# USING THE UNIT SAFELY

## INSTRUCTIONS FOR THE PREVENTION OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS

### About ⚠️WARNING and ⚠️CAUTION Notices

 <b>WARNING</b>	Used for instructions intended to alert the user to the risk of death or severe injury should the unit be used Improperly.
--	--

### About the Symbol

 <b>CAUTION</b>	Used for instructions intended to alert the user to the risk of injury or material damage should the unit be used improperly. * Material damage refers to damage or other adverse effects caused with respect to the home and all its furnishings, as well to domestic animals or pets.
--	--

## ALWAYS OBSERVE THE FOLLOWING

### ⚠️ WARNING

- Before using this unit, make sure to read the instructions below and the Owner's Manual.
- Do not open ( or modify in any way ) the unit or its AC adaptor.
- Do not attempt to repair the unit, or replace parts within it ( except when this manual provides specific instructions directing you to do so ). Refer all servicing to your retailer, the nearest NUX Service Center.
- Never use or store the unit in places that are:
  - Subject to temperature extremes ( e.g., direct sunlight in an enclosed vehicle, near a heating duct, on top of heat-generating equipment ).
  - Damp (e.g., baths, washrooms, on wet floors ).
  - Humid.
  - Exposed to rain.
  - Dusty.
  - Subject to high levels of vibration.
- This unit may be installed on stand using a Clamp.
- When installing the unit on a stand with a clamp, the stand must not be placed in an unstable location or on an incline, but in a level and stable position. Even if a stand is not used, make sure that the unit is placed in a stable location.

### ⚠️ WARNING

- Be sure to use only the AC adaptor supplied with the unit. Also, make sure the line voltage at the installation matches the input voltage specified on the AC adaptor's body. Other AC adaptors may use a different polarity, or be designed for a different voltage, so their use could result in damage, malfunction, or electric shock.
- Do not excessively twist or bend the power cord, nor place heavy objects on it. Doing so can damage the cord, producing severed elements and short circuits. Damaged cords are fire and shock Hazards!
- This unit, either alone or in combination with an amplifier and headphones or speakers, may be capable of producing sound levels that could cause permanent hearing loss. Do not operate for a long period of time at a high volume level, or at a level that is uncomfortable. If you experience any hearing loss or ringing in the ears, you should immediately stop using the unit, and consult an Audiologist.
- Do not allow any objects ( e.g., flammable material, coins, pins ); or liquids of any kind ( water, soft drinks, etc.) to penetrate the unit.

### ⚠️ WARNING

- Immediately turn the power off, remove the AC adaptor from the outlet, and request servicing by your retailer, the nearest NUX Service Center.
  - The AC adaptor or the power-supply cord has been damaged.
  - If smoke or an unusual odor occurs.
  - Objects have fallen into, or liquid has been spilled onto the unit.
  - The unit has been exposed to rain ( or otherwise has become wet ).
  - The unit does not appear to operate normally or exhibits a marked change in performance.

- In households with small children, an adult should provide supervision until the child is capable of following all the rules essential for the safe operation of the unit.

- Protect the unit from strong impact. (Do not drop it!)

- Do not force the unit's power-supply cord to share an outlet with an unreasonable number of other devices. Be especially careful when using extension cords-the total power used by all devices you have connected to the extension cord's outlet must never exceed the power rating (watts/amperes) for the extension cord. Excessive loads can cause the insulation on the cord to heat up and eventually melt through.

- Before using the unit in a foreign country, consult with your retailer, the nearest NUX Service Center.

### ⚠️ CAUTION

- The unit and the AC adaptor should be located so their location or position does not interfere with their proper ventilation.

- Always grasp only the output plug or the body of the AC adaptor when plugging into, or unplugging from, this unit or an outlet.

- Any accumulation of dust between the AC adaptor and the power outlet can result in poor insulation and lead to fire. Periodically wipe away such dust with a dry cloth. Also, disconnect the power plug from the power outlet whenever the unit is to remain unused for an extended period of time.

