

DUALSHOCK 4 Wireless Controller Instruction Manual

ENGLISH

About the DUALSHOCK 4 Wireless Controller

Before using this product, carefully read this manual and any manuals for compatible hardware. Refer instructions for future reference.

Battery life and duration

- Do not handle damaged or leaking lithium-ion batteries.
- The battery has a limited life span. Battery duration will gradually decrease with repeated usage and age. Battery life also varies depending on the usage method, conditions of use and environmental factors.
- Charge in an environment where the temperature range is between 50°F (10°C) - 90°F (30°C). Charging may not be as effective when performed in other environments.
- When the wireless controller is not used for an extended period of time, it is recommended that you fully charge it at least once a year to help maintain battery functionality.

Use and handling precautions

- Avoid prolonged use of the product. Take breaks at about 30 minute intervals.
- Stop using this unit immediately if you begin to feel heat or if you experience discomfort or pain in your hands or arms during use. If the condition persists, consult a doctor.
- Prolonged hearing loss may occur if the headset or headphones are used at high volume. Set the volume to a safe level. Over time, increasingly loud audio may start to sound muffled but can actually be damaging your hearing. If you experience ringing or any discomfort in your ears or muffled sound, stop listening and have your hearing checked. The louder the volume, the sooner your hearing could be affected. To protect your hearing:
 - Limit the amount of time you use headset or headphones at high volume.
 - Periodically taking the headset or headset microphone off your head.
 - Lower the volume if you can't hear people speaking over it.
- Avoid touching into the light bar or the controller when it is hot. Stop using the controller immediately if you experience any discomfort or pain or any body parts.
- This product is intended for use with the hands only.
- The vibration feature of this controller may require motion. Do not use the vibration feature if you have any current or past injury to the lower arm, wrist, or muscles of your hand or arm.
- Do not shake software with motion the vibration feature by default. To disable the vibration, select **PS (Settings)** → **Devices** → **Controllers** from the function menu, and then remove the checkmark from **Vibration**.
- The controller has a limit to heat temperature. Full function is down output.

- Do not allow the product to come into contact with liquids.
- Do not put heavy objects on the product.
- Do not throw or drop the product or subject it to strong physical shock.
- When using the motion return function, be cautious of the following points. If the controller hits a person or object, this may cause accidental injury or damage.
 - Before using, check that there is plenty of space around you.
 - When using the controller, stop it from making sure it cannot slip out of your hand.
 - If using a controller that is connected to the PlayStation®4 system with a USB cable, make sure there is enough space for the cable so that the cable will not get in a person's way or slip off. Also, take care to avoid pulling the cable out of the PS4™ system while using the controller.

Product protection

- Follow the instructions below to help prevent the product external from deteriorating or becoming damaged.
 - Do not place any rubber or vinyl material on the product surface for an extended period of time.
 - Use a soft, dry cloth to clean the product. Do not use solvents to clean the product. Do not wipe with a chemically treated cleaning cloth.

Registering/connecting the controller

The first time you use the controller, or when you want to use the controller on another system, you must perform device registration (pairing). Turn on the system and connect the controller to the system with the USB cable to complete device registration.

Specifications

Input power rating	7.5 W (RMS max)
Battery type	Rechargeable lithium-ion battery
Capacity	1,000 mAh
Battery capacity	4,000 mAh
Operating temperature	0°F to 95°F (0°C to 35°C)

Design and specifications are subject to change without notice.
