

Pulse

The heartbeat in your
home

The all-in-one gateway, wired or wireless extender

At Genexis, we are strong believers that modern home networking should be easy and flexible. Today's households need more than just internet – they need reliable, intelligent connectivity that adapts to how we live, work, and play. With more devices, more remote work, more streaming, and more smart home technology than ever before, the home network has become the invisible backbone of daily life.

As digital life evolves, the **Pulse Series** is your perfect companion. The Pulse is a compact, multi-purpose gateway and extender, ideal for homes without the need for traditional voice services. With the ability to act as a gateway, wired or wireless extender, the Pulse automatically detects its role and adapts to your unique networking needs.

Insert quote or product fact here

High-performance connectivity

With models supporting both Wi-Fi 6 and 5, the Pulse ensures high-speed connectivity throughout your entire home.

The device is compact and features one 1GE WAN-port and two dedicated 1GE LAN-ports for cabled connectivity.

Monitor your Pulse

The Pulse is compatible with Genexis CloudSight and the Genexis EasyWiFi app.

This makes management and control of your network easier than ever, ensuring stable and smooth performance.

Load balancing

Wi-Fi EasyMesh™ automatically optimizes load balancing between access points as you move throughout your home.

Effortless installation

EasyTouch functionality makes installation and onboarding effortless, because good connectivity should be easy.

Evolves with you

As you rearrange rooms, move workspaces, or add smart devices, Pulse's flexible 3-in-1 design makes adapting easy.