- Try to prevent cords and cables from becoming entangled. Also, all cords and cables should be placed so they are out of the reach of children.

- Never climb on top of, nor place heavy objects on the unit.

- Never handle the AC adaptor body, or its output plugs, with wet hands when plugging into, or unplugging from, an outlet or this unit.

- If you need to move the instrument, take note of the precautions listed below. Make sure to have a firm grip, to protect yourself from injury and the instrument from damage.
  - Check to make sure that the clamp that fixes the unit to the stand has not become loose. Fasten them again securely whenever you notice any loosening.
  - Disconnect the power cord.
  - Disconnect all cords coming from external devices.

- Before cleaning the unit, turn off the power and unplug the AC adaptor from the outlet.

- Whenever you suspect the possibility of lightning in your area, disconnect the AC adaptor from the outlet.

- Should you remove security screws, make sure to put them in a safe place out of children's reach, so there is no chance of them being swallowed accidentally.

# Ready to play

## Turn on/off the power

### \*Turn on the power

1. Turn down the master volume.
2. Turn down the speaker's volume.
3. Turn on the power.

Power on display

\*When you turning on the power, you may hear a faint sound, this in normal.

### \*Turn off the power

1. Turn down the speaker's volume.
2. Turn off the module.

# Ready to play

## How you can play on DM-8

### \* Snare

Head shot

Cross stick

Rim shot

### \* Tom

Head shot

Rim click

### \* Kick

Hit the drum head

### \* Crash

Bow shot

Edge shot

### \* Ride

Bow shot

# Ready to play

Edge shot

Bell shot

### Choking a cymbal

Choking the cymbal's edge with a hand immediately after hitting the cymbal will mute or choke the sound. Just like with a real cymbal, the choke function only works when you grasp in the area.

### \* Hi-hat

#### Open\Close

The cymbal tone will change between open and closed, depending on the force control of the cymbal pedal and cymbal blade.

Edge shot

### Choking a cymbal

Choking the cymbal's edge with a hand immediately after hitting the cymbal will mute or choke the sound. Just like with a real cymbal, the choke function only works when you grasp in the area.

### \* Hi-hat control pedal

#### Open Hi-hat

Strike the Hi-hat without pressing the pedal.

#### Closed Hi-hat

Strike the Hi-hat with the pedal pressed.

# Drum kit operation

## Drum kit switch

\*Power on and enter the drum kit mode

1.Use the selector to select the drum kit style, press the selector to confirm the style to indicator light flashing, and turn the selector again to select the kit.

2.Turn the selector to enter the drum kit mode in any mode.

## Drum kit sound settings

1.Use the drum kit selector to select the drum kit you want to edit.  
2.Use any buttons as below pic to enter the edit mode.

3.Hit the pad to select the pad (or you can just press KICK/SNARE, TOM/CYMBAL) to select.

## Drum pad tone settings

1.In the sound modify mode, select the pad you want to edit.

2.Use the buttons at the bottom of the display to select the parameters you want to adjust.  
3.Use the INSTRUMENT knob to adjust the parameters.  
4.You can preview the tone via hit the PREVIEW button on the module(with power sensing).

Parameter comparison table		
Parameter	Range	Description
INSTRU		Pad tone selection
PITCH	-32~+32	Tone pitch adjustment
LEVEL	0~127	Pad volume adjustment
SPLIT		After clicking the SPLIT button, the rim/head sound of the pad can be assigned separately Snare: head, rim Tom: head, rim Hi-hat: Bow, edge Crash: Bow, edge Ride: Bow, edge, bell

## Group fader

DM-8 adds the function of real-time adjustment of output level. You can adjust the output for each instrument in real-time through the faders on the panel of the module, so as to achieve the most suitable volume balance for you.

