

IONIQ 5

We have a passion for progress.

The “can-do” spirit is at the heart of Hyundai’s heritage. It’s the attitude of progressing, no matter what. From humble beginnings, this vision has driven us to seek new challenges, encapsulated since our founding in the name ‘Hyundai’ – meaning ‘modern times’.

It’s the persistent curiosity for what lies ahead. Of always chasing the next. What was once a man’s desire for better is today the ethos of an entire company. As our founder said: “How does one know it’s impossible if one hasn’t tried it?”

Progress doesn’t happen by chance. We’re always pushing the borders of the possible, building tomorrow’s technology today, and powering the future with an ever-evolving range of zero-emission engines, seamless in-car connectivity and more.

We’ve come a long way. And we won’t stop here. Next awaits.

IONIQ

With its electrifying design and advanced innovations, IONIQ 5 is changing the way people look at electric cars.

This is the perfect embodiment of innovative concept car design with amazing performance, environmentally-friendly materials and an astonishing array of smart technology.

Bold. Unique. Pure.

The image shown in brochure may vary from actual product

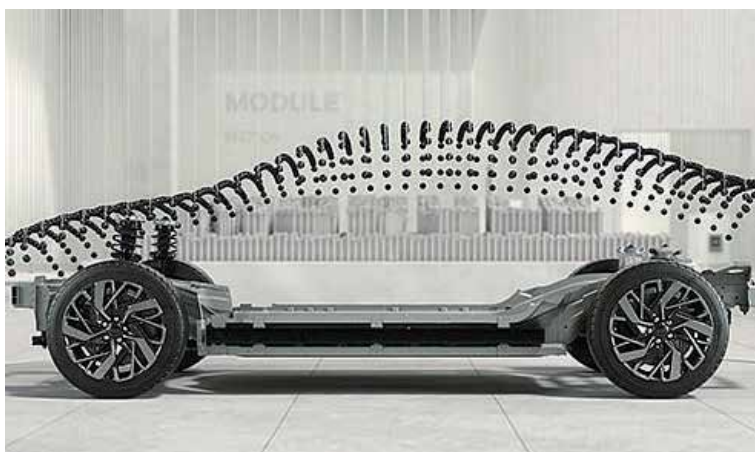

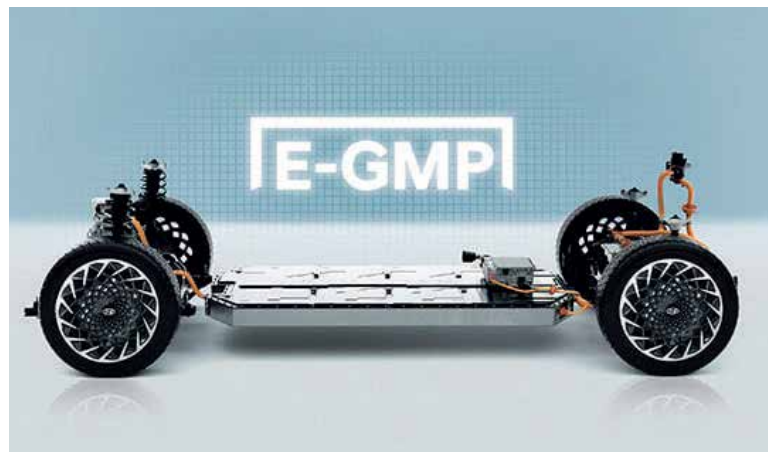

Smooth and seamless with a strong focus on minimalism, Hyundai's first-ever clamshell hood spans the entire width of the car – minimising panel gaps for a clean, high-tech look.

Exploring a new design freedom.

IONIQ 5's captivating design is a refreshing take on electric vehicles, stripping away all complexity.

