

GAMING MOUSE (RZ01-0440)

MASTER GUIDE

WHAT'S INSIDE / WHAT'S NEEDED

WHAT'S INSIDE

- Gaming Mouse (RZ01-0440)

A. Left mouse button

B. Right mouse button

C. Razer™ HyperScroll Tilt Wheel

D. Left tilt-click

E. Right tilt-click

F. DPI stage up

G. DPI stage down

H. Ultraslick mouse feet

I. USB-C charging port

J. Razer™ Focus+ 20K DPI Optical Sensor

K. Profile indicator

L. Profile button

M. Slider switch

N. Wireless USB dongle

- Razer™ HyperSpeed Wireless (2.4 GHz) mode
- Power off mode
- Bluetooth mode

- O. 12-button side plate (recommended for MMOs)
- P. 6-button side plate (recommended for battle royales)
- Q. 2-button side plate (recommended for general use)

- Razer™ Speedflex charging cable

- USB-C to USB-A dongle adapter

- Important Product Information Guide

The DPI stages are as follows: 400, 800, 1600 (default), 3200 and 6400. The DPI stages can be customized using Razer Synapse.

WHAT'S NEEDED

PRODUCT REQUIREMENTS

- PC with a free USB port or Bluetooth 5.0 connectivity

RAZER SYNAPSE REQUIREMENTS

- Windows® 10 64-bit (or higher)
- Internet connection for software installation

LET'S GET YOU COVERED

You've got a great device in your hands, complete with a 2-year limited warranty coverage. Now maximize its potential and score exclusive Razer benefits by registering at razerid.razer.com

Got a question? Ask the Razer Support Team at support.razer.com

GETTING STARTED

CHANGING THE SIDE PLATE

Pull from the bottom of the side plate to remove and then replace it with the preferred side plate. It's recommended that you unplug the mouse first before changing side plates.

i To customize each side plate's button assignments, please install Razer Synapse. These side plates are designed for the **Gaming Mouse** only. Don't use side plates from the Razer Naga Trinity, and vice versa.

CHARGING YOUR MOUSE

Plug the charging cable from your computer's USB port to your Gaming Mouse. For best results, please fully charge the mouse before using it for the first time. A depleted battery will be fully charged in approximately 4 hours. This connection also acts as the wired mode for your Razer device.

- i** *The Gaming Mouse requires a USB connection that can supply sufficient power to charge the device. The charging process may be affected when connecting to a non-powered USB hub or non-powered USB mostly found on keyboards and peripherals. It's recommended to always connect the Gaming Mouse directly to the USB port of your computer.*

LOW POWER INDICATOR

The scroll wheel will blink red twice in repeated intervals to indicate that its battery's power is less than 5%. This lighting sequence will repeat until the battery is drained or the mouse is connected to the PC via the charging cable.

CONNECTING YOUR MOUSE

Via Razer™ HyperSpeed Wireless (2.4 GHz) Mode

1. Remove the attached side plate from the mouse to remove the wireless USB dongle.

2. Reattach the side plate and insert the wireless USB dongle into the USB port of your PC.

3. Push the slider switch to Razer™ HyperSpeed Wireless (2.4 GHz) mode.

Your Gaming Mouse is now ready for use in wireless mode.

Via Bluetooth Mode

1. Push the slider switch to Bluetooth mode (*).

2. Press and hold the scroll wheel, DPI stage up and DPI stage down buttons simultaneously for three seconds to activate pairing mode. The Razer logo will blink twice in repeated intervals to show that the device is in pairing mode.

3. Activate Bluetooth on your device, search for new Bluetooth devices, and select Gaming Mouse from the list of devices found.
4. Wait until the mouse pairs with your device. When paired, the Razer logo will briefly turn static blue before displaying its current lighting effect.

i *Once paired, your Gaming Mouse will automatically reconnect to your device whenever in Bluetooth mode and within range. Keep the pairing devices within close proximity of each other for faster and more stable connection.*

Congratulations, your Gaming Mouse is now ready to use in Bluetooth mode.

USING THE WIRELESS USB-C TO USB-A DONGLE ADAPTER

Use the USB-C to USB-A dongle adapter to easily access and extend the reach of your wireless USB dongle.

PERSONALIZING YOUR MOUSE

Use the Razer Synapse app to customize your mouse's lighting, configure its buttons, and even create various profiles suited for different playstyles. Your Gaming Mouse can store up to 5 profiles from the Razer Synapse app, allowing you to use these profiles even on systems without the app installed. Pressing the profile button will cycle through the different profiles, with the profile indicator's color showing which profile is currently selected.

Profile	Designated color
Active Profile	White
Profile 1	Red
Profile 2	Green
Profile 3	Blue
Profile 4	Cyan

Profile indicator
Profile button

! Install Razer Synapse when prompted or download the installer from [razer.com/synapse](https://www.razer.com/synapse)

SAFETY AND MAINTENANCE

SAFETY GUIDELINES

In order to achieve maximum safety while using your Gaming Mouse we suggest that you adopt the following guidelines:

Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to support.razer.com for support.

Do not take apart the device and do not attempt to operate it under abnormal current loads. Doing so will void your warranty.

Keep the device away from liquid, humidity or moisture. Operate the device only within the specific temperature range of 0°C (32°F) to 40°C (104°F). Should the temperature exceed this range, unplug and/or switch off the device in order to let the temperature stabilize to an optimal level.

COMFORT

Research has shown that long periods of repetitive motion, improper positioning of your computer peripherals, incorrect body position, and poor habits may be associated with physical discomfort and injury to nerves, tendons, and muscles. Below are some guidelines to avoid injury and ensure optimum comfort while using your Gaming Mouse.

