

1 Tap the **+** icon in the upper right corner and then tap **Add Lock**.

2 Swipe through and select the lock you would like to add.

3 Choose your preferred guide experience and desired language. Tap **Continue** to begin lock installation.

Note: If the lock has already been installed, tap **Skip Installation Guide**.

! The app will walk you through each step of the set up process. Tap **Continue** to proceed to the next step.

Note: You can pick up where you left off and return to the last completed step if set up is interrupted.

4 Follow the on-screen instructions to enable Bluetooth Pairing mode on your lock. Tap **Continue** once complete.

Note: The lock will exit Bluetooth Pairing mode after 30 seconds of inactivity.

5 The app will automatically search for the lock and start pairing once it is detected.

Note: If no lock is detected, try tapping **Scan Again** or repeat **Step 5** again.

! If multiple locks are in pairing mode at the same time, you will be asked to select your desired lock from the list of available locks.

Note: You may see the lock name appear as:

- HALO LOCK: #####
- HA: #####

6 If the correct lock has been identified you will see a flashing blue status light and hear a long beep. Tap **Yes** to confirm this behavior or tap **No** if unsuccessful.

Note: If you see a flashing red status light, the lock may already be paired to your phone. Remove the lock manually from your phone's Bluetooth Settings and repeat **Step 4** again.

7 Your phone will display a Pairing Request message, tap **Pair** to complete lock pairing.

Note: If you tap **Cancel** the lock pairing will fail and you will need repeat **Step 4** to try again.

8 Once pairing is complete, you will be asked to name the lock. You can change this name later from the Lock Settings menu.

9 You may be prompted to update firmware on the lock in order to continue with lock set up. Tap **Update** to begin this process.

Note: The firmware update process may take up to 3-6 minutes to complete. Please keep your phone within Bluetooth range of the lock and ensure your phone remains unlocked, with the Kwikset app running in the foreground.

10 Add the first Access Code to the lock. You can modify or remove this code later from the Access Codes menu.

11 Follow the on-screen instructions to connect the lock to your home Wi-Fi network and tap **Continue** to begin scanning for networks.

Note: Ensure your Wi-Fi network is 2.4GHz and is password protected using WPA2 security.

12 Select your home Wi-Fi network from the list of available networks.

Note: If your Wi-Fi doesn't appear, tap **Scan Again** or select **Manual Setup** to enter the Wi-Fi network name (SSID) and password manually

13 Enter the password for your Wi-Fi and tap **Continue**.

14 Once connected to Wi-Fi, the lock will contact the Kwikset cloud server to complete activation.

Note: This process may take 2-3 minutes.

15 Tap **Continue** to complete set up and return to the main screen.

16 Congratulations! Your new lock is now ready to use.

1 Tap the **+** icon in the upper right corner and then tap **Add Lock**.

2 Swipe through and select the lock you would like to add.

3 Choose your preferred guide experience and desired language. Tap **Continue** to begin lock installation.

Note: If the lock has already been installed, tap **Skip Installation Guide**.

! The app will walk you through each step of the set up process. Tap **Continue** to proceed to the next step.

Note: You can pick up where you left off and return to the last completed step if set up is interrupted.

4 Follow the on-screen instructions to enable Bluetooth Pairing mode on your lock. Tap **Continue** once complete.

Note: The lock will exit Bluetooth Pairing mode after 30 seconds of inactivity.

5 The app will automatically search for the lock and start pairing once it is detected.

Note: If no lock is detected, try tapping **Scan Again** or repeat **Step 5** again.

! If multiple locks are in pairing mode at the same time, you will be asked to select your desired lock from the list of available locks.

Note: You may see the lock name appear as:

- HALO LOCK: #####
- HA: #####

6 If the correct lock has been identified you will see a flashing blue status light and hear a long beep. Tap **Yes** to confirm this behavior or tap **No** if unsuccessful.

Note: If you see a flashing red status light, the lock may already be paired to your phone. Remove the lock manually from your phone's Bluetooth Settings and repeat **Step 4** again.

7 Your phone will display a Pairing Request message, tap **Pair** to complete lock pairing.

Note: If you tap **Cancel** the lock pairing will fail and you will need repeat **Step 4** to try again.

8 Once pairing is complete, you will be asked to name the lock. You can change this name later from the Lock Settings menu.

9 You may be prompted to update firmware on the lock in order to continue with lock set up. Tap **Update** to begin this process.

Note: The firmware update process may take up to 3-6 minutes to complete. Please keep your phone within Bluetooth range of the lock and ensure your phone remains unlocked, with the Kwikset app running in the foreground.

10 Follow the on-screen instructions to add your fingerprint to the lock.

11 Follow the on-screen instructions to connect the lock to your home Wi-Fi network and tap **Continue** to begin scanning for networks.

Note: Ensure your Wi-Fi network is 2.4GHz and is password protected using WPA2 security.

12 Select your home Wi-Fi network from the list of available networks.

Note: If your Wi-Fi doesn't appear, tap **Scan Again** or select **Manual Setup** to enter the Wi-Fi network name (SSID) and password manually

13 Enter the password for your Wi-Fi and tap **Continue**.

14 Once connected to Wi-Fi, the lock will contact the Kwikset cloud server to complete activation.

Note: This process may take 2-3 minutes.

15 Tap **Continue** to complete set up and return to the main screen.

16 Congratulations! Your new lock is now ready to use.

1 Tap the **+** icon in the upper right corner and then tap **Add Lock**.

2 Swipe through and select the lock you would like to add.