# Drum kit operation

## Song function operation

\* Without USB flash drive

1.Under the main interface, turn the SONG LIST knob on the panel to enter the SONG interface.

2.Under the SONG interface, press the play button at the bottom of the screen or PLAY/STOP on the panel to play or pause the music.

3.Press the DRUM OFF button on the panel to mute or activate the drum sound in the song (this function is only valid for the built-in song) .

\* With USB flash drive

1.After the USB flash drive is inserted into the module, the USB flash drive icon on the display is lit.

2.Turn the SONG LIST knob on the module panel to enter the SONG interface, and then press the USB SONG button on the panel to enter the USB SONGS interface.

3.In the USB SONGS interface, press the play button at the bottom of the screen or the PLAY/STOP button on the panel to play or pause the music in the USB flash drive.

**Note:** Only .wav and .midi formats are supported. Before that, please create a folder named 'SONG' in the U disk and put the music you want to play in this folder. The name of the music only supports English characters.

## Recording operation

\*This function must be used with a USB flash drive. If you press REC without inserting a USB flash drive, the system will prompt the following interface.

1.After inserting the USB flash drive, press the REC button on the panel to enter the recording mode.

# Drum kit operation

2.Press REC again in recording mode to start recording.

3.Press the stop button to end the recording. After the recording is over, you can press the play button to play the track just now. Press the SAVE button in the middle to save the track to the USB flash drive (the recording is in .wav format).

\*If the following prompt pops up during the saving process, please clear the storage space of the USB flash drive and try again.

4.In the main interface of recording mode, press SETUP to enter the recording setting interface, select the option you want to adjust and press ENTER to enter.

## VOLUME SETUP

You can adjust the volume balance of the background music and the drum sound in the recording.

## BACKING TRACK

You can select the desired song in the recording. During the selection process, you can use the USB SONG button on the panel to switch between the music in the U disk or the music in the sound module.

## SONG SETUP

Used to adjust the various parameters of song playback. (This parameter adjustment will affect the recording content).

Parameter comparison table		
Parameter	Range	Description
DRUM OFF	ON/OFF	Mute or activate the drum sound in the song
CYCLE PLAY	ON/OFF	Turn on/off the playback of the song
BACK VOLUME	0~127	Song volume adjustment
DRUM VOLUME	0~127	Drum volume adjustment

# Drum kit operation

## Coach function

1.On the DRUM KIT table, click on COACH to enter the coaching function.

2.Use the up and down keys to select the function you want to practice and press ENTER to enter.

## \*ACCENTS SHIFT

In this mode, you can practice the accent transfer.

1.Enter this mode, after the automatic four-shot preparation, the practice begins.

2.After finishing the exercise, automatically enter the score interface to score this exercise.(Press START to start the exercise again)

3.Click SETUP to enter the setting interface, press the up and down keys to select the item you want to set, and adjust the parameters by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
RHYTHM SHIFT	8 <sup>th</sup> \Triplet\16 <sup>th</sup>	Accent type switching
SOUND	FULL\4 <sup>th</sup> \ACCENT\QUET	Sound switching
SCORE	OFF\4bar\8bar\16bar\32bar	Scoring mode switching

4.Click CLICK to enter the metronome setting interface, press the up and down keys to select the parameter you want to adjust, and adjust it by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
TEMP	40~280	Speed adjustment
SOUND		Metronome tone type
VOLUME	0~127	VOL switching

## \*TIME CHECK

In this mode, you can train your hit accuracy.

1.Enter this mode, after the automatic four-shot preparation, the practice begins.

