A B O U T U S

MADE IN THE USA: 20 YEARS TRANSFORMING OUTDOOR LIVING

Natures Composites was founded in Wyoming nearly two decades ago with a vision to develop sustainable products that look better, last longer, and cost less than traditional outdoor materials. With an unwavering commitment to environmental responsibility, we embarked on a mission to develop a proprietary sustainable composite formula utilizing wheat straw, a by-product derived from wheat grain harvesting. Our primary goal is to harness the abundant annually renewable materials found throughout the USA, offering an eco-friendly alternative to wood in conventional composite materials, commonly known as WPC (Wood Plastic Composites).

B E T T E R T H A N W O O D

Environmentally Friendly

- Our proprietary formula is based on wheat straw, a by-product of wheat harvesting, with high density polyethylene (HDPE), a safer, longer lasting plastic alternative.
- Wheat straw has limited nutritional value for animal feed, leading to substantial waste during annual production.
- Compared to wood pickets, where a percentage of material is not usable, 100% of NC pickets are usable.

Low Maintenance

- Our mono composite pre-finished formula requires no seasonal painting, staining or sealing.
- HDPE acts as a water shield to help resist moisture absorption without leaching.
- Composite pickets are insect-free due to their composition coupled with potential chemical treatments.
- No need for harsh cleaners. Clean with soap and warm water.

Easy-to-Use

- Available in dog ear and square top.
- Installs, cuts and screws just like wood, with standard wood working tools.
- Our boards can be trimmed without compromising the integrity of the picket, as color and sealant goes all the way through the board.
- Unlike other WPC products, our pickets require no pre-drilling.

Durable

- Unlike wood, will not splinter, rot or crack over time due to sun exposure and weather changes.
- Engineered to have long-lasting color, a textured finish and non-reflective surface
- Stronger and 33% lighter in weight than competitors.
- 10-year residential and 25-year commercial warranty.

M O D E R N F E N C I N G

READY-TO-INSTALL AND ENGINEERED TO MAKE YOUR LIFE EASIER.

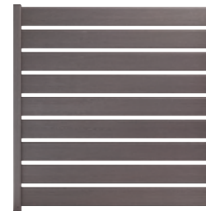

This patented modern system, with a wind rating of 100 mph and 3-second gusts at 116 mph by Intertek USA (Category 1 Hurricane Wind 74-95 mph on the Saffir Simpson Hurricane Wind Scale), and STC rated at 24 by Intertek USA (suggests a reduction of over 75% of perceived loudness) allows our boards to effortlessly free float, eliminating the need for fasteners. Offered in four wood-inspired colors, these neighbor-friendly contemporary fences present a variety of fencing options, including composite full privacy and semi-privacy, and their frame is rated as Class B for fire resistance based on ASTM E84 testing, demonstrating reliable flame spread and smoke development performance. Unlike traditional wood, which typically falls into Class C, these composite boards offer greater protection against flames and smoke.

Horizontal Privacy
(Color: Rosewood)

Vertical Privacy
(Color: Timber Brown)

Horizontal Semi-Privacy
(Color: Slate Grey)

Vertical Semi-Privacy
(Color: Raven)

This Collection offers a sleek, contemporary solution for complete privacy with gap-free horizontal tongue & groove boards that ensures each board seamlessly locks into the next and the U-shaped post for a clean, easy installation. Each fence kit includes all necessary components required for installation including two posts, top caps, boards, cable stops, fasteners and hardware.

R A N C H R A I L

CHOOSE BETWEEN OUR TRADITIONAL AND MODERN RANCH RAILS INSPIRED BY THE CLASSIC EQUINE AND STATE RANCHES OF AMERICA.

The Modern Ranch Rail features a sleek, contemporary look with slim, 2.5-inch U-channel posts and a square black top cap. It comes as a complete kit, with all necessary components—two posts, boards, caps, and hardware—ready for installation. No cutting is required, and an easy-to-follow guide ensures a quick setup. This fence is wind-rated up to 100 mph and is ideal for residential use.

The Traditional Ranch Rail offers a classic 3-board design with pre-routed posts and board assembly clips, allowing boards to slide into place without cutting tools. Each kit includes rails, a line post, post cap, and clips, though additional posts like start/end or corner posts can be purchased separately to fit your layout. The system's flexible installation ensures a professional look with minimal effort.

Modern Three-Board Ranch Rail

Traditional Two-Board Ranch Rail

The Modern Ranch Rail is a U.S.-made, patented fencing system designed for easy installation and long-lasting durability. Ideal for residential use, it features slim, 2.5-inch U-channel posts and a sleek, contemporary design. The system comes as a complete kit with all necessary components—two posts, boards, caps, and hardware—eliminating the need for additional tools or parts. Installation is simple, with no cutting required, and an easy-to-calculate panel system.

M O D E R N R A N C H R A I L

**Composite Modern Three Board Ranch Rail
(4 ft. H x 5.75 ft. W)**

Height : 48 in. Depth : 2.5 in.
Width : 69 in. Weight : 45 lbs.

- Product Number (Raven Black): 100323RV30600

Inspired by traditional equine ranches, this panel comes with rails, a post cap, board assembly clips, and one line post. To complete your project, additional posts, such as start/end or corner posts, must be purchased separately. Line posts, routed on both sides, are necessary when installing more than one panel. This flexible approach allows you to buy only the components you need, ensuring your project is both cost-effective and perfectly suited to your property's specific layout.

Pair your modern and traditional ranch rails with our matching two and three board fence gates. NC provides two gate mounting options:

a) For residential use, we recommend mounting directly on the ranch rail panel.

b) For commercial settings or residential applications with heavy use, NC recommends the 5x5 Composite Commercial Grade Post.

PRACTICAL SOLUTIONS FOR COMMERCIAL APPLICATIONS: WE'VE GOT YOU COVERED.

Available in both 6 and 8 ft tall, this line of sustainable products is designed for commercial projects due to their exceptional endurance, including a wind rating of 130 mph (Category 3 Hurricane Wind 111-129mph on the Saffir Simpson Hurricane Wind Scale). The composite boards' air pocket cavities reduce noise, earning an STC rating of 24 from Intertek USA, cutting perceived loudness by over 75%. Perfect for HOA applications, government projects, utilities, or pool fencing, these boards are Class B fire-rated (ASTM E84), offering superior protection against flames and smoke compared to traditional wood, which typically falls into Class C.

YOUR FENCING, YOUR WAY: INDIVIDUAL COMPONENTS FOR CUSTOM PROJECTS

We recognize that certain fencing projects demand a more personalized approach, often outside the scope of pre-engineered systems. Hence, we provide a range of individual components to cater to your unique needs. Choose from our selection, including classic dog ear and square top pickets for fences and gates, contemporary free-floating tongue and groove boards from our modern fencing systems, as well as sturdy 5x5 fence posts and reinforced commercial fence posts. With these individual components, we empower you to tailor your fencing solutions precisely to your project requirements.

If you prefer to work outside of our pre-engineered fence systems, we also offer our all four color variations of our 3.5" and 5" composite dog ear and square top pickets in packs of 7 and 10.