- Position your keyboard and monitor directly in front of you with your mouse next to it. Place your elbows next to your side, not too far away and your keyboard within easy reach.
- Adjust the height of your chair and table so that the keyboard and mouse are at or below elbow-height.
- Keep your feet well supported, posture straight and your shoulders relaxed.
- During gameplay, relax your wrist and keep it straight. If you do the same tasks with your hands repeatedly, try not to bend, extend or twist your hands for long periods.
- Do not rest your wrists on hard surfaces for long periods. Use a wrist rest to support your wrist while gaming.
- Do not sit in the same position all day. Get up, step away from your desk and do exercises to stretch your arms, shoulders, neck and legs.

If you should experience any physical discomfort while using your mouse, such as pain, numbness, or tingling in your hands, wrists, elbows, shoulders, neck or back, please consult a qualified medical doctor immediately.

MAINTENANCE AND USE

The Gaming Mouse requires minimum maintenance to keep it in optimum condition. Once a month we recommend you unplug the device from the computer and clean it using a soft cloth or cotton swab to prevent dirt buildup. Do not use soap or harsh cleaning agents.

To get the ultimate experience in movement and control, we highly recommend a premium mouse mat from Razer. Some surfaces will cause undue wear on the feet requiring constant care and eventual replacement.

Do note that the sensor of the Gaming Mouse is 'tuned' or optimized especially for the Razer mouse mats. This means that the sensor has been tested extensively to confirm that the Gaming Mouse reads and tracks best on Razer mouse mats.

BATTERY WARNING

The Gaming Mouse contains a Li-ion rechargeable battery. In general, the life expectancy of such batteries is dependent upon usage. If you suspect that the Li-ion rechargeable battery inside the Gaming Mouse may be drained (has a low charge), try charging it.

Caution: Do not open, mutilate, or expose to conducting materials (metal), moisture, liquid, fire, or heat. Doing so may cause batteries to leak or explode, resulting in personal injury. Battery life varies with usage.

LIMITED PRODUCT WARRANTY

For the latest and current terms of the Limited Product Warranty, please visit [razer.com/warranty](https://www.razer.com/warranty).

LIMITATION OF LIABILITY

Razer shall in no event be liable for any lost profits, loss of information or data, special, incidental, indirect, punitive or consequential or incidental damages, arising in any way out of distribution of, sale of, resale of, use of, or inability to use the Product. In no event shall Razer’s liability exceed the retail purchase price of the Product.

GENERAL

These terms shall be governed by and construed under the laws of the jurisdiction in which the Product was purchased. If any term herein is held to be invalid or unenforceable, then such term (in so far as it is invalid or unenforceable) shall be given no effect and deemed to be excluded without invalidating any of the remaining terms. Razer reserves the right to amend any term at any time without notice.

STATEMENT OF COMPLIANCE WITH EU DIRECTIVE

ENGLISH

STATEMENT OF COMPLIANCE WITH EU DIRECTIVE Hereby, Razer (Europe) GmbH, declares that Gaming mouse: RZ01-0440 and USB Dongle: DGRFG7 is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU & 2015/863/EU.

The full text of the EU declaration of conformity is available at the following internet address: [razer.com/legal/compliance](https://www.razer.com/legal/compliance)

Gaming Mouse:

Radio Frequency: 2.4Ghz SRD

Operating Frequency: 2402-2480Mhz

Max Output power: $\leq 10\text{dBm}$

SW version: 1.0

Radio Frequency: Bluetooth LE

Operating Frequency: 2402-2480Mhz

Max Output power: $\leq 10\text{dBm}$

SW version: 1.0

EU PRODUCT AND BATTERY DISPOSAL INFORMATION

BATTERY WARNING

The Gaming mouse contains a Li-ion rechargeable battery. In general, the life expectancy of such batteries is dependent upon usage. If you suspect that the Li-ion rechargeable battery inside the Gaming Mouse may be drained (has a low charge), try charging it. Caution: Do not open, mutilate, or expose to conducting materials (metal), moisture, liquid, fire, or heat. Doing

so may cause batteries to leak or explode, resulting in personal injury. Do not leave the rechargeable battery discharged or unused for extended periods. Battery life varies with usage.

BATTERY INFO

Risk of fire or explosion or defeat the safeguard of equipment if the battery is replaced by an incorrect type. Replace only with the same or equivalent type. Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion. High or low extreme temperatures or low air pressure at high altitude that the battery can be subjected to during use, storage or transportation. Leaving the battery in an extremely high temperature and/or low air pressure surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.

FCC CAUTION STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure

compliance. This transmitter must not co-located or operating in conjunction with any other antenna or transmitter .

The SAR limit of USA (FCC) is 1.6W/kg averaged over one gram of tissue. This device has also been tested against this SAR limit.

Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment

generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTICE FOR CANADA

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada. Caution! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CANADIAN CLASS B STATEMENT:

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with a minimum distance of 0mm between the radiator and your body.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage;
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement. Cet émetteur ne doit pas être Co-place ou ne fonctionnant en même temps qu'aucune autre antenne ou émetteur. Cet équipement devrait être installé et actionné avec une distance minimum de 0mm entre le radiateur et votre corps.

Canada SAR

The SAR limit of Canada (ISED) is 1.6 watt/kg (W/kg) averaged over one gram of tissue. This device has also been tested against this SAR limit.

La limite SAR du Canada (ISED) est de 1,6 watt/kg (W/kg) en moyenne sur un gramme de tissu. Cet appareil a également été testé par rapport à cette limite SAR.