# Drum kit operation

2.After finishing the exercise, automatically enter the score interface to score this exercise. (Press START to start the exercise again)

3.Click SETUP to enter the setting interface, press the up and down keys to select the item you want to set, and adjust the parameters by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
SCORE	OFF\4bar\8bar\16bar\32bar	Scoring mode switching
DISPLAY 1	KICK\SNARE\TOMS\RIDE\CYMS\HIHAT	Test position 1
DISPLAY 2	KICK\SNARE\TOMS\RIDE\CYMS\HIHAT	Test position 2
GAUGE	LEFT AHEAD\LEFT BEHIND	Measurement mode switching

4.Press the CLICK button to enter the metronome setting interface, press the up and down keys to select the parameter you want to adjust, and adjust it by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
TEMP	40~280	Speed adjustment
BEAT	1~9	Beat adjustment
RHYTHM	Triplet\4 <sup>th</sup> \8 <sup>th</sup> \16 <sup>th</sup>	Note switching
SOUND		Metronome tone type
VOLUME	0~127	VOL switching

## \* QUIET COUNT

In this mode, you can train the sense of time, and the metronome will alternate between “sound and mute”.  
1.Enter this mode, start the practice after the automatic four-shot preparation.

2.The metronome is muted when practicing to silent shooting.

3.Automatically score after each session is completed and continue to practice.

4.Click the SETUP button to enter the setting interface, press the up and down keys to select the item you want to set, and adjust the parameters by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
MEASURES	4\8\12\16	Number of beats per measure
QUIET	1\2\4\8	Silent beat

5.Click the CLICK button to enter the metronome setting interface, press the up and down keys to select the parameter you want to adjust, and use the INSTRUMENT knob to adjust.

# Drum kit operation

3.Click the CLICK button to enter the metronome setting interface, press the up and down keys to select the parameter you want to adjust, and adjust it by using the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
TEMP	40~280	Speed adjustment
BEAT	1~9	Beat adjustment
SOUND		Metronome tone type
VOLUME	0~127	VOL switching

Parameter comparison table		
Parameter	Range	Description
TEMP	40~280	Speed adjustment
BEAT	1~9	Beat adjustment
RHYTHM	Triplet\4 <sup>th</sup> \8 <sup>th</sup> \16 <sup>th</sup>	Note switching
SOUND		Metronome tone type
VOLUME	0~127	VOL switching

## \* CHANGE UP

In this mode, you can train your performance speed accuracy for different notes at the same time value.  
1.Enter this mode, start the practice after the automatic four-shot preparation.

2.This mode does not set a score, click SETUP to enter the setting interface, use the up and down keys to select the item you want to set, and adjust the parameters with the INSTRUMENT knob.

Parameter comparison table		
Parameter	Range	Description
DURATION	5\10\15\20 MINS	Practice time
CHANGE-UP	16th\5\6	Note adjustment
MEASURES	1\2\4\8	Beat adjustment

# System menu operation

Click the MENU button at the bottom of the screen to enter the menu, use the left and right buttons or the INSTRUMENT knob to select the item you want to adjust, and press the ENTER button to enter.

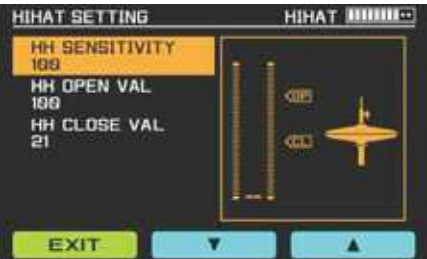

System main interface

System setting interface

## HI-HAT SET

Select HIHAT SET and press ENTER to enter. This interface is used to adjust the parameters of the hi-hat system. The DM-8 hi-hat has three states, closed, half-open, and full-open. HH VOLUME is to adjust the hi-hat volume value, the parameter range is 0~127. The interval between OP and CL is the half-open cymbal range, which can be adjusted by adjusting HH OPEN VAL and HH CLOSE VAL. Over OP is a fully open, under CL is closed.

## CLICK

- 1.Select CLICK in the MENU interface, press ENTER to enter.
- 2.Use the up and down keys to select the parameter you want to adjust, and use the INSTRUMENT knob to adjust the parameter value.