Designed for safety

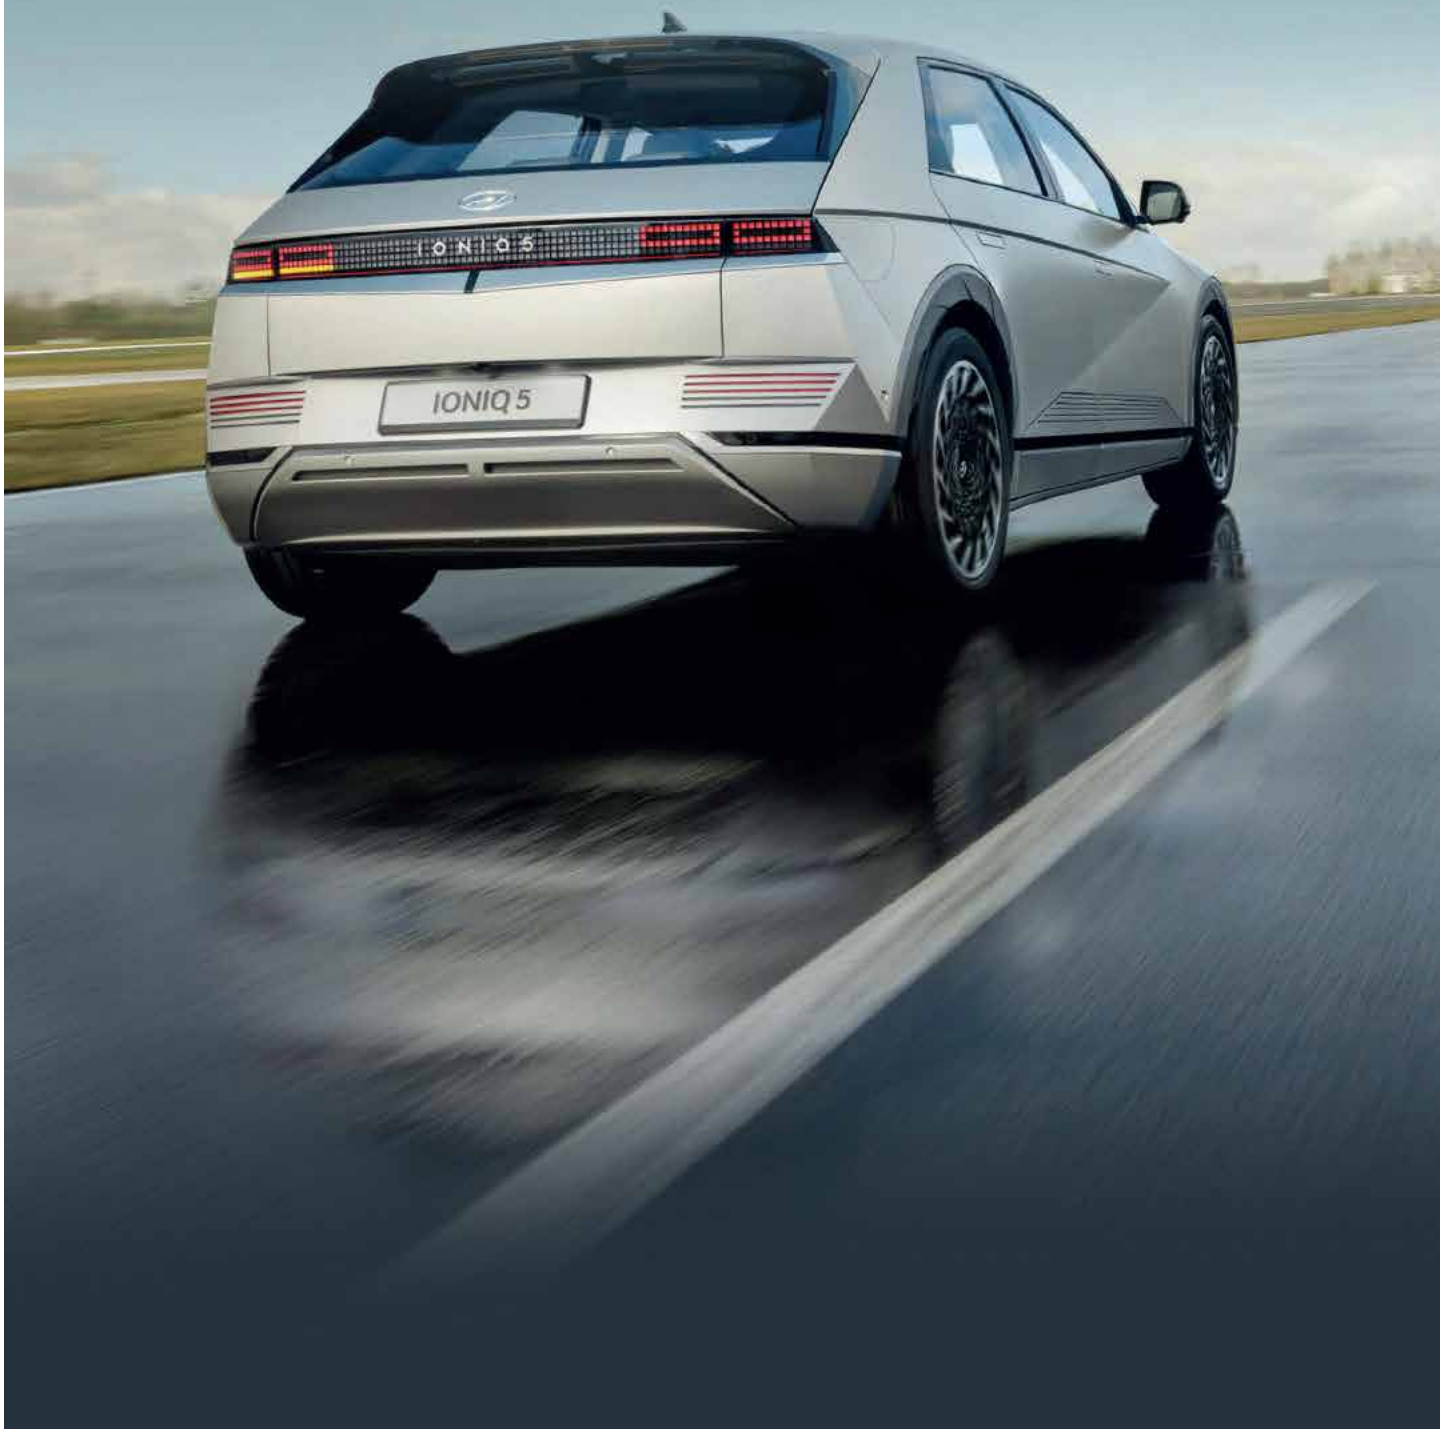

E-GMP embraces unique EV design characteristics such as short overhangs and a long wheelbase with collision safety, maximized passenger space, and battery safety.

A modular concept

E-GMP accommodates a wide range of vehicle types, driving distances, and life styles through a standardized battery system equipped with technology optimized for EVs.

Next level electric
performance.

Apple CarPlay™ and Android Auto™ smartphone mirroring.

Wireless phone charging.

Fully digital 12.25" cluster.

375^{Kms}

IONIQ 5 delivers an impressive range of up to 375 Kms on a single charge.

5.2^{seconds}

IONIQ 5 delivers a responsive acceleration from 0 to 100 kmh in 5.2 seconds .

A man in a red sweater is driving the IONIQ 5 on a road. The car's interior and the road ahead are visible. The speedometer on the dashboard shows 89 km/h.

Sustainability

The use of environmentally-conscious materials and techniques throughout the interior enhances sustainability and maximizes the IONIQ brand's unique image.

Eco-friendly fabric

The magnetic fabric pads, headliner, floor carpet, and floor mats are made with eco-friendly textiles manufactured with sugarcane extract. The seats and door trim are covered with material woven from fibers made out of recyclable transparent PET bottles.

Eco-processed leather

The leather used for the seats was processed in an eco-friendly manner through the use of flaxseed oil extract.

Bio paint

The dashboard, switches, steering wheel and door panels are coated in a special Bio paint made with rapeseed flowers and corn extracts.

Charge from where you want

The car can support both 400 V and 800 V charging infrastructures. The multi-charging system is the world's first patented technology. Using a converter that plugs into the bidirectional exterior charging port, you can power devices up to 3.6 kW even when the vehicle is turned off.

Charge from inside

IONIQ 5 can make your life easier. It can charge any electric devices such as electric bicycle, scooter, camping equipment, or even a stranded EV. The charging feature is enabled by an adaptor and it connects to the charging outlet. There is a second outlet underneath the back row seat for charging laptops, phones, and other devices.

