FEATURES & BENEFITS

13 Fabric Care Cycles

13 fabric care cycles including Steam Refresh, Quick 30, Bulky and Easy Iron. A gentle, effective wash action protects clothes while delivering an optimal wash performance.

Quick Steam Refresh

Steam Refresh is perfect for occasions where clothes have been worn once and need freshening up. The 20 minute cycle will reduce odours and de-wrinkle clothes, making them ready to wear again without the need for a full wash cycle.

Customise Your Wash

Shorten your wash and rinse times with our Speed option, or choose Eco to wash more sustainably at lower temperatures with less water.

A Smarter, Quieter Motor

SmartDrive™ Technology is a gentle, quiet, and efficient combination of smart electronics and a direct drive motor that senses the load to deliver better fabric care.

Approved By Woolmark™

Our Wool cycle is an extra gentle warm wash, perfect for machine washable woollen items. It has a Woolmark™ guarantee so you can wash with confidence, saving time on hand washing.

Add A Garment

Missed an item from your wash? Our Add a Garment function allows you to pause your wash cycle, open the door and add or remove items, then carry on washing.

Designed To Match

The complete package for a beautiful laundry. This washing machine is designed to match both the 8kg Heat Pump Condensing Dryer and the 8kg Condensing Dryer. With outstanding aesthetics and complimentary wash and dry cycles, they become the perfect pair to deliver complete fabric care.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