Parameter comparison table		
Parameter	Range	Description
TEMP	40~280	Speed adjustment
BEAT	1~9	Beat adjustment
RHYTHM	Triplet\4 <sup>th</sup> \8 <sup>th</sup> \16 <sup>th</sup>	Note switching
SOUND		Metronome tone type
VOLUME	0~127	VOL switching

## EFFECT

- 1.Select EFFECT in the MENU interface, press ENTER to enter.
- 2.Use the left and right keys or the INSTRUMENT knob to select the effect you want to set, and press ENTER to set the effect interface.
- 3.After entering the effect setting interface, press ENTER to turn on or off the effect. Use the left and right keys to select the parameter you want to adjust, and then use the INSTRUMENT knob to select the parameter value.

**PAD EQ**  
It can be used to adjust the EQ of each pad.

# System menu operation

## SONG

- 1.Select SONG in the MENU interface, press ENTER to enter.
- 2.Use the up and down keys to select the parameter you want to adjust, turn the INSTRUMENT knob to adjust the parameter value.

Parameter comparison table		
Parameter	Range	Description
DRUM OFF	ON/OFF	Mute or activate the drum sound in the song
CYCLE PLAY	ON/OFF	Turn on/off the playback of the song
BACK VOLUME	0~127	Song volume adjustment
DRUM VOLUME	0~127	Drum volume adjustment

## TRIGGER

- 1.In the MENU interface, select TRIGGER, press ENTER to enter.
  - 2.Hit the pad, select the pad you want to adjust.
  - 3.Use the up and down keys to select the parameter you want to adjust, turn the INSTRUMENT knob to adjust the parameter value.
- \* When the sensitivity is high, the sound will be loud even you hit the pad slightly. And when the sensitivity is low, the sound will be soft no matter how hard you hit. So please adjust the sensitivity according to your preference.

Parameter comparison table		
Parameter	Range	Description
SENSITIVITY	1~99	Head or bow sensitivity adjustment. When the sensitivity is high, the sound will be loud even you hit the pad slightly. And when the sensitivity is low, the sound will be soft no matter how hard you hit. So please adjust the sensitivity according to your preference.

**PAD COMP**  
PAD COMPRESSOR. It can be used to adjust the compressor of each pad .

**MASTER EQ**  
It can be used to adjust the master EQ of the drum set.

**MASTER COMP**  
MASTER COMPRESSOR. It can be used to adjust the master compressor of the drum set.

**OVERDRIVE**  
It can be used to add the overdrive effect to the drum set.

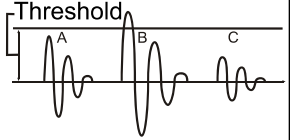

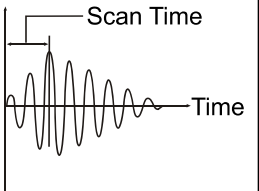

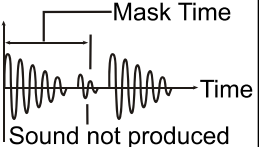

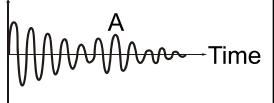

**REVERB**  
It can be used to add the reverb to the drum set.

System menu operation

Parameter comparison table		
Parameter	Range	Description
THRESHOLD	1~99	Adjust the trigger level of the drum.
<div>As shown on the right, the B waveform will sound and the A and C waveforms will not occur. <b>Note:</b> If the value you set is too high, a light blow will not sound.</div> <div></div>		
SCAN TIME	1MS~8MS	Adjust the detection time of the trigger signal.
<div>When setting, try a soft and powerful blow and confirm the natural changer in volume. <b>Note:</b> If the value you set is too high, the sounding time will be lengthened. Please set as low as possible.</div> <div></div>		
MASK TIME	4MS~64MS	Adjust the masking time of the trigger signal.
<div><b>Note:</b> When playing fast, too high values may mask the trigger signal, so lower the value as much as possible.</div> <div></div>		
RETRIG CANCEL	0~99	Adjust the repeat trigger value of the trigger signal.
<div></div>		
XTALK CANCEL	0%~80%	Adjust the crosstalk value.
<div>When hit, some drums that are not hit are also triggered to sound, improving the XTALK CANCEL of the drum that is being audible. <b>Note:</b> If the value is set too high and the strike is at the same time, the drum with a small striking force may not be triggered. Therefore, the value is set as small as possible without crosstalk.</div>		
CURVE	LINEAR/EXP/LOG/LOUD	
RIM GAIN	1~99	Adjust the edge gain to be effective only for the drum rim and cymbal edge.

