(Coming Soon)

Pytes HV Series Batteries

Enroll Now: Get Paid via VPP Program Help the Grid. Get Paid.

VPPs Benefits & Values

Reduce Energy Bills

– Energy optimization, avoids peak rates, reduces grid dependence, keeps more money in your pocket

Better ROI from Your ESS

– Boost ESS profits 24/7—smartly layer energy trading, demand response, and grid ancillary services for compounded earnings

Grid Resilience and Stability

– A VPP (Virtual Power Plant) unifies distributed energy storage systems into a smart, coordinated network-enabling flexible power dispatch that eases grid stress during peak demand events and boosts reliability for everyone

Integrator Partners & Supported Programs

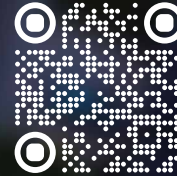

(More Partners & Programs are coming soon. Follow Solis & Pytes for updates.)

Programs Supported

California: Demand Side Grid Support (DSGS)
Texas: Emergency Response Service (ERS)

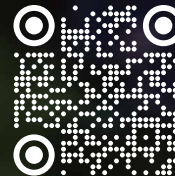

*Program participation does not affect SGIP incentive eligibility – double your profits
