

Ideal for:

- Soilings caused by pets (urine, vomit & faeces) and outdoor dirt

Not suitable for:

- Velvet
- Silk
- Water-sensitive fabrics

Useful tips

- Before using the product, perform a check for discolouration and compatibility on a concealed part of the fabric.
- Also suitable for wool.

How it works

1

Unscrew the brush head, pierce the seal in the size of a pinhead (about 2 mm) and screw the brush head on again (do not screw it too far).

2

Remove loose surface dirt. Hold the bottle head down and squeeze lightly to wet the applicator sponge. Apply the product (do not soak the carpet completely), work it lightly into the fabric and let it work in for 3 minutes

3

Dab off the product and residual stain completely with a damp, light-coloured cloth

4

Rinse the applicator after every use