Parameter comparison table		
Parameter	Range	Description
RIM SHOT SENSITIVITY	1~99	RIM SHOT sensitivity adjustment
HEAD RIM ADJUST	1~99	This parameter is about the relationship between the head and rim(bow and edge)

**Note:** The parameter will be saved automatically when exiting this mode.

PANNING

- 1.In the MENU interface, select PANNING to enter .
- 2.Use the up and down keys to select PAD PANNING, or hit the drum pad to select the pad you want to adjust. Use the INSTRUMENT knob to adjust the parameters.

KIT NAME

- 1.In DRUM KIT mode, select the drum kit you want to rename.
- 2.Click MENU to enter the menu, select KIT NAME to enter the drum kit naming.
- 3.Use the left and right keys to select the position, and use the INSTRUMENT knob to adjust the character.

WAV FILES

\*This function must be used with an external U disk, this function is used to import or delete WAV files.

**Note:** First of all, you need to create a folder named'WAVIMPORT' in the U disk and then name the WAV file you want to import with English characters. After that, import the WAV

System menu operation

file into the 'WAVIMPORT' folder. Please noted :  
1. The maximum of the WAV files you can import is 100. 2. The total size of the files imported shall not exceed 100M. 3. The duration of each WAV file shall not exceed 20 seconds.

- 1.After inserting the U disk, in the MENU interface, select WAV FILES to enter WAV settings.
- 2.Use the INSTRUMENT knob or left right keys to select the item you want to set, press ENTER to enter.

- IMPORT A WAV  
This function is to import a single WAV file from the U disk to the module.

After importing, you can find the imported tone in the drum pad tone setting function, and assign the imported tone to the pad you need.

- IMPORT ALL WAV  
This function can import all the wav files in the 'WAVIMPORT' folder from the U disk to the module at one time.

After importing, you can find the imported tone in the drum pad tone setting function, and assign the imported tone to the pad you need.

- DELETE A WAV  
You can choose to delete a single previously imported WAV file in the module. Use the up and down keys or the INSTRUMENT knob to select, press the ENTER key to confirm.

- DELETE ALL WAV  
This function is used to delete all WAV files previously imported into the module at one time.

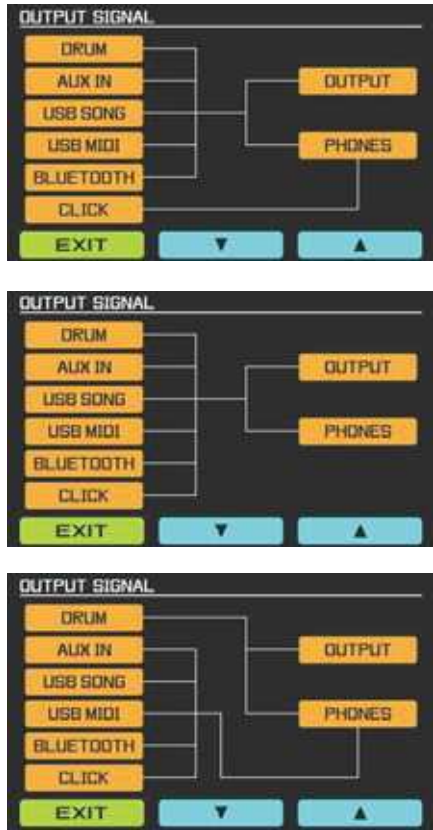

System menu operation

OUTPUT

This function provides three different output distribution modes for users .