Welcome to a whole new in-car experience.

Featured for the first time with IONIQ 5, and the basis for all future Hyundai EV models, our dedicated new EV platform gives us the opportunity to re-imagine our interiors and offer a new level of roominess, versatility, convenience and tranquility.

A flat floor with front seats that can be fully reclined and a flexible centre console that can be slid effortlessly back between and behind the front seats, all make for an extraordinary experience and maximise the sheer sense of openness.

Designed to handle everything you and your busy life can throw at it, the versatile IONIQ 5 offers plenty of room for passengers and luggage, providing you with a generous boot capacity of 527 litres. With the 60:40 foldable seats folded down and 1,587 litres of space available, IONIQ 5 can accommodate everything you need for a weekend escape or bring back that large piece of upcycled furniture from the restorer. What's more, environmentally-friendly materials like eco-processed leather and recycled yarn are used throughout, adding to the sustainability credentials of our manufacturing processes.

Solar roof

The Solar Roof, which can be selected from Hyundai eco-friendly models, uses sunlight to help partially charge the vehicle's battery. It prevents 12V batteries from dying, and also charges the high-voltage battery to extend the driving range.

Vision roof

Eliminating the center member creates a greater sense of openness inside the cabin. Power roller blinds further enhance the vision roof's appeal and versatility.

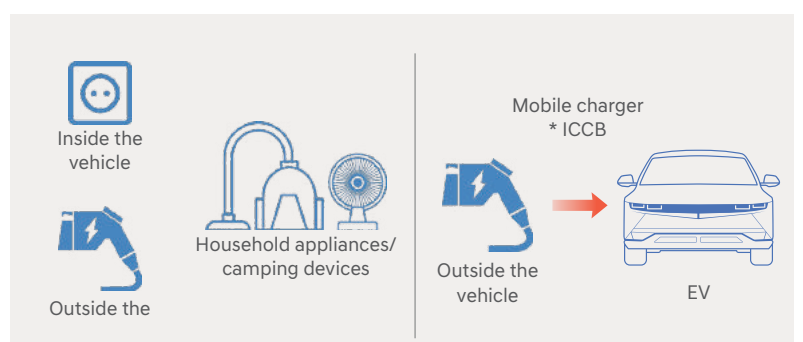

Assist Handle applied differently by region

V2L (Vehicle-to-Load)

Allows bi-directional charging without requiring additional devices via the Integrated Charging Control Unit (ICCU) and the Vehicle Charging Management System (VCMS), enabling the use of general household appliances (110V/220V) outdoors.

Outdoor V2L gender connector	Indoor outlet
 Charging outlet connector Outlet location	

- Provides general electric power (110V/220V) inside/outside the vehicle using two-directional OBC
- Supplied power: 3.6kW
- Outdoor V2L: Can be used after securing V2L connector in the charging outlet
- Indoor V2L: Can be used when ignition turned On (EV Ready) / utility mode

Ambient mood light

The 64-color user-selectable mood light provides the driver with improved control over the cabin atmosphere.

USB chargers and power outlets

Front : 2 USB chargers, 1 USB port for data support, 1 power outlet.
Rear : 2 USB chargers, 110V or 220V inverter (optional)
Luggage : 1 power outlet (optional)

Rain-sensing wipers

The operation of the rain-sensing wipers is now interlinked with the vehicle speed for extra safety and convenience.

Blind-Spot view monitor (BVM)

Blind-Spot View Monitor displays video of the blind-spot view for a safe lane change. When operating the turn signal switch, BVM displays video of the blind-spot view for the direction indicated.

Wireless phone charging

The high speed wireless charger incorporates a cooling function that prevents the smartphone from overheating for added safety and convenience.

