

INSTRUCTION MANUAL

Light Kit for Disney Castle 71040

Thank You

For Purchasing this product. To give you the perfect hidden-line effect, we use severely thin aviation-grade wire with high tension and pressure tolerance. However, due to its thin nature, be careful not to cut through it as it might be susceptible to shearing during installation. Always be careful not to press brick pieces down on the wire.

Let's Get Started

if you face any challenges, please feel free to reach out via **support@gameofbricks.eu** Please note that we offer 2 years of free light kit maintenance.

Sound Guide

SOUND GUIDE

(only if sound not works or crackly)

#1 fix

If the sound is crackling and sounding properly, please use **new batteries** in a power bank. It will solve your problem.

#2 fix

Sound directly depends on a network.

01

Change power source (the main power source can be power bank)

02

Switch the volume knob in the (network) to your own (power) (the volume knob in power can't be in low volume) (the volume knob in power can't be in low volume) (the volume knob in power can't be in low volume)

03

Disconnect every light from the network board (the network board is in the side, please find it by clicking the plug)

When you connect it again, it will work

#3 fix

Please turn the device upside down to check the status of the volume knob. If not, it will not play the sound.

<https://www.youtube.com/watch?v=...>

#4 fix

Please check if sound files are in the sound module (connection can be broken by loose connection, please check it by clicking the plug)

You can do it by connecting the sound module using your USB cable (the sound module is in the side, please find it by clicking the plug)

<https://www.youtube.com/watch?v=...>

They might questions are

01

Can you change the power source and the sound can be high/low volume?

02

Did you connect the power source (the power source is in the side, please find it by clicking the plug)

<https://www.youtube.com/watch?v=...>

03

Did you connect the power source and the sound can be high/low volume?

<https://www.youtube.com/watch?v=...>

04

Did it work sound files in your power bank?
