te ofrecerán, de vez en cuando y con orgullo, algunas pequeñas *recompensas* de diversas categorías cuando menos te lo esperes. Aunque el color del pelaje de un gato no es una señal inequívoca de su personalidad (normalmente, la raza es un indicador más confiable), los gatos bicolores suelen ser notoriamente amistosos y sociables con su familia humana, bastante curiosos, juguetones y extrovertidos.

Puedes estar seguro de que tu nuevo gato LEGO® está domesticado y se sentará donde pueda hacerlo. Si le encuentras un refugio cuadrado, lo harás inmensamente feliz. Podrías incluso conservar la caja para exhibirlo con la máxima autenticidad.

FROM THE LEGO® DESIGN TEAM

🐾 "Damien did an amazing job capturing this classic cat pose, which could either be interpreted as 'I'm patiently waiting for my dinner to be served,' or it could be 'I'm silently judging you, human,' who knows? Damien's original model was initially based on a mix between a Siamese and a Birman cat and was later updated to a black-and-white version. We really fell for both versions but ultimately decided to continue with this color combination as it is instantly recognizable as a popular family pet.

"We developed the final model to be built in segments to make the building experience and assembly a fun and intuitive process. We created a variety of new elements like a 45-degree bow element to recreate an authentic cat shape. Depending on what mood your LEGO® cat is in, you can adjust its design and pose to create a new expression. The eyes are important graphic elements that let you choose your cat's eye color (yellow or blue) or one of each color to recreate the commonly seen heterochromia eyes. You can turn the eye elements to change your cat's expression from serene to surprised. The mouth can be built open or closed, you can adjust the ears, front paws and the articulation at the end of the tail, and you can turn the head from side to side which, incidentally, makes it sound like your cat is purring!"

Chris McVeigh, LEGO® Ideas Senior Designer, and Nathan Davis, Graphic Designer

UN MOT DE L'ÉQUIPE DE CONCEPTION LEGO®

🐾 « Damian a fait un travail remarquable en reproduisant cette pose de chat classique, qui peut être interprétée comme "j'attends patiemment que mon repas soit servi" ou "je te juge en silence, humain". Son modèle original, qui était initialement basé sur un mélange entre un siamois et un birman, a été actualisé en noir et blanc. Nous adorons les deux versions, mais nous avons finalement décidé de conserver cette combinaison de couleurs, car elle est immédiatement reconnaissable en tant qu'animal de compagnie populaire.

Nous avons développé le modèle final pour qu'il soit construit en segments afin que l'expérience de construction et d'assemblage soit un processus amusant et intuitif. Nous avons créé une variété de nouveaux éléments, tels qu'un arc à 45 degrés, pour recréer une forme de chat authentique. Selon l'humeur de votre chat LEGO®, vous pouvez ajuster son apparence et sa pose pour créer une nouvelle expression. Les yeux sont des éléments graphiques importants qui vous offrent le choix entre deux yeux jaunes ou bleus ou un œil jaune et un œil bleu pour recréer les yeux hétérochromes couramment observés. Vous pouvez tourner les éléments d'œil pour donner à votre chat un air serein ou surpris. La bouche peut être ouverte ou fermée ; les oreilles, les pattes avant et l'articulation au bout de la queue peuvent être orientées ; et la tête peut être tournée d'un côté à l'autre, ce qui, soit dit en passant, donne l'impression que votre chat ronronne ! »

Chris McVeigh, concepteur principal LEGO® Ideas, et Nathan Davis, graphiste

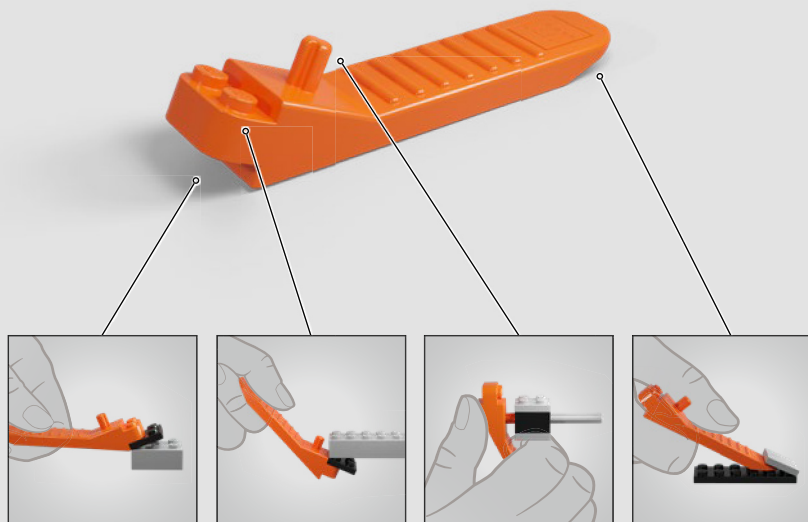

IMPRESIONES DEL EQUIPO DE DISEÑO DE LEGO®

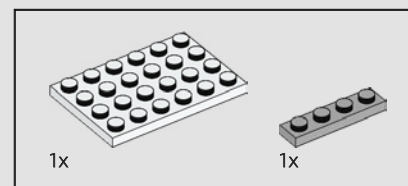

🐾 "Damian hizo un fantástico trabajo capturando esta pose tan clásica de los gatos, que podría interpretarse como 'Estoy esperando pacientemente a que me sirvan la cena' o 'Te estoy juzgando en silencio, humano'. Nadie lo sabe con certeza. El modelo original de Damian se basaba en una mezcla entre un gato siamés y un birmano, y más tarde se actualizó a una versión de un espécimen blanco y negro. Ambas versiones nos gustaron mucho, pero, al final, decidimos seguir con esta combinación de colores, ya que resulta reconocible al instante como una mascota familiar popular.

Desarrollamos el modelo final para que se construyera por segmentos a fin de hacer de la experiencia de construcción y ensamble un proceso divertido e intuitivo. Creamos una variedad de piezas nuevas, como un elemento con forma de arco de 45° que aporta autenticidad a la recreación del gato. Además, puedes ajustar el diseño y la pose de tu gato LEGO® para crear una nueva expresión. El set incluye elementos gráficos que te permiten elegir el color de los ojos de tu nueva mascota, ya sea en una combinación uniforme en amarillo o azul o una heterocromía (con un ojo de cada color), muy común en esta especie. Además, puedes cambiar la expresión de tu gato de serena a sorprendida con solo girar las piezas que recrean sus ojos. También tienes la posibilidad de elegir una boca abierta o cerrada y ajustar las orejas, las patas delanteras y la articulación del extremo de la cola, así como de girar su cabeza de lado a lado, lo que, por cierto, ¡hace que suene como si tu gato ronroneara!".

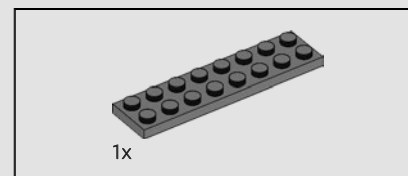

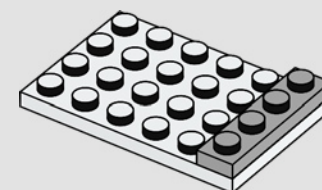

Chris McVeigh, diseñador sénior de LEGO® Ideas, y Nathan Davis, diseñador gráfico