Heated 2nd row seat

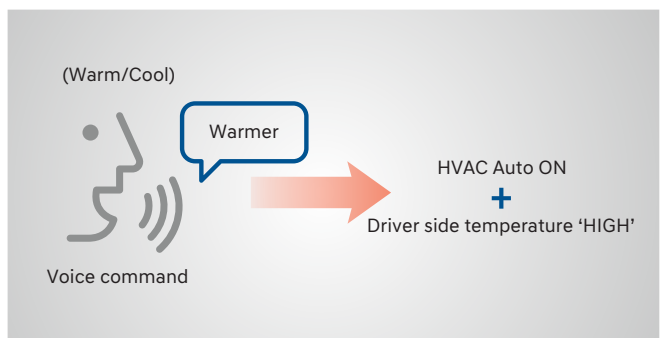

Seat heaters add comfort and a luxurious touch that second row passengers will appreciate.

Power tailgate

One-touch automatic closing and opening enhances convenience and the user experience.

Voice recognition vehicle control

Vehicle functions can be controlled with voice commands. Integrated vehicle control and activation is possible with a single voice command.

Active air intakes

The active air flap at the bottom enhances its exterior appearance as well as improving energy efficiency when closed, while cooling the vehicle parts when open.

Clamshell hood

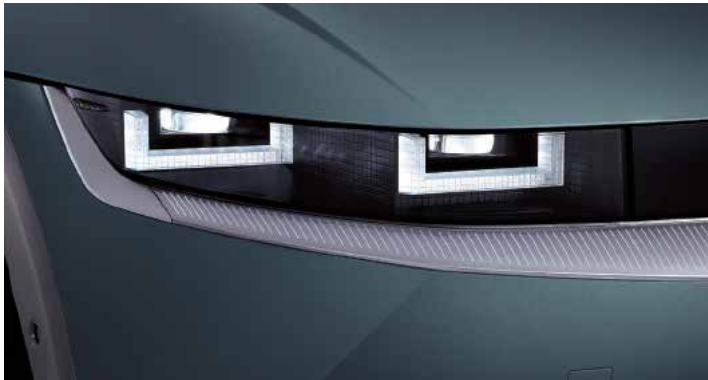

Hyundai's first-ever clamshell hood features a smooth and seamless design that pushes minimalism to the extreme.

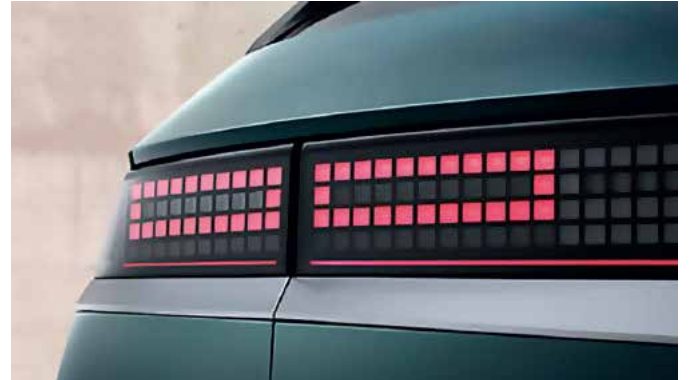

Front bumper

Planar symmetry and diagonal creases provide a high-tech interpretation of "Sensuous Sportiness" for maximum energetic effect and sense of abundant volume.

Parametric pixel head lamp

Pixel tail light

These unique lights feature a unique pixel signature that reflect the highly original creativity of its designers.

Front design features

Top design

With the Pony heritage inspiring its design identity, IONIQ's upper body blends harmoniously with the kinetic cube headlights to create a unique, forward-looking style.

Bottom design

'Sensuous sportiness' gets a major update in the front bumper design which features strong diagonal character lines and planar symmetry that maximize sporty dynamism and volume.

Specifications

Type		IONIQ 5
		58.9 kWh
Drive Train		Permanent Magnet Synchronous Motor (PMSM)
Max. Power (kW/ rpm)		125 kW
Max. Torque (Nm / rpm)		350 Nm
Brakes	Front	Ventilated Disc
	Rear	Solid discs
Suspension	Front	Macpherson strut
	Rear	Multi-link (5-link)
Tyre		19 inch

Dimensions	
Head room (mm) Front (w / Sunroof) / Rear	1010.92 (993.14) / 982.98 (952.5)
Leg room (mm) Front / Rear	1059.18 / 1000.76
Shoulder room (mm) Front / Rear	1465.58 / 1465.58
