

# Trapezoid D Fountain

Product Description: Trapezoid D fountain shown in Corten steel. Also available in Stainless steel. Water sculpture includes anchor plate.

M Series Fountains are deconstructed trapezoids that can be configured in any combination or variety of sizes to create a unique water element for any environment.

Each M series Trapezoid is striking as a stand alone water sculpture for residential spaces. They can be clustered with other M series fountains or surrounding the original Trapezoid fountains, to create an interactive water sculpture installation perfect for public spaces.

The Trapezoid D Fountain pairs well with the Trapezoid A fountain in the M Series to create a smaller scale installation.

# Materials

Corten steel being a permeable material can be coated with a commonly used clear sealer to improve water resistance, extending the life of the sculpture.

## Pond Maintenance

Avoid using salt based water treatment chemicals as it can accelerate rusting. We recommend EcoSolv liquid pond cleaner.

## Specifications and Installation information

### Pump Box

The MODFOUNTAIN Pump Box is a galvanized or stainless steel platform.

Designed to conceal the submersible pump and can be used as a stand alone platform or bolted into a concrete pool.

Designed to be used with The Wave, Y series and X series Modfountains.
