

The image shows a spacious, modern interior with a curved concrete staircase on the left, a dining table with two chairs in the center, and large windows on the right. The architecture features clean lines and a mix of materials like concrete, wood, and brick.

# GIRA

Smart Home.  
Smart Building.  
Smart Life.

Design in a  
world between  
On and Off.

Gira / Inspiration

We are Gira.  
We are the ones with the switches.  
But we're so much more.

Future-oriented.  
Certified.  
Responsible.

We're the guardians, innovators,  
Smart Home pioneers, developers,  
system thinkers, KNX partners,  
shapers of the future, patent masters,  
award winners and designers.

But above all, we are the ones  
who listen.  
To you.

Subtle, but smart.  
With distinct focus on quality,  
materials and functions.  
And the driving force of innovation.

In our hearts, we are engineers  
on a mission to inspire.  
With new technologies,  
smart applications and  
impressive attention to detail.

We will always work our hardest  
to find the best solution for you.  
With service, design and performance  
made in Germany.

Because that is what we stand for.  
And have been standing for since 1905.

# Does long-term climate protection not need short-term goals?

We are doing our bit to achieve the 1.5°C target, continuously measuring and reducing our CO<sub>2</sub> emissions. Our climate journey is an integral part of our corporate strategy.

Sustainable design lines.

By using natural materials, we are reducing the CO<sub>2</sub> emissions generated by the manufacture of our Gira Esprit Linoleum-Plywood by around 75%.<sup>1</sup>

Find out more.

<sup>1</sup> Determined on the basis of an ecological assessment pursuant to ISO 14040 and EN15804, compared to a Gira E2 1-gang pure white glossy reference frame.

<sup>2</sup> Taking 2021 as the reference year.

Durable and environment- and climate-friendly.

Gira quality standards go above and beyond those established by certification standards. Our mechanical products are designed for a useful life of at least 20 years. The longer they are in use, the smaller their carbon footprint.

### Renewable energies

We have long been investing in the energy efficiency of our sites. We are now taking this a step further with the Gira Solar Park that is currently under construction. Once completed, it will generate 8.5 million kWh of electricity per year, enabling us to almost halve our direct electricity-related CO<sub>2</sub> emissions<sup>2</sup>.

# You are the focus of all of our efforts.

## Inscription service

The Gira inscription service provides neat, uniform inscriptions for your doorbell inscription labels or pushbutton sensors, for example. Laser inscriptions are supplied via your electrical engineering firm. Simply order online at:

[marking.gira.com](http://marking.gira.com)

## Gira online magazine

The interactive design magazine from Gira provides ideas and inspiration for current topics in home design, smart technology, architecture, lighting and lifestyle. Find inspiration at:

[gira.com/g-pulse-magazine](http://gira.com/g-pulse-magazine)

## Gira showrooms

Where our brand comes to life: You can view, touch and try out our products in a large number of Gira showrooms:

[partner.gira.com/showrooms](http://partner.gira.com/showrooms)

## References

Discover our architecture references, which present a selection of futuristic, innovative and smart projects. Take inspiration from the way Gira products complete the interior.

[partner.gira.com/references](http://partner.gira.com/references)

This way for  
inspiration.