MIDI NOTE

\*Set the MIDI code corresponding to the output of the pad, OFF means no MIDI signal is output.

- 1.In the MENU interface, select MIDI NOTE, press ENTER to enter the setting.
- 2.Use the up and down keys to select the pad you want to set, and use the INSTRUMENT knob to adjust the parameter value.

Parameter comparison table

HH PEDAL	OFF, 0~127	HH pedal MIDI code
TRIG 1	OFF, 0~127	Trigger 1 MIDI code
TRIG 1 RIM	OFF, 0~127	Trigger 1 rim MIDI code
TRIG 2	OFF, 0~127	Trigger 2 MIDI code
TRIG 2 RIM	OFF, 0~127	Trigger 2 rim MIDI code

FACTORY RESET

- 1.In the MENU screen, select FACTORY RESET and press ENTER to enter.
- 2.Use the up and down keys to select the parameter you want to adjust and press ENTER to enter the setting.

Parameter	Description
RESET CURRENT KT	Restore all current parameters of this drum kit to the factory settings.
RESET ALL KT	Restore all parameters of all drum kits to factory settings.
RESET SYSTEM	Restore the source system version content to factory settings.
RESET ALL	Restore all content values to factory settings. (one click recovery)

System menu operation

OPTION

- 1.In the MENU interface, select OPTION and press ENTER to enter.
- 2.Use the up and down keys to select the parameter you want to adjust, and use the INSTRUMENT knob to adjust the parameter value.

- 3. When you adjust the MEMORY LOCK parameter, such as selecting LOCK, a lock icon will appear on the main screen. At this time, it means that no matter you modify any parameters, it will not be automatically saved.

Parameter comparison table		
Parameter	Range	Description
BRIGHTNESS	1~10	Screen brightness adjustment
MIDI OUT CHANNEL	1~16	MIDI out channel selection
MEMORY LOCK	LOCK/UNLOCK	Memory lock selection
BLUETOOTH	BOTH ON/AUDIO ON/MIDI ON	Bluetooth on/off
SYSTEM INFO RMATION		System version

BLUETOOTH CONNECTION

Turn on the Bluetooth function of the mobile phone, find the DM-8 series in the device list, and click Connect. After successfully connected, the audio in the mobile phone can be played through DM-8.

USB AUDIO\USB MIDI

- 1.Use a USB cable to connect the DM-8 to the computer. After the connection is successful, the USB icon on the screen will light up.

- 2.The DM-8 module is an audio/MIDI recording interface in itself, with the ability to send stereo sound and MIDI data to a Mac or Windows computer via a single USB cable. This lets you record discrete audio and MIDI drum tracks in any DAW, or trigger sounds in software-based drum instruments for studio or live playing.

Note: You need to select 'NUX DM-8 as the input device on the DAW's input device to record multi-track audio.

Function		Transmitted	Recognized	Remarked
Basic default		10	1~16	
Channel changed		No	No	
Note		0~127	0~127	
Velocity:	Note on	Yes	Yes	
	Note off	No	Yes	
After key's		No	Yes	
Touch Channel's		No	Yes

FCC ID: 2AOAA-DM-8

FCC WARNING:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

According to the technical specifications of low-power radio frequency equipment:

For low-power radio frequency equipment that has been certified, companies, firms, or users are not allowed to change the frequency, increase the power, or change the characteristics and functions of the original design without approval. The use of low-power radio frequency equipment must not affect flight safety and interfere with legal communications; if interference is found, it should be stopped immediately and improved to no interference before continuing to use. The aforementioned legal communication refers to radio communication operated in accordance with the provisions of the Telecommunications Administration Law. Low-power radio frequency equipment must endure the interference of legal communications or industrial, scientific and medical radio wave radiation electrical equipment.
